

WEST COAST

DX Bulletin

April 4, 1972

14-72

SAN FELIX The group for the San Felix--CEØ effort were reported as on their way to the take-off spot in Chile last week and if all goes well should open up this week-end for four or five days of operation.

Late word is that K5QHS will not make the trip but W9IGW and K9KNW are on their way and it is possible that both W9IGW/CEØ and K9KNW/CEØ will be signed from the island in the Pacific off Chile.

The announced frequencies will be:

SSB 28595kc 21295kc 14195kc 7095kc 3795kc
C.W. 25kc up from the bottom of the band.

There will be 160 mtr operation if the group is able to erect a proper antenna and get it working. Target day for the operation is this Saturday, April 8th and QSLs will go to K3RLY.

CAMBODIA XU1AA was being operated by Tony last week at 14220kc from 1430Z..or possibly earlier...and was working well past 6 and 7 land to the east. This was on March 30th and XU1AA was coming through for some hours. This did switch to a list operation with a list being taken up frequency. On Saturday he was at 14224kc from 1630Z.

On the QSLs, Tony asked that they still be sent to P.O. Box 484 in Phnom Penh but that the W/Ks not include IRCs but rather to send a self-addressed envelope with 11¢ U.S. Airmail postage on the envelope. They are apparently still on the vertical.

SOUTH SANDWICH SOUTH SHETLANDS The report a few weeks back on possible activity from this resort ~~and~~ the South Atlantic appears to have been a bit premature. A letter from the ~~the~~ ^{SOUTH SANDWICH} Desk indicates that there may be thinking but little possibility at the present time. ^{It is} ~~It is~~ ^{lightened out.} ~~lightened out.~~ One of the ~~reports~~ ^{reports} from the ~~the~~ ^{SOUTH SANDWICH} Desk is in Spanish and our translation is subject to some up-dating. ~~In other words, we will~~ ^{we will} ~~get an expert to read it for us~~ ^{get an expert to read it for us} but generally the tone would indicate that South Shetlands are ~~not~~ ^{not} ~~reopened~~ ^{reopened} in the immediate future. typing

SAM-KA2AI Late word from Sam is that he has all his tickets and visas in hand but so far has not been able to get any assurance that he will be able to enter either Sikkim or Bhutan. Sam plans to try again when he is in New Delhi, but as of last week he was not exactly optimistic.

Sam still will visit Father Moran at 9N1MM and Venkat, VU2KV, plus other intrepid DXers in the India area. As his plans were very flexible at the time he departed the Tokyo area last week, it might be well to listen when the bands are open should things show some favorable development on the AC3/A51 hopes.

WALLIS FW/AB, Karl, still in their working them but the pressure has noticeably diminished. He will operate until this Tuesday, April 4th, and then will return to New Caledonia for a week....

It is reported that he paid \$40.00 to have a couple of trees cut and trimmed for an antenna installation on the beach and away from the telephone circuits at the hotel, this being a problem when 10/15mtrs operation is tried but word last week was not quite definite whether Karl was using this set-up. QSL to VE6TP.

REPORTS FROM RED EYED LOUIE.....

"Oh, lonely night, last forever,
You have made me learn to love and live,
And work DX".

SHORT NOTES That list of calls that DL7FT waits to hear from and which we ran in last weeks bulletin was for the last ZA-operation. We thought we had all of it down in our usual lucid fashion but realized it when we cooled off and sat down to read the bulletin to find out what was going on. It being that we failed to identify it was ZAs. The GC2ZIP should be GC3ZIP....that was our high-speed typing and in the QSL addresses that YZ2ZL should be YA2ZL. This is a matter of getting the correction before you note the error as this is on the next page. In case you are curious, we do not cut the stencils in sequence.

Some of the FT-DX 400 equipment often put out a spurious signal due to misadjustment of trap coils. SPECTRONICS has put out a bulletin on some of the FT-DX 560/570 gear to eliminate a second harmonic of the 3180KHz IF. This sometimes affects 28mc when the rig is driven hard...YAESU working hard in tracing down these problems and coming up with some quick cures for mysterious signals heard on the bands. Some gear have turned up with signals 250 to 500Khz from the desired frequency, often on the opposite side-band but in the c.w. mode as well. It does pay to check well on each side if you have any doubts.

K4MZU is mailing out the QSLs for LU1ZC operation on South Shetlands in January. LU1ZC, Alberto Hernandez, was the operator and the QSL is a landscape photo of Deception Island.

W2FXA is current with the QSLs for 9H3C and promises 24 hour service on any incoming ones. EA9EJ will be departing in a few weeks for a four month tour on a fishing boat. It seems that the APO address for KP4DJI is incorrect...that's O9831....the Post Office returns it saying there is no such APO. And while speaking of the Post Office, a recent Postal Bulletin advised that you get 15¢ in stamps even though your letter may only be going to Mexico or Canada where 8¢ is the 1st class rate.

VK9XX on Christmas Island was on last Friday....14217kc at 1500Z. The advice was passed that the Radio Club on the island meets on Mondays and the club station is usually active during the meeting. Listen from 1500Z...or maybe a bit earlier. W8GKR is trying to get some activity out of TNSBK for the French Community Net but says that Bernard is hard pressed for operating time with his medical duties at the clinic there in Brazzaville. TR8DG lost his rig and needs a pair of 6HF5 tubes to put him back in business. The 6th Annual California QSO Party last year brought entries from the Azores, Japan, Brazil and Mexico. Always someone looking for the elusive 6s. Not VS6DR...he is looking for the elusive North Dakotans. He needs one for WAS. Anyone sighting an abominable dakotan, snap a photo quick. Phil will not believe they exist.

Our social reporter says that Darleen is planning a marriage soon and will live in Ecuador where she hopes to acquire a 'HC' call. The new 3D2-prefix in the Fijis causes some questions but its for real...

ZK2AU was on 21024kc last Wednesday...this time he said to QSL to W6MYR. It would seem that any rare call suddenly surfacing in the Pacific area should be treated with some question. This cat is consistent with rare calls....consistently on c.w.... consistent on a beam head of around 300° from the states...consisten in being evasive when questioned but is always in there. Work them first and worry later. SV1CH on 14022kc/0000Z March 23rd is on Lesbos in the Dodecanese Islands...as is SV0NU who is on Rhodes. UW3EH often at the low end of twenty running interference and a list for UG6JJ who is not especially strong. Watch from 0130Z onwards...twenty SSB. Anyone with QSL information on YB/AE, 3A/0FN and VR4EZ...W8COG needs the word. WB6UDC needs information on the W0KON/? that was on in the contest. C21AA was at 21287kc at 2000Z Saturday working by districts.

W7GOC will bring YA2ZL up around 14235kc mornings when he can...sometime after 1500Z. 9M2WM still looking for the elusive 6s and the California Award.

VP8ME has been absent the last couple of weeks. Seems that the supply ship showed up in the harbor and everyone is busy unloading and stacking the supplies. It is Fall there in the South Orkneys with winter just around the corner. Last Saturday around 0400Z there was UF50B at 14018kc, UF50C at 14022kc and UF50A at 14025kc. A good possibility for some of those broad signal transmitters to get all three with one call. The African Net has moved to 21360kc/1800Z most days. Recent check-ins were 9X5VA, EA6BJ, A2CAB, ZS4FW, 5H3MM. Try it....you may like it.

4 April 1972

CALENDAR

SAN FELIX W9IGW and K9KNW due to open this Saturday for four or five days.
WALLIS FW0AB due to operate until April 4th...then Karl will return to New Caledonia for a week.
NAVASSA KC4DX due to open May 12th.
CRETE Late April for a week by SV0WOO & Co. signing SV0WXX.
UD50 Azerbaijan due to open this Wednesday, April 5th in the USSR 50th Anniversary round-robin. UP50 next week.
BRASILIA TEST April 29-30th
HELVETIA 22 April 15-16th
PACC DX TEST April 29-30th
DOMINICA/ST VINCENT VP2SN April 10-17th. This is an operation by VE3EWY.

ARABIAN KNIGHTS NET 7Z3AB passed along information on the revised schedule for the Arabian Knights Net and effective April 1st this will be the schedule:

Monday 1900Z at 14290kc Thursday 1500Z at 21355kc
Friday 9730Z at 14190kc

The requirements for the Arabian Knights Certificate have been changed, the changes being made retroactive to January 1, 1971...that's a year ago if you read it fast. The requirements are that you work 10 Arab countries including a contact with JY1, JY1/B or JY2. Applications go to JY1 with the QSLs and 10 IRCs and it is a very attractive award. Some of the difficult East African or Middle East countries show up on these Arabian Knight sessions so if you thirst for a rare one, try the Net.

SILENT KEY Reggie Pitman, VP9AX, Wireless Inspector there in Bermuda died a week or so ago and was buried on Sunday, March 26th.

SHORTLY NOTED Dick Miller, K3JXO, is presently at the U.S. Embassy at Rangoon and passes on to the local and presently QRTed amateurs any magazines or amateur publications sent to him. His address is Richard G Miller, American Embassy-RANGOON, c/o Dept. of State, Washington, D.C. 20521. He will be in Rangoon until November and his next possible assignment may be Kathmandu.

Tony Kathro who has been showing up with the XU1AA action in recent weeks, can be reached at: Anthony Kathro, c/o U.S. Embassy DAO, BOX P, APO San Francisco 96346. Last Sunday Tony was going to try 28600kc at 0200Z to see if he would get through. His Saturday operations around 1500Z were being m.c.ed by HS2AGP.

K6JGS is headed for Chile on Assignment for the State Department and may meet up with the CE0 group. K6KA will be headed for the Middle East in May and plans to visit SU1IM. Bill is presently trying to line up some tubes for SU1MA's CYGNET and needs some 12BA6s, 12BE6s, 12AX7s, 12BZ6s, 6LQ6/6JE6, 6GK6, 6JH8, 6FG6s. If anyone has spares to contribute, Bill will hand-carry them on his trip in May.

RUMORS.... Some of these are a bit hard to believe but having found skepticism in the past to be a delusion and what seemed unbelievable turned out to be the real true-blue, we will pass them on. However, in passing them on some that looked solid turned out to be hollow and some that had all the signs of authenticity turned out to be false. So take them as they come.

CLIPPERTON It was reported on the Pandoras Box Net last week that a 'friend' of OA4AS plans to open from Clipperton April 15th. After working members of the Pandoras Box Net (No W/Ks eligible) he will QSY and work others.

BOUVET 3YØYY supposed to be active on twenty c.w....QSL via FB8YY.

SOUTH SANDWICH LU5DL on the South Sandwich group supposed to show up on the Pacific DX Net. This is a definite zero as Enrique last Thursday was trying to get squared away for Bahia Anegada and had no present prospects for the South Sandwich group.

CHINA Some one in SEASIA reported as having a BY-license and will operate shortly. This is another one hard to believe. There may be some BY operation this year but it may have a surprising twist if it does surface. However, do not become discouraged.....work them first and worry later.

TNX to W1AM, K2BT, W2FXA, WB2YQH, K2LGJ, W4BA, W4EH, K4FRY, W4GTS, W4HU, W4KA, W4PUD, W4TUC, W4UF, W5ALA, WA5ZNY, W6AM, W6APW, K6AQV, W6BJI, W6CAE, W6DZK, K6GAK, WA6JVD, K6KA, W6KYA, K6LAE, K6MHD, W6MI, W6OL, W6PNO, K6POC, K6SX, W6TSQ, W6TTS, K6TXR, WB6UDC, K6UFT, WB6UJO, K6UJS, W6VQD, WB6WHM, W6YUS, W7PFZ, W7YTN, K7ZHS, W9DDL, K9KNW, WØJRN, WAØPVW, WØYDB, KA2AI, KV4AM, K3BHL/CP1, VS6DR,

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of the more consistent local QRPers was hilarious last week-end after hearing one of the low-total worked group trying to work AP1RIL. He spent a good deal of time in an effort to spread the good cheer. "How about that?", he chortled, "There he was in there calling AP1RIL for over an hour without tumbling. Isn't that a heck of a good joke?". The Old Timer listened patiently for a bit to this tale of glee and finally said: "Yes, it sure is funny. About as humorous as the time last Spring when you worked Franz Josef Land...UFØOL was the callsign, wasn't it?". Son of a Gun, send not for whom the bells toll. They toll for you. And for a toll of \$9.00 a year we will keep you posted on DX's Peyton Place...\$10.50 brings it airmail....
