The General Class license exam contains 35 questions taken from a question pool of 462 questions covering all 10 Elements of General Class theory and practice. To pass the exam you must correctly answer 26 of the 35 questions. To get a good feel for how you are doing going through a number of real questions straight from the pool really helps. ARRL has published a deck of 462 flash cards, each with a question and four multiple choice answers. These are the exact questions you will see on the exam itself. I will run through as many of these cards as I can in an hour and a half and explain the question and its answer if there are questions. After this session you should have a very good feel for how you will do on the actual General Class exam. Good Luck!
