

CALENDAR

JORDAN Wayne Green, W2NSD/1, to open April 16th for one week in JY-land.
 FRANZ JOSEF UA1CK & Co...maybe late in April if Transportation is available.
 AVES YV0AI--May 1st - 3rd.
 ALBANIA Postponed.
 FANNING VR3AA...April 16th if all goes well...has been delayed.
 CLIPPERTON Possibly in July...F0NH/FO8
 SAN FELIX August operation planned by GE3ZN
 KURE KM6DQ planning for first part of May...maybe late April.
 MANIHIKI May a possibility...by ZK1AJ.

TONGA VR5LT showed last week. 14120kc/1000 on Apr 2nd. 14053/0720 on April 5th

ALBANIA-POSTPONED A decision was made this week by DL7FT and those in on the operation to postpone the operation until this September. The decision was made because the support to date has been insufficient to mount the operation and DL7FT does not have the resources to finance the effort himself. The date for the operation has now been set for September 20-30th. Frank has an entry permit for Albania good from May 1st to October 1st. Should the permit expire without the operation coming off, any possible future operation would be somewhat remote. Slightly less than 50% of the needed support had been raised when the postponement was decided. Any funds collected to date...either by DL7FT or W6KNH..are being held for the September effort but with the proviso that any contributors who might wish a refund can communicate to the person to whom they made it. It is hoped that an additional four months will allow time to complete the necessary planning and that additional support will be forthcoming for the September effort...which will be a cash only matter when the entry into Albania is made. Scant credit available in ZA-land.

VK9XI reported to be trying for 75m contact into the states.. 1200-1300Z at the low end of the band. TJ1AW recently activated activity covers all bands 80-10m while KX5NR (WA9NSR) does the same for the Canal Zone.

CLIPPERTON WB2VAE, Nick, developing plans for F0NH/FO8 and working with others interested in the effort. Transportation at this time the main problem under study and several leads being worked on this one. Weather in July not the best with strong MNE wind and high waves. The TV special filmed by Jacques Costeau along with Henri Piccard is scheduled for viewing around May 1st. Some ideas on Clipperton may be gleaned from watching this TV special. Moneyas it always is.....will be a problem. In this TV special the helicopter was used from the vessel on which TI8NAM-Poggy is employed. While there are undoubted problems in mounting a Clipperton effort, Nick does have the license and is working hard to solve the other problems and to put on the Clipperton effort.

REPORTS FROM RED EYED LOUIE. Oh, Lonely Night. Last fore...
 You have made me learn to li... and love and work DX.

SHORTLY NOTED Because of the mail stoppages, ARRL DXCC Desk will accept Honor Roll additions until April 30th. JA3XPO says they are the only official EXPO Station. QSL information needed for ZD5X. 5H3LV will know for sure by the end of April whether he will make another Zanzibar effort...Garth still hurting from the expenses of the last effort. W50JZ has forwarded 2.5K QSL cards to HB0XGR...a contribution. WB6DXU and W0LIL have received JY1 QSLs... FR7ZP/Europa cards are being received.

MORE JORDAN Wayne Green, W2NSD/1, expects to open from JY-land this coming Thursday, April 16th, and operate for about a week. His main frequencies will be 14200kc-14225kc with some operations on 14280kc. Other bands will be used as announced during the operation. It will be a transceive operation. Definite guidelines for the operation have been indicated. Wayne wants calls given just once...phonetically or otherwise. Give your call once and listen. Anyone not following the directions will not be recognized and persistent troublesome ones will not be QSLed. Proof of the operation will be submitted immediately to the ARRL DXCC Desk. How the QSLs will be handled will be decided later and full publicity will be given.

KURE KM6DQ will operate from Kure in three or four weeks....one week operation. More details as the operation firms up.

AMBROSIA IS. 1ALA continues to show up and beam headings all do point in the Iceland direction. When asked on QSL information...sometimes says to QSL to VE2AUU... sometimes says to QSL to Bx 1970, Grand Central Station, New York City....other times will not give QSL information. Claims to be on a newly formed volcanic island off the coast of Iceland. Frequencies given for the operation are: 3790kc, 7069kc, 14225kc, 21325kc and some 28mc operation. Has shown up on that 14225kc several times around 1900Z. This...admittedly...is a mystery. A letter written to VE2AUU some weeks back asking about this one has not been answered. Work him if you hear him but do keep your fingers crossed.
