

PROCEEDINGS OF THE WATCH AND WARD SOCIETY.

This week, . . . 40 and 80 listed separately . . . for 5BDXCC naturally. Odds are that the first to achieve the 5B-Marathon will be a reader of the WCDXB.

Reports say only small pile-ups...one to three stations. Advised to watch for noise overloaded RF stage which disguises signal with noise. Reports from K6KA, WA6GLD and W4BRB.

SHORTLY NOTED:

Dennis, ZL1DS, fresh from Chatham Island, will be in San Francisco for a fortnight from January 28th. You can get in touch with him via New Zealand Consul or via WB6GFJ who will coordinate protocol and social activities. 9V1OI, Bud, expects to go to YB-land in the future and operate as YB2. Plans for 15 meters mostlymany recall his 9K2 operations a few months back. The Malpelo rumors also include some TI9 speculations.....their discussions in Spanish makes it somewhat difficult to eavesdrop. KH6GLU will operate from 5W1-land from February 8-13 at 5W1AS QTH after the Wallis effort.

BURMA XZ2AB, U Rec.the handle, 14198kc at 0200Z on January 17th. Beam heading 325°. Working both VEs and Ws. Said to QSL to CBA.

A check of Call Books does' not show the call....nor checking CBs back to 1950. What do you think?...other strange calls heard from that direction in the last few months was LZ9AY from the Isle of ZAP...200 miles north of Spratley and the ancient one, BLUP. Anyhow, work them first and then see what happens.

TURKEY TA3AB skeds his QSL manager, W5RBO, on Saturdays and Sundays from 1400Z around 14240kc. Frequently will work Ws by districts with W5RBO acting as MC. TA2FM reported at 21015kc from 1300, handle is Fazi. TA1RF at 14212 at 1450Z

HEARD IS. Still more indications of possible operations this Spring. One report is that permission to operate has been given to a VK-station.

FRESNO This coming week-end. Bands will be quiet because everyone will be there. Please....this week only mail any reports by Wednesday because the Marin QRPers will be at Fresno and will have to work on the bulletin early. Will look for all the DXers at the Hacienda.

SPANISH MOROCCO EA9AQ reported at 21252 at 1700Z on the 12th of the month. Name is Clem and QSL to CBA.

73,

WA6AUD
