

THE

DXer

MAY 1985

VOL: XXVII NUMBER 5

THE MAY MEETING

DATE: Friday, May 10, 1985

TIME: Cocktails - 6:00 PM
 Dinner - 7:00 PM
 MEETING - 8:00 PM
 =====

PLACE: Harry's Hofbrau, Palo Alto.
 Take the Embarcadero turnoff to
 the Palo Alto Airport/Golf Course.

PROGRAM: An in depth review/analysis of the
 Club Survey. There will be ample
 opportunity for discussion and
 comments from the floor.

The Prez sez;

My thanks to Steve, N6ST for the superb DX Convention. Let me say, "I've learned a valuable lesson from Steve". He taught me that it is possible to be low keyed and tranquil, while being highly efficient and successful.

I applaud Steve and his sub committee members for having done an outstanding job: once again proving this is the world's greatest DX Club.

Gud DXing,

Len, K6ANP

The lack of activity from 3B7 indicates that the DX-pedition to St. Brandon has not yet come to fruition... most plausible explanation so far, was heard on our own repeater from K6TMB... story is... Erik and crew set out to the island on a trimaran with licenses, but without permission to land or operate from there... meanwhile friends on 3B8 were trying to get the required permission for them... if obtained, the info was to be radioed to them... this story was pretty well confirmed by W6TSQ who had a QSO with SMOAGD on April 27th at about 0230 UTC... Erik was at that time still aboard the boat awaiting permission to operate from the island... it appears we'll have to wait on this one out... the other "3B7" that came up on 14.025MHz on April 27th appears to have been slim... Another ray of hope is that 3B8DB is rumored to be going to 3B7 around June or July.

Good news from Uganda via Fresno... Chuck, KC7UU announced he will be signing 5X5?? for around seven months upon his return... that should take care of the demand for sometime to come... Chuck may even get a chance to "ragchew"... a desire he expressed in his talk in Fresno.

There is a rumor that an Italian is going to operate from 5A some time in May... let me repeat, this is only a rumor... but according to the rumor, the operator is currently working on his 40m & 80m antennas... Don't hold your breath.

The Clipperton '85 DX-pedition was a rousing success. Info from Fresno is that they had over 31,000 QSO's! They operated all modes and bands and appear to have put a big dent in the demand for Clipperton... Congratulations, Fellas!

Several club members had the good fortune to work FT8XB, Kerquelen during a rare night time opening on 20 meters on April 17th at around 0700 UTC. Michelle worked the multitudes on SSB at 14.180 MHz.

XF4MDX was active for two days from Revilla Ggedo... running mostly SSB... claims his key got broken while boarding the island... He did, however manage to work most bands at one time or another.

###

(DX-cerpts is intended to be a regular feature of the DX'er that contains clear, concise and timely DX info in a "digest" format. The bulk of the items included in it come from information heard on the Club repeater. However, we welcome any "hot" DX news you may want us to include. Please let us know about it either by mail or by calling one of us on the Club repeater or the telephone. -Ed.)

=====

HI HI

Two wrongs don't make a right, but three will get you back on the freeway.

-Changing Times, The Kiplinger Magazine

1985

International DX Convention

Fresno

We, the DX'er Staff, gratefully thank The 1985 DX Convention Committee for having put together an outstanding convention - back finally in Fresno. The Committee included;

Steve Thomas, N6ST	- Convention Chairman
Ted Algren, KA6W	- Pre-registration
Bruno Bienenfeld, AA6AD	- Prizes & Raffles
Steve Brunt, WC6I	- On-site Registration
Roger Gearhart, W6PKB	- Accounting
Bob Thompson, K6SSJ	- Publicity

It was very refreshing to be able to move about freely in the registration area and also to have enough room that congestion was not a problem either before or after any of the events. In fact, congestion only became a problem at the elevators on Sunday morning, but even that was acceptable. It was a lovely spot to hold the convention.

The Friday night cocktail party was very nice with only small pile-ups at the bars (they were considerably deeper at the Saturday night bash). The fellowship with our fellow DX'ers was very enjoyable.

Programs were well presented and informative. In fact, Mickey Gelerstein, CE3ESS gave us a good tip during the DX forum concerning QSL's from CEOAA. Essentially, if you haven't received your CEOAA card by May 15th, then you should write a letter with the details of the QSO and send it to Box 700, Santiago. Mickey emphasized that you should not re-QSL. That will only cause more confusion. So if you haven't received your card by May 15th, write them a letter.

The FOOXX Gang's program clearly showed why they aren't in a hurry to return to Clipperton. That apparent tropical paradise was anything but that. They contended with a steady 15-30 knot wind, daily rain (not only from the clouds, but from the birds, too) and by a host of menacing crabs. But they all survived and in the process, made over 31,000 QSO's.

The banquet featured KC7UU as main speaker. Chuck's sense of humor complimented an interesting talk which gave us a glimpse at the other side of the pile-up.

One of the highlights of the banquet was the induction of Ron Wright, ZLIAMO and Herb Becker, W6QD into *CQ Magazine's DX Hall of Fame*. Herb was not in attendance. Ron was, however, and was given a standing ovation when he accepted the award.

Another highlight was the naming of the 1984 NCDXC DX'er of the Year. The recipient this year was JOSEPHINE CLARKE, WB6ZUC. Jo was also treated to a standing ovation when she accepted her honor.

Contest awards occupied a lion's share of the awards presentation time. There were so many contest awards passed out that it became impossible to keep track of them all. Suffice it to say "congratulations to the winners".

It was a memorable convention. Again, congratulations to the Committee for a job WELL DONE.

Edward J. Radlo

Attorney at Law

25811 Estacada Drive

Los Altos Hills, California 94022

To fellow members of NCDXC, re Los Altos Hills antenna zoning:

Progress is being made.

On April 10, the Los Altos Hills Planning Commission received from its Antenna Subcommittee its report on the proposed new zoning ordinance for amateur radio antennas. 55 radio amateurs attended the Planning Comm'n meeting. Although the Chairman unexpectedly limited the number of speakers, eight hams spoke in favor of reasonable antenna regulations: WB6ECE, W6JKV, AJ6V, N6DA, WB6JXU, K8ERL, N6BAB, and NV6Z. Four persons spoke against. The Comm'n voted, 4-1, that: a) the existing 30' height limitation is unenforceable; b) there should be some regulation of amateur radio antennas; and c) the recommendations of the Antenna Subcommittee are too restrictive of amateur antennas. Comm'r Siegel, the minority of one, declared that there should be no antenna regulations at all! His remarks were greeted with a warm round of applause. The four majority comm'rs refused to pin themselves down to any specific numbers in the motion that passed. However, Comm'r Kuranoff remarked that the Antenna Subcommittee's position on crankups (i.e., that a crankup should be treated as a fixed antenna having a height equal to its maximum height) should be reversed. Furthermore, Comm'r Lachenbruch, originator of the Antenna Subcommittee's low numbers, indicated with his hand on a chart that the breakpoints for conditional use permits should be raised from 50 ft./10 sq. ft. to something which looked like 80 ft./25 sq. ft., i.e., any antenna over 80 feet high or more than 25 sq. ft. in cross-section would require a conditional use permit. Thus, we made significant progress on two points.

On the other hand, these four comm'rs still want "site development" for antennas below the conditional use permit category, i.e., the city can force you to landscape your antenna and force you to place it at a location they think appropriate, taking into account neighbors' opinions. And it was suggested that an antenna should be set back from the property line a distance equal to its height.

Two days after Fresno, I received more good news: the City Manager informed me he's dropping his request that the City Council institute legal proceedings against me under the existing ordinance for occasionally raising my crankup above the 30' height limit.

These positive developments could not have occurred without the participation of those concerned amateurs who attended the April 10 meeting. I greatly appreciate your support. I believe that amateur radio in general has benefited from your actions.

On May 1, the City Council will presumably direct the Planning Comm'n to conduct a public hearing to determine the specifics of the new ordinance. This public meeting is expected to occur in June. The FCC will probably get to PRB-1 by June, Ted Turner notwithstanding. I plan to call a meeting of Citizens for Reasonable Antenna Regulations before then, to elect officers and adopt a platform, so we can maximize our political strength. Stay tuned for further developments.

73, Ed Radlo, AJ6V/VP2MEV

N6DJM

Perhaps the best reason for having calendars and for marking life in years is that the cycle itself offers hope. We need fresh starts and new chances, the conviction that beginnings remain available, no matter how many we've blown. And the yearly clock can start anywhere along the line.

-Louden Wainwright in *Life*

So once again, we start the clock;

the DEADLINE for the JUNE DX'er is MAY 30th.

12 METER AMATEUR BAND OPENS TO U.S. HAMS IN JUNE

The ARRL BULLETIN copied on April 27th announced that the 12M band will be open to U.S. Amateurs at 0001 UTC JUNE 22, 1985. Frequency and power allocations appeared in the December Issue of QST and are quoted here:

"24,890-24,990 kHz: The FCC is proposing to allocate this band to General, Advanced and Extra Class licensees in accordance with the band plan recommended by the ARRL (based on the worldwide IARU band plan): A1 and F1 emission would be permitted on 24,890-24,930 kHz: A1, A3, A4, A5, F3, F4 and F5 emissions would be permitted on 24,930-24,990 kHz. There would be no special power restriction, but the rules would make it clear that amateur operation would be on a secondary basis to international fixed and mobile operations, which could not be moved until a later date."

Special thanks to WB6WKM, Dick and WA6AHF, Rubin for this information.

=====

THIS MONTH, TWENTY FIVE YEARS AGO

An editorial by the DX'er Editor, Bob Thompson, K6SSJ lamented the "...poor conditions on the band and lack of DX". Does that sound familiar? The Malpelo DX-pedition was about to commence (on May 13th) and run for five days. The only station running AM fone (what's that?) was 9N1TB with "...only 30 watts input to a poor dipole". The Station of the Month belonged to a relative new comer who had 118 countries confirmed and 141 worked. That was K6ANP. VK3CX was looking for QSL's from Club members for the California Award... He had already received cards from W6AM, W6DUB and W6KG among others. There was a move afoot to shorten the period for contests from 48 to 24 hours. W6KG experienced "...one of the worst DX months here in many years".

Ah, yes, those were the "good old days". And judging by the poor band conditions and the amount of DX on them, we're having a replay of them this month.

=====

Don't be too hard on our politicians. Many of them are doing the work of two people -- Laurel and Hardy.

- Claude McDonald in *The Christian Word*
