

GUS Gus operated from the Seychelles last week, signing VQ9/A and it does seem that his plans for the next several weeks have been firmed up. Peggy is returning to the states and Gus has matters rather well lined up except for the FR7-operations which he is planning for. Starting June 8th Gus' operations are scheduled for:

VQ9/A/D	Des Roches
AC1/	Etoile Cay
AC2/	Bandeuse Cay
AC5/	Wizard Reef
VQ9/A/F	Farquhar
VQ9/A/A	Aldabra
FR7-	Glorioso
AC6/	Geyser Reef
FR7-	Juan de Nova
FH8-	Comoro
VQ1	Zanzibar - if this can be activated

Beyond that Gus is eyeing VQ8-Chagos, VQ9 (or 8), Blenheim and VQ8CPA St. Brandon or Agalega. Eventually Gus will end up in South Africa and may operate in some of the rarer areas there. There is also a possibility of Gus looking at Bouvet again and a possible stop at St. Peter & Paul enroute home. There is a report that Gus has lined up a captain and a boat for the whole trip ending up at Charleston. Boat charter is \$50.00 per day and to continue the trip to completion will necessitate contributions to augment present scant resources....these go to W4ECI.

Gus plans to stop from two to four days at each location. A new operating time schedule has been worked out in an attempt to get into the Western Reaches with some regularity as previous efforts have not been good to W6-W7 land. Gus time as announced will be:

14mc	1100-1500Z	c.w. and SSB
21	1500-1700	
10	1700-1900	If no good, back to 21mc or 14mc
14	2100-2315	
7	2315-2345	c.w.
3.5	0100-0115	c.w.
14	0115-0400	

Because of the scant QSOs per time spent on the lower frequencies, Gus plans to devote less time on these bands. Gus plans to keep the operating schedule as flexible as possible and will shift to open bands when these are productive. Announcements will be made several times before moving and where the move to will be made.

There is the full story on Gus....if you want to see all these areas activated, the route is some support to W4ECI. It does seem that there is a possibility of some new ones coming out of this operation and undoubtedly there will be a fast reference to the atlas to locate Etoile, Bandeuse and Wizard.

TRINIDADE PYØRE showing up 14220kc at 2300Z as previously announced. Not especially strong signal but he is in there and will come back to calls. PY2ERS apparently not operating as m.c. any longer but often is on this frequency to help out. Cards being received from the PYØBLR operation through the address in May QST. Apparently some bitterness on the part of PYØBLR when promised financial help did not materialize after the operation leaving him holding a sack of bills and causing some financial hardship. If you are still looking for a PYØBLR card, it would seem that some green salve is needed to soothe the hurt in the pocket book.

SHORTLY NOTED Herb, KV4FZ, operated from the British Virgins a week ago, concentrating on 40/80/160m. Herb is looking for Anguilla-VP2KK and possibly an HH or FM7 effort. A report is that Herb has to start anew on 5BDXCC after his boy used his logs to stoke a fire. WA4HTR and W4UQC are replacements on the Florida DX-Navassa effort with the two mentioned previously apparently out. The Lebanese Amateur Radio Assn will hold a DX Contest to commemorate its 20th anniversary. Overall winner gets two air tickets to Beirut and a week in the Cadmos Hotel. Other awards. More details later but the week-long contest is from October 4-12th. Prepare!!! 9M6HM is frequently found around 14235kc from 1400Z. W4BRB is down to 27 on 80 for the 5BDXCC. Late report is that Gus will open from Des Roches for one day...June 8th. VK2BFI has a sked with YJ8RG (a.m.) every Friday and Saturday at 0600Z....listen around 14235-14240kc. VE3AUU handles all FG7TI/FS7 QSLs. Anyone interested in a TI9-Cocos effort should contact TI8WPE....21320kc Wednesdays at 1500Z (21420kc alternate frequency) Boots has the boat for charter and can help with licenses. New APO address needed for CE0AE. K6CF who handles 1/4 of the W6 QSL chores had 55 pounds of QSLs for his May efforts.

CARIBBEAN K5AAD, Don, will operate from several spots in the Caribbean commencing July 7th. His itinerary includes:

Martinique	FM7WQ	July 7-13th	QSL to W4OPM
Grenada	VP2GTL	14-20th	WA5LES
Trinidad	9Y4-?	21-27th	WA5LES
Antigua	VP2AZ	Aug 1-	WA5LES

Frequencies:

c.w.	3550kc	7050kc	14050kc	21050kc	28050kc	listening up 5+.
SSB	3790	7190	14190	21240	28490	-listening as announced.

QSLs require s.a.s.e. for Ws; Foreign require s.a.e plus IRC or via bureaus. If any changes required in the schedule, it will be announced during operations.

FUNNY FARM 1A1A operating both c.w. and SSB last week. Said he was on a DXpedition to the island of Minoro and gave the location as 35°W, 61°N. This would put him in a deep part of the Atlantic south of Greenland. On SSB said to QSL to W4EMQ, on c.w. said to QSL to DJ5BB. QSLs for ZA1BY, T.Chang, Bx 44, Tirana have been returned endorsed 'Unknown'. Reported that FR7ZD having some problems with FB8XX logs as cards received for days when FB8XX not on the air. It would appear that more than one joker is around. For a bit of suspicion take AP1AC calling CQ at 14063kc at 2130Z.

RA LA9NJ/mm calling Thor's paper boat at 14217kc at 2220Z. Appears that the boat is rock-bound at 14217kc and is SSB only powered by a hand-cranked generator. LI2B the call for the RA.
