Tres ass

- <u>OH-DX GROUP</u> Martin, OH2BH, and Villi, OH2MM, both contracted Malaria on their trip to Fernando Poo and Annobon and as of last week-end were in an isolation ward in a Helsinki hospital. No indication was available on their condition, OH2NB saying that they were hospitalized but he could give no details of the prognosis for either one.
- FORMOSA While BV2A continues to come through on 20mtrs c.w., a newly licensed station is expected to bring SSB activity. BV1USE will be operated by Pei Nang Ho, a member of the Air Force there, and has been r ported as working split frequency 14195kc and listening around 14250kc. QSL to JH1HVV.
- On BV2A, most of the operating is done by Tim Chen, the station belonging to the China Radio Assn. The location of the station is several miles from Tim's home and he must walk the distance to put the station on the air. Possibly that the best time to watch for BV2A is week-ends from 1400Z. QSLs go via WB2UKP and he says that logs are most slow in coming....the last batch presently on the way by ship and the usual gap between QSO and QSL is about five months....patience!!!!
- CHINA BYLAB continues to show up....was at 14202kc/1600Z on Jul 17th....at 14293/1545Z on Jul 19th. Stations in the Orient looking this one over closely ..... some JAs say they think he is a phoney and possibly within JA-land. However, they say that BY3NK is coming through from the West into Japan but previous contacts with this one has never produced a QSO though they were promised via VS6-land. A report from Thailand does not agree with the JAs on the BYLAB. He is being heard regularly in South East Asia and their beam headings indicate that he could very well be within China. One Far-East amateur went so far as to have his country's embassy in Peking make inquiry. The story is that the Chinese were licensing amateurs and had licensed two so far. These SouthEast Asia sources said that the . indication was that BYLAB could receive QSLs but could not send any out...these possibly would be confiscated by the Peoples Republic authorities. One possibility to get around this would be to use a two-section QSL with one portion to be detached for return. The same sources indicate that BYLAA is believed to have been heard, that there is a report of a station in Shanghai and that there are possibly three other stations who work only c.w. Whatever the state of your skepticism, work them first and worry later. If you hear BYIAB on the bands ..... usually c.w. to SSB ..... you will have all the problems you can handle ... Things get a bit on the hot-tempered side at times .. WOW !! Whoever the operator Mao may be, he understands English readily.
- W6WX--SILENT KEY Dave Baker, W6WX, passed away suddenly at his home in Menlo Park on Wednesday morning, July 21st. There has been no indications of his hot feeling well, he had been on the air Tuesday evening, got up to go work....said he did not feel good, went to rest a bit and expi ed. Dave Baker's passing was a shock to the Northern California DX Club in which he had served as President in 1966. One of the stalwarts of the club, a leading DXer and a member of the Honor Roll, his passing will leave a definite gap within the DX Club where he will be long remembered.
- UGANDA 5X5NA will operate at 14250kc/0407Z on Tuesdays trying to work into the West Coast stations that cannot score on the 15mtr schedule. This will be in addition to the 21360kc/1800Z schedule on Saturdays. W3ZNH handles the list...QSL to G3LQP. 5X5NA is Roger Whitehead, Box 6717, Kampara, Uganda should you need full information.

REPORTS FROM BIG FOOT LOUIE .....

The grief I feel, I cannot tell I just heard that your arches fell.....

CALENDAR

ANDORRA MONACO

ALDABRA

C31DN should be signed b. DJ9ON right now....to the end of the week. 3AØKH by DJ9KH until July 31st....then to Andorra for a week..... watch 14180kc, 14210kc and 21390kc. 5Z4KL looking for activity next month.....support needed.

RED SEA More activity at Jubal at Tiar beeing looked for but at mid-July the plans apparently not firm as yet. The ET3-group looking for transportation to get them there with F5QQ reported as being in London this month seeing if passage on the vessel owned by the British Board of Trade there in the Red Sea could be arranged. ET3ZU apparently not in on the August planning at this time. Should the August effort not jell, the group is looking to some future date when it might be possible to make the trip with Aldo. August QST has photo of lighthouse and the operating position for the May effort. 370 W/Ks got through then...out of 1200 QSOs. There is a report that some MP4s looking at VS9K-Kamaran and trying to see what the transportation possibilities would be via FL8.

HOPE CHEST On Spratly, reports from the Far East Desk indicate that there is a slight difference of opinion between the BV-Formosa government and the DU-Philipphine government as to who owns the choice real estate. In the MP4T area, these are said to comprise seven states, five of which have applied to the UN for country status as United Trucial. The other two wish to be independent and may qualify for DXCC country status. Those looking for some possible XZ-Burma action may keep the flickering lamp of hope alight...no licenses there at present but situation tending to ease a bit. AC5PN thought to be legit....QTH etc is T.Yonten, Post Office, Thim Phu, Bhutan. Watch 14025-140401 from 1330Z. Bouvet still shaping up as a hope for the turn of the year but 3C. I labeled a phoney by his purported QSI Manager...never heard of the clod. Also around again is UFØOL who was at 14285kc from 2000Z on Jul 22nd. 8X8AA was at 14005kc at 0140Z on Jul 20th. Looks like Slim on Cray Island has surfaced again. Said to QSL to W4SLF.

SIGNAL 1 Electronic Communications, Inc. at St. Petersburg, Florida, has sold the amateur radio operation (Signal 1) to Computer Measurement, Inc. of Los Angeles. The reason given was the desire of ECI to return to an emphasis on military business. Computer Measurements, Inc. Board Chairman, Edward B Jay, K6LOM, said his firm is forming a new subsidiary in the Los Angeles area to produce and market the Signal 1..the name being retained but model numbers of those produced in L.A. having an "A" added on....CX7A, for example. Indications are that some new design features will be incorporated into the Signal 1. W6AOA is reported to be with the new organization and Larry Pace, K2IXP, is returning from Australia to participate. Indications are that the new owners believe the Signal 1 has good possibilities and are determined to eliminate some of the problems which have been encountered in its production.

SHORTLY NOTED This seems to be Gossip Week .... no earth shaking DX events but plenty of interesting items. Darlene still on from Rodriguez.... but due to leave this week. Plans still indefinite and possibility of Farquhar and Comoro operations being considered in addition to Aldabra. With K2IXP returning, Mellish looks moribun. DJ2AA planning to work over the VP5K/FS7 and PJ8 last part of July. Was on from VP5KG/P--Provo Island on July 24th. 14034kc at 1435Z/ 9M8FMF will be back in action in August. W3DOS is another one to watch for from Washington...this is the Department of State Radio Club .... QSL to U.S. Dept of State, Washington 20520. FR7AN/E and FR7AM/E keeping things jumping. Sometimes confusion when both operating simultaneously and those working them think they are working the same station again. W2LGU is QSL Manager for 7P8AB and 9H1CD. Skeds 7P8AB 21315kc daily at 1600Z...9H1CD at 14256kc at 2100Z. OJØMA services the lights on Market Reef..goes there every nine weeks or so .... xtal controlled. Next trip early September. 9J2WS will operate 9L1WS and ZD3 in July and August. 9M2WM at the U.S. Embassy there has WA6AHF-Fern as QSL manager. Ove 100 showed up for W6AMs Stag Visitors Day at the Rhombic Farm on Palos Verdes Coninsula. SK9WL is on the border of Sweden and Norway ... 4 IRCs with your QSL will go to help handicapped SM-amateurs. MIB runs schedule with WA3HUP on Sundays .... 21377kc at 1500Z .... Saturdays likewise.

- MANIHIKI K6UFT again established schedules with ZKIMA last Friday evening and the usual schedule at 14205#/- at 0400Z on Tuesday/Thursday/Friday will be resumed. Because of the lapse in time since some calls were gathered for the list, the old list will be discarded and a fresh start made. Action should usually start at 0300Z around 14205kc the night of the schedules when WB6UNS starts taking calls for the action. ZL3IS handles the alternate operation around 14170kc at 0400Z. K6UFT has indicated his willingness to make special arrangements for stations outside the W/K/VE areas to work ZKIMA.
- TOKELAUS ZM7AG showed briefly last week, actually last Saturday, and apparently is back home from his leave and ready for action. Jim was supposed to bring a beam back with him to improve the signal. Often keeps a schedule.....plagued by breakers...at 14240kc at 0400Z.

## PREFIXES .... COMING AND GOING ..

VA2UN	150th Anniversary of McGill University at Montreal. QSL to W2GHK.					
WD6WD	Southwestern Division-ARRL convention at DisneylandSept 1-7th.					
WF7AIR	Montana State Fair Jul 30th August 8th.

- WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of our local QRPers dropped by, this one eternally bubbling with optimism and empathy. "Say", he said with his usual original opener, "did you hear the good news about Phil? He lost twenty five pounds on his new diet". "Fine, fine", we guardedly answered, frankly being unable to exactly place whom Phil might be. "And what does he weigh now?" The QRPer beamed with delight. "Why Phil is down to 350 pounds... ..isn't that wonderful?". Son of a Gun! What can one say that Einstein has not already said. All things are relative....including weight and DX. \$9.00 for a weekly treatise on the Relativity of DX....\$10.50 brings it airmail. Be an Erudite DXer...speak in relative terms. All things are relative....some more so.

. . .
