

FCC Report For the first time in memory, it is believed, the FCC Annual Report contained an item somewhat critical of the amateur service. It follows:

AMATEUR RADIO SERVICE The past year has shown a significant trend towards increased on-the-air feuding and use of questionable language in a radio service which historically has prided itself on cooperative self-regulation. Limited manpower has limited attention to any but the most flagrant cases. Approximately 2800 violation and advisory notices were issued to licensees during the year.

KURE ISLAND KH6EDY again on the air, being worked on March 31st from 1300Z. The present operator is named John, apparently somewhat inexperienced but he should learn fast. Says he will QSL by letter. Big pile-up when he showed. KH6BZF will again be out at Midway in the coming months and again will try to get onto Kure. Lee, the Hawaii SCM, ran into problems last year.

INDONESIA Cards from YB0HAB being received for APRIL DX Contest...9V10I, Bud, getting gear ready for YB0 operation where he will be sent by his company. Bud was very active from 9K2-land last year. Should be on in a couple of weeks. YB0HAB also reported at 21261kc from 1500Z

MALTA 9H1BL, Al, has 5-Band capabilities and will sometimes QSY on request. Al reported on 10, 15 and 20 in recent weeks....28555kc at 1600Z, 21045kc at 2145Z and 14045kc at 0700Z. QSL via G3VPS...fast service. Al likes commemorative stamps. 9H1BN, Edgar, also reported at 21353kc at 1745Z on April 2nd.

AFGHANISTAN YA1YB, Wes, and YA1AR, Art, at 14238kc, 1330Z on April 1st. Also Wes was reported at 14300kc an hour later at 1430Z same date. QSL to: U.S. Engineering Team, c/o U.S. Embassy, Kabul, Afghanistan. YA1AB also 14205kc at 1500Z Mar 31st. YA1SG, Steve, 21369 at 1410Z on March 28th.

PAKISTANS AP5HQ, Fida, reported at 14040kc at 0230Z on April 3rd. Also at 14213kc, at 1720Z on March 31st. QSL direct and definitely not via K4LRN. AP1RIL was at 14310kc at 1450Z on April 1st. Said to QSL via AP-Bureau. Probably would feel a bit better if the date was different....said he was in East Pakistan. Fida is a rather consistent one on twenty meters. In that AP1RIL, put the number at the end and what do you have?

QSLs--NEW SERVICE Advertising will be appearing in radio magazines within a month announcing the availability of a new Incoming-Outgoing QSL service by Lloyd Colvin, W6KG. Lloyd is completing arrangements to handle cards for both US and VE stations as well as the well-known DX variety. Tentative rates are 3¢ per card for US/VE/XE cards and 4¢ for cards going overseas. Address for the service is 5200 Panama, Richmond, Calif. 94806. Cards can have the call of the recipient but not his address....that's what the Post Office says.

SOUTH AFRICA ZS1A is a consistent operator on the low frequencies, showing up on 40 meters, 7000-7005kc from 0500Z for c.w. operations and going to 7085-7090kc for SSB efforts, listening 7220-7225kc. Will QSY to 80 meters on request...which is very helpful for 5BDXCC.

SAN MARINO M1C at 14203 from 1800Z on March 29th.

HEARD IS. U.S. Coast and Geodetic Survdy sending a team to the island...VQ9GA may make it but not sure. Hope for an amateur radio operator in the crew. Same outfit put 18 men on Chagos...no amateurs among them.

IRCS As every QSL manager finds out, the number of IRCS that WA6HF has is a few more than he needs. 800 at 10¢ea. send money with s.a.s.e.

W6UED worked 30 countries on 80 meters in March....How's that for effort. However, W6ANN has his total for 427 for 5BDXCC, consisting of 80/10 of 43, 84, 100, 100, 100 and W6NJU has 419 countries on 80/10 50, 77, 100, 100, 92.

SHORTLY NOTED VK9RJ on Nauru is now handling his own QSLing. Jack has no cards, expects to get some so there may be delays. Apparently any /HS operations will be confined to 14280-14300kc and no activity expected on any other bands. The SVØWN effort on Rhodes and the 3A2CU effort from Monaco opened on schedule. CR5SP still scheduled for 14170kc on April 20th at 0530Z...possible last chance for Sao Tome until A1 returns from vacation trip. Cards for XRLA/mm have been returned by CE3ZN...Joaquin knows nothing about this one. ZA1ZW reported at 14046kc on March 30th...certainly a lot around these days. We know of one European...whose parent came from Albania... who has been trying to line up a ZA-operation with no success so far but he is still trying. Few 80/40 reports expected until the Fall...they were scarce this last week. W5PDW, John, will put PJ9AK on the air for several days from April 11th. F6ALX tells W6AOI that French novices allowed on the air only two days a week...AOI wonders if he was making the 'plaisanterie'. The ARRL Pacific Division Meeting last week-end asked the ARRL to (1) Conduct a spectrum study of amateur band use including that usage in the sub-bands, (2) Study any possible inequities arising from observance of 'gentlemen' agreements, and (3) Determine whether steps should be taken to bring some uniformity in operating privileges in ITU Region II.

SPRATLY VS6DR, Phil Wight, making plans for a trip to this exotic spot in the South China Sea sometime later this year...CR9AK may also make the trip with Phil. VS6DR will be in the states in June, being in New York on June 6th and on the West Coast the following week. They have the vessel for the Spratly effort...its about a 900 mile run from Hongkong.....and any effort will be late this summer. Phil is looking for any information on conditions at Spratly.

SERRANO BANK Rubin Hughes, WA6AHF, has cancelled his plans for Serrano Bank this July, being advised that the weather at that time of the year would make matters hazardous. Rubin now looking at a possible HC8-Galapagos tour .instead.

(Had to cut this one out...no publicity on this planned operation wanted at this time.....a Spring 1970 effort)

ANDORRA. WA6QGW and WA6PMK/DJ4QQ will operate from PX-Andorra for three days commencing April 18th....three day, five band, twenty-four hour effort. May show up from some other small European countries following this one. Frequencies will be c.w.: 3505/3525, 7004/7025, 14040, 21040 and 28040kc. SSB 3790, 7090, 14190, 21290 and 28590kc. QSLs will go to K6VVA.

BALL'S PYRAMID VK2BFI, Jerry, planning a trip to this small rock a few miles from Lord Howe....probably would count for Lord Howe.

TIMOR CR8AI, Luiz, still coming through in the mornings....14240-14250kc from 1400Z. K6KA sometimes making list before this time. English is a third language and QSOs very slow. European QRM a problem. W9EXE also making list for VEs and Eastern part of U.S. Dissatisfaction with slow movement on list and breakers with advice ...friendly or otherwise....hampering operations. Patience...Luiz will be there for awhile yet. QSL to Luiz A. Rodrigues Fernandes, CR8AI, Dili, Port.Timor.

TNX....to all the Big Gun DXers...including HS3DR, W6HVN, W6MEM, W6AOI, W6CNA, K6HPZ, WA6QGW, K6MHD, KH6BZF, KH6GQW, W4OPM, W6WAB, K6KA, W6NJU, WA6MWG, WA6DJI, WA6AHF, W6PTS, WB6YLG, W6UED, WA6GLD, K6CWS, WB6UJO, K6MHD, W6DZZ, W6JHV/7, W5LZZ, W6KJS, W1CW.

WEST COAST DX BULLETIN Published every week by the Marin County DXers...Marin County, ...where things are always jumping. Sixty-three years ago this month the San Andreas fault jumped 22 feet early one morning. In 1969 it would hardly be noted with all the QRPers jumping in frustration when they miss one.....simply terrible. \$7.00 yearly.
