

WEST COAST DX

Bulletin

December 28, 1971

52-71

FORMOSA Though few reports except for an occasional c.w. one on BV2A that drifts through, there does seem to be some regular action out of Formosa. A report from the JA Desk indicates that BV2AA, Pei-Nong Ho is on twenty SSB most days around 1600Z. There are other schedules and they run something like the following:

1600Z	Schedule with JHLHWN	14250kc
2300	Schedule with VE3MR plus watching for VE/W stations	
0200	Also active with the week-ends being the most active time.	

It also appears that BVLUSE is signed sometimes over the station. BVLUSE QSLs via JHLHWN.

Also, Bob Kegley, ex-TJ1AZ, is now stationed in Taipei and is trying hard to get permission to operate. So far he has not found the right key to open the doors but is trying. Anyone with the inside track might drop him a line at Box 2, American Embassy, APO San Francisco 96263.

CAMBODIA Still a lot of knotting going on with XU1AA and XU1AA QSLs. It appears that while VE7IR, John, will return in January, his present plans do not include any operating schedules.

YBØABA's operation of some weeks back also gets a few questioning looks with some noting that the request for QSLs to YBØABA CBA seem to be inconsistent with the policy at XU1AA.

In the middle of December the hostilities in and around Phnom Peng had come close to the University grounds and this caused activities to be curtailed. Some of those who traveled there from Saigon or from other SEAsia spots in the past have been ordered to keep out of the area due to the hostilities. One report says that VS6DR was on a flight into Phnom Peng earlier this month but the flight was waved off from the airport there.

K2UYG will be in Cambodia in the latter half of January....January 18th the expected date and Bill says he is angling for permission to operate XU1AA. If this one goes he will operate mostly c.w. and around 14025kc.

EGYPT SU1IM still showing up around the 14050kc slot from 1500-1600Z time period. For those who are searching, he is usually listening up 4 kcs or so. Generally SU1IM goes QRT around the 1600Z period.

SAO THOME The sometimes delayed effort by CR6NN to sign CR5XX is supposed to be on now, the last information was that they were going to open up December 24th.

NAURU Ken, C21TL, was being reported at 14205kc from 0130Z on December 20th by stations in KH6-land. This is VK3TL who is opening up on a two year tour in Nauru.

ED De Young-KH6GLU Ed reports that he has returned to DX Activity and has arranged his station in his office, the apartment not being the best set up. Ed expects to be back on the PACDXNET and plans to add SSTV to the activity. Incidentally, the January QST has an article on SSTV.

REPORTS FROM RED EYED LOULE..... The Watcher of the Outer Gate....

SHORTLY NOTED

Some QSL information....JA3GZN can help with a lot of the JDLs...JDLACH/JDLACK/JDLACM for starters. 9H3B QSLs via VE3MR. This is ex-TA3GB. TJ1AW, Charlie, is back on the air from Yaounde after the tower accident in preparing for the CQ Test. His arm is still in a full cast which should come off in January. TJ1AW will not be out of the woods then as he will have to undergo another operation to remove the two steel plates and 11 screws put in to tie things together after the big crash. Prose Walker of the FCC Compound will be at the Richardson Texas Wireless Club meeting on January 10th. Joe Johnson, W5QEM, is also 4C1CB, XEØQB and PY2ZAV. If you should be interested in these, WB5AAR handles the QSLs.

K6CF managed to work 35 stations with the CF suffix....ZK1CF being the latest. ZFLAA goes via K20LS or K2FD for QSLs. FOØGO was on the island of Moorea and QSLs via W6HJP.....who was FOØGO. Do not count ten meters out as yet....some West Coast stations report hearing the Europeans in the 1600-1700Z period. Information needed on QSLs for SVØWLL....or how to get one out of SVØWT. C-VP2EQ on Anguilla goes to WB2ZMK. VR5FX says he will be on at 0400Z most days at about 14040kc....Also 1800Z on the same spot. Expects to go allbands soon. VE7IR trying to work the XULAA QSLs loose. JY9ADO is aeronautical mobile...QSL to Capt Hussein, P.O. Box 2353, Amman. 3C8CR returns to G-land about April. 5N2ABG trying LP Mon-Fri about 1630 looking for 6/75.

KOREA PHONE PATCHES Phone patches are again authorized with U.S. Armed Force Personnel in Korea during the period December 22nd through January 3rd. This covers both the Armed Forces personnel and their families and will be good only for the specified thirteen day period.

160mtr ARRL TEST For those who are working for that 6BDXCC, it might be noted that KL7HEE is sometimes found at 1803kc from 1200Z. Some of the Big Guns down in 4-land worked Fred who is out of Fairbanks on the Chena Hot Springs Road. The last information is for those who need to pinpoint their beam headings. W4BRB said he heard KH6RS and KH6HCM during the ARRL Test but could not get through to them. XV8AL heard W6ISA, K6DDO, W7DOL/6 with the signal peaking around 1445Z and reports that W7DOLs signal was the loudest. Some efforts going on to get some exotic Caribbean stuff on 160m in the CQ Test the last weekend in January.

SOUTH GEORGIA VP8JT has been showing from this garden spot....Was at 14234kc at 0200Z on December 20th.

GALAPAGOS HC8PS was at 21287kc at 1830Z on December 21st....K6EC will handle the QSLs for this one and has ordered cards from the printers. Sase or Sae w/IRC requested for QSL.

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. Some bit of consternation hereabouts recently...one of the locals got all the necessary cards for 5BDXCC but was not bothering to send in the cards for the \$10.00 plaque. The local QRPers kept booting this topic around, expressing their amazement at the additude displayed and giving their gratuitous opinion as to what the QRPer should do. Finally they asked the Old Timer about this dereliction, putting it quite strongly to him. The Old Timer took a look at the falling barometer, tapped the glass a couple of times, and finally said: "His cards, aren't they?" Son of a Gun, in the face of such logic, crystal-clear, polished, burnished and plated, what could one say? \$9.00 for a full year of advice on being your brothers keeper, \$10.50 brings the sibling scoop by airmail.
