

West Coast DX

Bulletin

+++++
January 13, 1970 ----- 2-70

SIKKIM AC3PT coming through LP on January 2nd, 14242kc at 1430Z. Was also on the Southeast Asia Net (SEA) on January 5th and 6th...14320kc at 1200Z. The station is being operated by Dr. Fred Friedman of Brown University who is in Sikkim to tape the folk songs of the hill people. His operating time depend on his work and last week he was up-country for some days.

4S7PB making up lists for possible operations around 1300Z around 14250kc. When things get too rough, the usual solution is for WFLS to shut down operations until another day. WFLS, by the way, is the club station at Brown University. Availability of power may be the main consideration in AC3PT being on the air. Gus Browning reported that the power plant there was privately owned and shut down at night. With the bands openingg around 1400Z, it would seem that one must face a sq̄eeze between band openings and power shut down.

MANIHIKI ZK1AJ on Rorotonga has completed a Heath HW-100, has a dipole up and is working on a Quad. He will travel to Manihiki for a two-week stay sometime in the next few months on business and will operate while there. KH6GLU is looking for a DC-power supply for a Heath HW-100 so that ZK1AJ can operate from Manihiki while there. Ed not soliciting contributions but anyone wishing to see Manihiki on the air should get in touch with him to see what can be done. Also interested in a small, portable beam.

ZK1AJ has been coming on regularly from the Cook Islands from around 0600Z and around 14250kc. Does also check into the PACDXNET, 14265kc from 0600Z Tuesdays and Fridays. QSLs go to KH6GLU. Was at 14217kc at 1810Z on January 6th.

COCOS TI9CI tentatively scheduled to open February and hope for 6 to 8 hours operation before the end of the ARRL Phone Test. Plans are for a five day effort with K6JGS/HK3, TI2CMF, W9FIU, K9KNW, TI2J, TI2W participating. QSLs will go to TI2CMF. The announced frequencies are:

C.W. 1805, 3505, 7005, 14005, 21005.

SSB 1825, 3795, 7095, 14195, 21305 and 28595kc...plus Transceive at 14280kc

HEARD VKØHM coming through most morning...LP from 1430Z onward and usually within the lower 10 kcs of the twenty meter band...SSB. Sometimes splits frequencies trying to open out the pile-ups. Will be on Heard until around April 1st and will then return to the states. QSLs are going to his home QTH in California and are not expected to be answered until after his return. QSLs go to his home call---WA6EAM.

PREFIXES That IRØ-prefix is being used by stations in Rome during 1970. Change the RØ to I for QSLing purposes. 5C2AA was being called on 20 c.w. last week. If this one legitimate it would be Morocco. In the U.S.S.R. it is reported that those UK-prefixes are being assigned to club stations in lieu of previous prefixes with U05 becoming UK5, UL7 becoming UK7 etc. The YT-prefix is being used in YU-land. If you get too confused, check the International Assignments in the back of the ARRL Handbook.....often clears up a mysterious one. The HT-prefix being heard from YN-land.

CALENDAR

SIKKIM AC3PT being operated by WFLS ... probably through January.
SPRATLY VS6DR & Co. effort January 26-29th. 1S1A maybe the call.
COCOS TI9CI scheduled for early February... February 8th indicated.
ARRL PHONE February 7-8th
FRESNO January 31/February 1st.
QATAR February 21-27th..MP4QBK

GUS W4BPD making plans to take off in the coming months for the Indian Ocean area. Gus applying for reciprocal licenses for the French possessions... may also try for AC3 and AC4. Plans are for a fast-moving, two month operation.

COCOS-KEELING AX0KY showing up almost daily around 14250kc after 1300Z. Was at 14245kc at 1325Z on January 10th. QSL to VK2SG.

MacQUARRIE AX0KW at 14061 at 1500Z on January 5th. This supposed to be his twenty c.w. frequency but he has also been reported at 14021kc... also at 14035kc at 1645Z on the 6th. AX0LD is also coming through from MacQuarrie, was at 14237kc at 1600Z on January 4th.

SOMALILAND 7Z3AB making list for FL8MB at 14250kc around 1500Z a couple of times a week but no definite days. 7Z3AB strong signal LP... FL8MB not especially strong. Usually about twenty calls taken for next operation at the conclusion of each go-round. FL8MB, Marcel, upset by insistent breakers, his English not exactly fluent, and persistent breakers often get a clear channel when Marcel gets angry and goes QRT. FL8HM also being reported... 14036kc at 1600Z January 7th

RECIPROCAL The U.S.-United Kingdom reciprocal operating agreement has been broadened to include the following areas: Bahamas, Bermuda, British Honduras, British Virgin Islands, Cayman, Falkland Islands, Fiji, Gibraltar, Hong Kong, Montserrat, Seychelles, St. Helena, Turks and Caicos, British Solomons, New Hebrides, Gilbert and Ellice, Line Islands, Antigua, Dominica, Grenada, St. Lucia and St. Vincent.

CLIPPERTON Apparently something still going on with a report being received that one group still aiming for a Spring effort from FO8-Clipperton. Some changes in the original personnel but the head honcho still saying its a go.

ALBANIA No further word from DL7FT planning for this operation but Frank still aiming for a Spring-1970 operation. Hopes for something definite later this month.

SAN MARINO MLI at 14031 at 0025Z on January 3rd. QSL to ILBNZ. 14050kc/2300Z Jan 3rd

KERGUELEN Maurice, FB8XX, arrived and getting set up for a stay. Was at 14041kc at 1520Z on January 4th. Apparently Maurice is also active from 0200Z on twenty but conditions not especially good into the states.

5BDXCC OH2YV reported to have submitted his 500 bundle to the ARRL during the Christmas week. W4AQW reported to have his 500 in his hot hand but lacks the 5BDXCC application. Faster than a flying bullet will be H.J. when that form arrives.

TIMOR CR8AI being reported on both c.w. and phone. Was at 14015kc at 2125kc on January 5th. Was at 14203kc at 0900Z on December 30th. Some operations around 2100-2300Z often being noted.... usually c.w. Send QSLs marked via "Darwin, Australia".... unless you get other instructions from the operator.

FORTY/EIGHTY DESK

SOUTH ORKNEYS VP8KO will be in the South Orkneys for another month. Ice conditions in the harbor preclude his leaving. Often around 14220kc from 2300Z. Has 40/80 capabilities. QSL via ISWL.

LESOTHO 7P8LB, Doc, helpful for those working 40/80. Has worked into the West Coast around 3503kc and 7002kc. QSL to Dr. A.C. Jaques, Box 389, Maseru, Lesotho.

TRISTAN da CUNHA ZD9BM works 7mc before 2200Z and 80m c.w./SSB when able after that time. Often active in contests. ZD9BN on Gough Island also on 80m at times. Sometimes LP in the mornings on the lower part of the 20m phone band.

CARIBBEAN-KV4FZ Interest developing in obtaining small rig for Herb to use on his quick trips in the Caribbean area. Some Southern California DXers trying to coordinate the effort, looking for either a small Heath Novice rig or a transceiver. Anyone with ideas, etc, contact K6KL. Herb will be traveling through some of the WP2s (Dominica/St. Vincent) soon and it is hoped to have something for him by that time.

LONG PATH W6AM moved LAØLD from LP on 40m to 80m and worked him there at sunrise on West Coast. UA-Station then calling Don. Antennas do help. W6AMN put up a new rhombic and worked six new 80m countries in two days....the rhombic aimed at Europe. W6AM got a 599 RST from 9M2LN.....rhombic again.

CONDITIONS W6UED reported that conditions were unusual around January 6th. Check the reports on the reverse for what was possible there.

KERMEDEC ZM1MT/K who was reported by a number of stations around the first of the month, has a schedule with his QSL manager, ZM2LFZ, each Sunday at 0430Z. You might watch around 14250kc. ZM2LFZ usually makes up a list at that time.

NORTHERN IRELAND GI6TK often found around 3795 from 0700-0900Z listening up inside the American band.

5BMS KH6GLU will put extra emphasis on 40/80m operations for those who are looking for Hawaii. Normally will be found 3500-3510kc for 80m but will make schedules for those who need other frequencies. Ed is using a 2-element Inverted Vee on a N/S heading.

MARSHALLS That 80m SSB station active in the Marshalls should be listed as KX6FJ...not KX6EJ. If you are looking for a schedule the correct call is a bit helpful.

SCHEDULES XW8BP and HS1CB will try Friday Schedules commencing at 1900Z with DL7FT.....the first a sure thing, the second a possibility at this time. The frequency on forty will be 7020kc (c.w.) and then 7090kc(SSB). Later they will move to 3520 and 3798kc until 2300Z. Frank also has a Sunday schedule with these at 28570kc at 1000Z; 21290kc at 1130Z; 14310kc at 1400Z. If you have any special requests for schedules, this would be the time to check. DL7FT has added T2LE, TF3ST and C31AH to his roster that he is QSL manager for.

HAITI?? HH9DD being worked....was at 3794kc at 0530Z on January 1st. Said to QSL to K2SET....somewhat difficult to find in late Call Book, it not being listed. Some suspicion on this one. A few months back HH9DL said he was the only one active on Haiti since HH9GR folded his tent some years back.

SHORTLY NOTED FR7ZP/E ordered QSLs from France but hasn't received them...says he is a very busy fellow and it will be a long time before he completes all his QSLing and answers the follow up letters. UALCK reported as confirming that he will be in Franz Josef/UALKED in April and May. VE6AO reported as ill and behind in his QSL chores....patience if you are looking for one from his direction. XW8CS will be leaving Laos in May and will travel to Seattle by auto after visits in the Los Angeles/San Francisco area. DL7MT trying to get gear to TU2BB for some TY-Dahomey activity. Busted our backs again...Oh, WCDXB, you go on forever...it seems.

FRESNO DX MEETING Among those announced to be on the program at the big Fresno International DX meeting are:

- Bill Rohrer, W7ZFY, who operated VKØWR from Heard Island
- Ed DeYoung, KH6GLU, who operated FW8-Wallis and VR3-Fanning in the Pacific.
- Mickey Dawson, W7GVA, of the Nevada DX Assn who operated from Andorra and Liechtenstein.
- John Knight, W6YY, on DX Behind the Iron Curtain.
- Dick Baldwin, WLIKE, from ARRL Headquarters who will conduct the DX Forum.
- Red Eyed Louie..

Reservations for the meeting can be made to W6CS. \$14.00 covers the meeting cost..including the Saturday banquet and the Sunday morning DX Breakfast. Room reservations should be made individually and direct to the Del Webb Towne House in Fresno.

W6RGG says there is still a few seats available in the Northern California DX Club chartered Greyhound bus. \$10.00 will cover the transportation....plus the rolling happy hours.

SUDAN A Christmas message from ST2SA said that he was so busy on his new job that he had little time for amateur radio and his activity was almost nil. Sids address Box 125, Medani Hospital, Sudan.

73,
WA6AUD
