Once you get on the air on the HF bands, even from a simple antenna challenged station running just 100W, you will begin to hear DX stations from Europe, the Pacific, the Caribbean Islands and South America. If you call one of these stations you will be surprised at how easy it is to work them. But beware, once you start working DX you could be bitten by the DX bug. Climbing the DX Ladder introduces you to the ARRL DXCC program and some of its awards.

- Basic DXCC
- DXCC by Mode
- DXCC by Band
- Five Band DXCC
- Honor Roll
- #1 Honor Roll
- DXCC Challenge
- 10 Band DXCC

The Elmering Project is sponsored by the Northern California DX Club, a group of hams driven by working DX. This class is a shameless attempt to interest you in the game of Dxing.
