

West Coast DX

Bulletin

+++++
June 2, 1970 22-70

GUS FHØVP operated from Comoro last week, expecting to QRT from that spot this Monday, June 1st. Using a vertical, according to reports, high SWR on the beam a problem with that antenna. W6/7s seeming to have the most trouble working Gus but by the week-end they were getting through. QSL to W2MZV.

ALBANIA The OH-Group with their fingers crossed by expecting to put on an Albania operation in July. The operation will be manned by OH2BH, OH2BW and OH5SE and a single transmitting frequency, 14195kc, has been indicated. All planning aimed at July 10-17th. They are going...if permits not obtained in advance, will try when in Albania.

MARKET REEF The frequencies for the OJØDX operation will be:

C.W. 3520, 7020, 14020, 21020 and 28020kc
SSB 3795, 7095, 14195, 21295 and 28595kc.

An 85 foot motor ship has been chartered for the trip and it will remain in the vicinity of the reef while the operation is on, the operators living aboard the vessel and rowing ashore to do the operating.

Those participating will be OH1NK, OH1NM, OH1SY, OH1YW, OH2BC, OH2BH, OH2BM, OH2KH, OH2KK, OH5SE, OHØNI and OHØRJ. QSL to OH2BH. Costs for the effort will run over \$1000.00 and any assistance would be appreciated.

UGANDA 5X5FS being found on ten meters. 28550kc at 0700Z. Some Pacific Island Stations have listed for this one at sunset and been able to work him by swinging the beam until signals peak, disregarding great circle path to some extent.

QRT VQ8CFB went QRT May 29th after 9 months operations from St. Brandons. Jacky expects to go to Rodriguez in August for a short operation there. C21JW is going QRT from Nauru on June 25th. Jack was at 14264kc at 0630Z on May 19th. OD5BZ will QRT from Beirut on June 26th and KX6FT QRTs June 16th after 200 fr KX6.

GOUGH The new operator there, ZD9BO, is on the air and was coming through LP last week. 14213kc at 1615Z...May 28th. Also at 14201kc at 1615Z on the 25th. QSL to ZS2RM, Bx 5181, Pt. Elizabeth, South Africa.

NEW HEBRIDES Two stations being reported. YJ8BW was at 14263kc at 0730Z two nights running a week or so ago, showing up on May 21st and 22nd. Earlier in the month YJ8JM showed up at 14055kc at 0730Z.

CAMEROUN TJ1QQ, Herman, showed up again after a six month rest. Was at 14030kc at 2250Z on May 26th...the day before was on fifteen meters at 21027kc at 1500Z. TJ1AW, Charley, at 14204kc at 2215Z on May 26th with good signal.

CALENDAR

MARKET REEF OJØDX for one week starting June 6th..all-band/multi op.
MARCUS KALB due around June 1st for one week.
ALBANIA OH-Group planning to be in Tirana July 10th...hope to operate.
CLIPPERTON FØNH/FO8 still hopeful but transportation a problem.
GUINEA 3XLSJ operation cancelled..
GUS Due to QRT from Comoro this Monday....on to more exotic spots.
GRENADA VP2GBG should be active first two weeks in June 15/20 SSB

TIMOR CR8AG, Adriano, still active at times. Was at 14202kc at 1230Z on May 31st. Big pile-up....Adriano when on usually found in the bottom 50kcs of the phone band and does show up around this time. CR8AJ is crystal-controlled at 14013kc and around this time.

SUDAN ST2SA, Sid, still working away on 15/20/c.w. Was at 21032kc at 2000Z on May 23rd...at 14080kc at 0430Z on May 25th. Sid anxious to get some new gear and asking for some assistance with QSL. Should you think that this is a lucrative approach....as of a week ago a total of \$32.35 had been accumulated.

SARAWAK 9M8FMF still keeping his schedule with WAØØAH...Tuesdays and Thursdays, 21355kc at 0045Z. Was also at 14310kc at 1500Z on May 20th.

GUINEA The 3XLSJ operation by Jean Claude (ON4SJ) fell a victim to the difficulties previously mentioned. Jean had the license for Guinea but no operating privileges would be granted him. As this was part of the contract with the Guinea government, Jean Claude finally said the hell with it and went home to Belgium.

GALAPAGOS HC8GS at 14220kc at 0045Z on May 27th. List being handled by K3RLY. QSLs go to HK3WO.

MARCUS JD1AAH at 14053kc at 1415Z on May 21st. KALB expected to operate for a week commencing June 1st.....operation by KA9RC.

CONTEST LOGS Some changes in the accreditation for DXCC from contest logs is being expected, possibly a limitation of five on such credits. Some problem being encountered with multi-claims running as high as 75 such contacts and it was too much work to dig through all those contest logs.

DAHOMY Fred Powell, now 3V8AA and formerly TY6ATE, has written to the ARRL DX Desk on the duplicate licenses issued to him and to Ted Schultz. Fred feeling badly because some 100 QSLs for TY6ATE were returned as 'pirate' and these apparently were for the Ted Schultz operation. FL8SR, presently home in Vezelise in France on leave, expects to go to Dahomey shortly.

SHORTLY NOTED Only two got around to mentioning that we had the wrong Guinea for 3XLSJ last week. Strange how such an error does not stand out until after you put the bulletin in the mails. 9Q5GE is now in the states and will return to the Congo this fall as a medical missionary at Kapanga. K4MQG trying to get a SSB rig over to MP4QBK again. HL9KX, Jerry, returning to the states from Korea at the end of the month. 60LAG on recently said to QSL to W2GBY...but W2GBY said he never heard of the character...but he sure is getting a lot of cards for him. Cease and desist....W2GBY cannot help you. AX9GN schedules at 1200Z on Mon/Wed Fri at 14310kc. A new DX Club is being planned in the Minneapolis-Twin City area...nothing jelled as yet but if interested drop a line to WØMYK. If your June QST is late....do not blame the Post Office this time. The high speed, modern, efficient etc, etc, etc presses at the Rumford Press were a week to ten days late in getting the June issue in the mails. Son of a gun!!!

ALL-ASIA CONTEST The JARL big Asian Contest will come off over the 4th week of August, 1000Z August 22nd to 1600Z August 23rd. This is a c.w. contest and an all-band operation. Full details can be obtained from the JARL Contest Committee, Bx 377, Tokyo.

WESTERN SAMOA 5W1LR, Trevor, worked a W6 on 6meters and says he will listen for calls daily. 50.lmc is the frequency. Was also at 14205kc at 0500Z on May 27th. That 50.lmc is a beacon on 6meters there in the South Pacific and it probably would be best to try for contacts on the hour.

OUTER MONGOLIA JT1AH continues to show up on twenty c.w. Reported to be a YL by the name of Suren. Was at 14042kc at 1415Z on May 22nd.

FAROEES Two stations showing up on twenty. OY1R at 14033kc at 2235Z on May 25th. OY2R, Rich, was at 14205-14210kc from 0050Z to after 0200Z on May 26th. OY1R shows up on the low end of twenty c.w. rather frequently, sometimes ten or fifteen kcs below the above frequency....as early as 2030Z. OY3HP at 14207kc/2140Z May 26.

SPITZENBERGEN JW7UH showing up 15/20 SSB and C.W. Was at 21329kc at 1410Z on May 23rd. Was at 14005kc at 2020Z on May 24th....at 21005kc at 1930Z on May 27th. QSL via the LA-Bureau. JW8MI shows up on the YL-SSB System at times.

WEST COAST DX BULLETIN Published every week by the Marin DX Group. Ace, one of our local QRPers, snagged a ZS6 last week...WOW!! When he got the break signal, he courteously let the breaker in. Son of a Gun!! A few rounds of two-handed QSO and Ace was euchered out into the cold. Now they call him 'Cold-Decked Ace. A victim of the Western SSB Double-Shuffle. Learn the tricks..\$7.00 a full year.
