9-71

FCC PROPOSES PHONE BAND EXPANSION On February 25th the Federal Communications Commission released a Notice of Proposed Rule Making which the Commission had adopted the previous day, February 24th. The proposed rule would dispose of 15 petitions that have been pending before the FCC.

The proposal in brief, proposes the following:

1. All of the 25kc Extra Class CW segments would be reduced to 10kc segments.
2. Phone sub-allocations on the various bands would be changed as follows--except for the Novice Bands where involved.

80 Meters	3750-3775kc 3775-3875 3875-4000	Extra Class Advanced and Extra Class General/Conditional and higher class licenses.
40 Meters	7075-7100kc 7100-7150 7150-7175 7175-7225 7225-7300	Advanced/Extra Class--inter-regional contacts only Novice Class Extra Class Advanced and Extra Class Conditional/General and higher class licenses
20 Meters	14150-14175kc 14175-14250 14250-14350	Extra Class Advanced and Extra Conditional/General and higher class licenses.
15 Meters	21100-21200kc 21200-21225 21225-21325 21325-21450	Novice Extra Class Advanced and Extra Class Conditional/General and higher class license
10 Meters	28150-28250kc 28350-28375 28375-28500 28500-29700	Novice Extra Advanced and Extra Class Conditional/General and higher class licenses

The complete text of this FCC proposal covers 10 pages and should be available in its entirety shortly and possibly will appear in the April QST. The ARRL Board of Directors will be meeting the first of May and undoubtedly will take a position on this FCC proposal. At the 1970 the ARRL Board took a position in opposition to any expansion of the U.S. phone sub-bands and none of the 15 petitions on this matter which brought this Proposed Rule Making was from the ARRL.

It would seem that this would be the time to convey any feelings on this matter to your ARRL Director.

CALENDAR

EAST PAKISTAN OR4CR/AP2 on regularly....until March 28th
 BONINS JDLABX, JDLABS and JDLAAZ presently active.
 ZANZIBAR 5HLLV by 5H3LV over the Easter Wkend...March 27th.
 LACCADIVIES VU7US April 10-17th
 FSØAB St. Martin...this week-end in the 2nd GO-ROUND in the ARRL Test
 ARRL PHONE TEST March 6-7th.
 GUS Should be enroute to Bhutan and Sikkim late this month
 ALBANIA DL7FT June effort...ZA will be worked by everyone in this effort!!
 CQ Test-SSB March 27-28th....

POSSIBLES

TOKELAUS Something in the coming months being planned
 SPRAITLY Possible action between now and June...nothing definite yet.
 CLIPPERTON Some smoke...watch for the fire
 ANDAMAN Rumored activity by VU2FJ in late March
 JUAN DE NOVA Possible activity by FR7AE after his recent Tromelin effort.
 ZUGAR There may be some activity from these Red Sea islands..

SHORTLY NOTED KH6BZF has caught up with the demand on KH6EDY/Kure Is. QSLs..anyone still looking for a card asked to send sase (or IRCs) to Lee. KM6BI logs picked up at Midway by KH6HCM and KH6HDB have been forwarded to W7PHO for QSL manager purposes. FO8DG on Taiaro Island forwards to KH6BZF for QSL purposes. Rod Linkous, W7YBX, is QSL manager for KG6SW on Saipan and also is manager for HL9WK. QSLs for VP8LV on the South Orkneys are expected from the printers shortly...patience. W4BRB/VP7 made 272 QSOs with 56 multipliers for 150K points in the recent 160m brawl...Gene may end up as World's No. 1 in the test. M1AP with an a.m. signal has been termed a pirate. Some deep doubt on the YVØTO working in the novice bands on St. Valentines Day. WA3HUP may travel to Jordan for another JY-effort sometime in April...also trying to get the VE/JY ban lifted. More power and a beam is helping the JY-Jordan signals from the Royal Palace. TI2CF, fresh from Cocos is thinking of some other DX efforts.

The earthquake in early February had an immediate result at the W6AM QTH. The power company transformers in the buried transformer room caught fire...took two fire companies and 7 power company trucks to put out fire and install a new 100KW plus 2 50KW transformers...in the transformer room. Don says things are better than ever now. 9GLSS shows up most afternoons around 14220-225kc from 2130Z...often looking for business. ZS2MI is showing up regularly...right on the low edge of twenty meters...1495kc etc...from 1500Z. Was there last Friday and Saturday. Says he will try 3800kc from 0400Z should anyone be interested. 7255kc is the route to get someone in the Palo Alto area to arouse the W6QSL Bureau for inquiries. 703DX heard in the test...also the joker signing ITØOKU has been heard...Son of a Gun, if you did not get it, write for illustrated explanation. QSLs for 3AØFL go to PY2PE, Box 19094, Sao Paulo, Brazil....WØEXD/KC4 to Rt 2, Bx 56R, Pensacola, Fla. 32506. JDLABX at 14196kc/0300-0400Z daily. JW5NM QSLs to LA7RB.. An OH2 and a SM5 being mentioned in 'secret' planning for Rockall in April or May. VU5KV has mailed 1400 QSLs
