WEST COAST DX

Dull Etin

31-71 August 3, 1971

OH-DX GROUP Reports are that the malaria cases of Martin, OH2BH, and Villi, OH2MM, were light cases and Villi was released from the hopsital last week. Martin was on the air last week....Wednesday to be exact....and apparently all goes well. QSLs for the Annobon/Fernando Poo effort were reportedly being held up until the two were out of the hospital, K6LOM said to be obtaining these for forwarding to OH2NB. It is also reported that Martin may be married in the near future and Rome and Baghdad being mentioned as honeymoon spots. Martin believes it possible that a YI-Iraq license could be obtained. Also being mentioned that the 3C1/3CØ efforts cost in excess of \$5000.00. Any financial support would be appreciated.

DARLENE 3B9DR secured on Rodriguez on Jul. 28th and was due in Mauritius last Saturday. Her present plans call for her to be at Mauritius for a week and then head for Africa. Darlene made 3529 contacts fro 3B9DK, working 46 states and 145 countries. Efforts to work her QSL manager, VE6AKV were unsuccessful until the next to last day of her stay on Rodriguez. This week she should be signing 3B8DK and will be there until August 10th when she will depart by air to Tanzania and on to Nairobi for two weeks. Plans are to fly to the Seychelles to join the group on the INTREPID DRAGON for the Aldabra effort...and possibly Comoro. Darlene will then go to Mozambique, Jordan and Europe....planning to be at the Fresno International DX Meeting the last week-end in January.

FREDERICK/MELLISH VK3JW looking for a possible operation from Frederick Reef in lieu of Mellish. The planning somewhat dependent on the plans of K2IXP who presently is in California. Tentative planning is for the first two weeks in October.

BURMA Some loosening of the tight restrictions being mentioned, it being reported that previous licenses are being renewed and the impounded transmitters are being returned. One civilian visitor there in Burma to arrange for communications for geological exploration feels that things have changed for the better and the possibility of some XZ-Burma activity in the future is good.

RED SEA Reports are that ET3ZU/A will be activated again at the end of September or early in October...four days of operation. Gear this time will include linear and a 3-element beam. This report says that possibly ET3-operators will go along for c.w. work and to help with SSB.

Other reports say that Zugar will be scheduled for next Spring....around April... but that the British Board of Trade has indicated that no one but Aldo ET3ZU will be transported on their boat...BUT 9F3USA and F5QQ plan to operate in the WAE c.w. test on August 7-8th from FI8=land and may be looking into possibilites while there. Son of a Gun, things are certainly lucid here.

CHINA BY3NK was at 14205kc/1250Z on Jul 21st...at 14202kc/1355Z on Jul 26th...he being on c.w. at this frequency. Said to QSO to MPO 32, Canton. Then BY1MCC shows up, gives no handle, QTH, or QSL information. Some feeling that QSLs are being regarded as a decadent bourgeouis habi Also some feeling that QSLs will be more of a task than a QSO. Do not despair. ..work them first, there will be months ahead for worrying.

SPRATLY The Hongkong Desk saying that nothing stirring there and probably nothing will until after the Monsoon season is over in a month or so. VK3JW said to be looking that way if permission to land can be obtained from the Taiway government.

CALENDAR

ALDABRA 5Z4KI, Andre Saunders and Company...late this month of August.

ANDORRA DJ9KH should be operating there this week.

WAE August 7-8th.....C.W. go round of the annual DARC effort.

TRINIDAD/TOBAGO 9Y4-QSO Party....August 21-22nd.

FREDERICK This or possibly Mellish being looked at for October.

FORTY/EIGHTY DESK

G8DV		0500	27w				

HBØXTH will be on 7mc during the WAE test this week-end. ZD5X is often found on 7mc from around 0430Z on week-ends. Increasing interest in 40/80 evidenced as sunspot cycle declines but news and reports hard to come by.

CEYLON Word last week from 4S7PB that while the political situation has calmed to a degree, it is still not certain when they can be back on the air. It is possible that their transmitters will be returned in the coming months...meanwhile Paddy is a SWL and reports the West Coast coming in with good signals 1400-1500Z.

FHUTAN AC5PN still showing up.....lower 50kcs of the twenty meter c.w. band. Was at 14004kc at 1520Z on Jul 27th. Asian/frican stations report that he is frequently active and sometimes a JA-pile up is a clue to the AC5PN being on the air. Not an especially fast operator but reported as being good in picking out calls. Best spot to watch is the 14040-14050kc slot but he is reported as working lower. Beam headings from Viet Nam and Thailand are right...and they report him with strong signals.

FAROES OY9LV showing up repeatedly last week..on SSB was found between 14210-14220kc almost daily from the 21st. On c.w. was at 14009kc on Jul 24th. Indications are that OY9LV will be fairly active in the future. Said he would be on August 7th from O100Z. QSL to W3HNK. OY1R also on twenty c.w....14026kc/1010Z July 25th.

SHORTLY NOTED. W4CSY who operated briefly from Navassa as W4CSY/KC4 in mid-July plans to try again next Spring. The planned o eration had to be cut short when the weather turned bad. VKJUV/9 presently on Bougain ille has plans for East Pakistan and prior to the recent civil troubles there was reported to have the license in his possession. BY9FZ is another Chinese Republic station sometimes reported on 15mtrs.c.w. That BY3NK cat has drawn some comment that for an operator who has been in somewhat of a secluded state he sure knows all the procedures, abbreviations and how to work a pile-up. The OB-Prefix in Peru gets a workout with OB6BW/OB4CCN/OB1AD on 15m SSB/Also being reported is that some will try the OC-prefix. ZM7AG has the beam up and has been showing on 15meters...in the 21290kc area from 2300Z. Has been worked as late as 0500Z in the Midwest on this band. TY6ATE..Ted Schultz...has returned to Cotonou, Dahomey, and plans to be back on the air if his license still valid and the gear in working condition. 8J1WJ should be on from the Boy Scout Jamboree in Japan this week. Should you have missed it previously....the PYØATG from Trinidade was scrubbed.

HBØXTU on recently QSLs to DL1GK. VP2MAA goes to VE3GCO. VP2SAH goes to WB2AMO FR7AM/E...for whom CR7IK makes lists at times...goes to Bx 178, St. Denis, Reunion. W2GLU handles 9H1CD, FR7AN goes to Bx 1004, S. Denis, Reunion. 5W1AU goes to Box 1069, Apia, Western Samoa while ET3USE goest to K8IRC. UA9VH/JT1 to UA9VB and 7Q7AA goes to K4CDZ. All QSLs for U.S. SWLs can be sent to the Golden Gate QSL Bureau, 71 Surrey Street, San Francisco 04131. VQ9R goes to Bx 193, Mahe, Seychelles. There is a possibility that the HS9-prefix will be heard shortly. The telephone link from Saigon to Oakland appears to have not been used recently on the 21215kc frequency but on 14321kc some problems are being encountered with the Indonesian Military signing 7AJ. Local complaints make little impressions...complaints from radio clubs on club stationery considered to be most effective....A1 signal heard in the Western Reaches from sunrise onward. Support your Local Intruder Watch!!

GENEVA SPACE CONFERENCE The Geneva meeting....officially the World Administrative Radio Conference on Space Telecommunications authorized a new Amateur Satellite Service and moved the 21,000mc band up to 24,000mc.

As a result of the meeting, satellite operation is now authorized in:

7.0-7.lmc 14.0-14.25mc-21.0-21.45mc-28.0-29.7mc 144-146mc 435-438mc 24000-24050mc

Prior to the conference, satellite operation was only permissable in the two meter band. It is reported that there were efforts during the meeting to allocate amateur bands to other frequencies but these were defeated.

- NORTHWEST DX CCNVENTION.... This annual event will be held this week-end at the Sheraton Motor Inn in Portland Oregon, registration commencing at 1300 local time on August 7th. This will be a two day affair and further information can be obtained from Joe Patterson, W7MG, 8011 No. Washburn, Portland, Ore. 97217.
- TRINIDAD/TOBAGO QSO PARTY From OOOOZ August 21at to 2400Z August 22nd...ten through eighty meters phone only. Certificate for working five or more 9Y4 stations...no cross band operation. A certificate and QSL card for working 9Y4 stations on five bands. Logs go to T.T.A.R.S, Box 1167, Port of Spain, Trinidad. \$1.00 requested to cover award cost and handling.
- TNX to K1CPJ, WA2BED, W2FXA, WB2YQH, K2LGJ, W4HU, W4OPM, WB4PUD, W4TUC, W4UF, W5ALA, W5LZZ, W5PAQ, W5UBW, W5UNF/6, K6BTT, W6DZK, K6EC, K6GAK, K6GLC, WDX6GXV, K6HN, W5RBO, K6HTM, W6HVN, W6ID, K6KA, W6MI, K6OZL, K6QX, K6QZ, W6TSQ, K6TXR, WB6UDC, K6UFT, W6VQD, K6WR, WA6WXP, WA6YLG, K6ZIF, WB6ZUC, W7PTZ, W7YTN, WA8PWZ, K8RWL, WØIYP, WØJRN, KV4, HPLJC, VE8RA.
- west coast DX Bulletin Published every week by the Marin County DX Group. One of our more erudite QRPers pounded up the hill recently. "I found it, I found it", he was gasping. "I found it right in Virgil's Eclogues. Then, drawing himself up his full sixty three inches of height, he declaimed: "DXers, you will sing my love for DX to your mountains, you alone who know how to sing. Among you I shall grow old, now that an insane love enchains me, and in the forest amid the din of wild QRMers, carve the story of my QSOs on the tender bark of trees, as they grow, so shall my DXCC". The QRPer snapped his book closed and fixed us with the triumphant gleam in his eye. "What do you say to that?", he demanded. What could we say when we were surrounded with such fervor. So all we said was: "Virgil who?". Son of a Gun, around here things have not been the same since. \$9100 for a full year of DX Who/What/Where/When and Why...\$10.50 brings it airmail!...along with Virgil.
