October 2, 1973 40-73

FARQUHAR It seems the planning on this one has not quite jelled though it is still apparently on and the group aiming for the middle of October. Among the calls being mentioned are VQ9BP, VQ9M, VQ9R and VQ9B. Some have mentioned that the weather in that area starts to deteriorate in November, this adding to the possibility that any activity will be this month.

JUAN FERNANDEZ K5QHS, San Hutson, is ready to go again with the Juan Fernandez-CEZ effort and plans to depart on October 16th. If all goes well this time he should open from Juan Fernandez around October 20-21st. With all the stopping and starting and delays, K5QHS is starting to feel the need for some support. More details will be available on this next week and at this time it seems ready to go.

SINT MAARTEN/St. MARTIN John Irwin, K6SE/Z, and Kenneth Palmer, K2FJ, will be operating from Sint Maarten-PJ7 and St. Martin-FS7 during the period October 23-28th....working everything that is open including 160meters.

The calls to be signed by K6SE will be FG/AFA/FS7 and PJ8SE/PJ7. K2FT will be signing PJ8DX/PJ7.

The plan is to operate most of the time on the same frequency, giving out the two countries sequentially for each contact.

Now someone is sure to ask how they can do this. They do it the same way that a few others do it....somewhat along the lines of KB6/VR1. Work them first and worry later.

SOUTH SHETLANDS It does seem that Albert Hernandez, WA4CDM/LU1ZC, will be on Deception Island again sometime in the coming months and there is a good possibility that the South Shetlands will be made available for a short period. The last action by LU1ZC was around the turn of the year when he was there for a brief period. Albert is with the Antarctic Survey and at that time was aboard the 'HIRO'. Some indicators are that CE9AQ and CE9AR may also be on the island and there is also the report that UA1KAE/7 is on King George Island in the South Shetland group.

LORD HOWE The operation aimed at early November is firming up and seems rather well set for the period November 2-12th with VK4AH/LH being the call-sign to be used. The gear will include a linear with an outboard VFO and split frequencies will be possible.

The operation will cover 80mtrs through 15mtrs with twenty the main spot for action. Both CW and SSB will be used. The activity will scan the area above 14275kc for the General Class.

QSLs will go to VK4AK

NEW ARRL CONTEST The ARRL Contest Advisory Committee has recommended a new world-wide contest for 10 meters and the test will be for a 36 hour period commencing at 1200Z on December 15th and running to 2359Z on December 16th. The full details on this action will be in the November QST.

2 October 1973

SPECIAL CALLS Two variants popped up recently one being KX1MUM from the Bristol Mum Festival. The prefix looks strange but the QSL information was to send the cards to Box MUM, Bristol, Connecticut 06010.

Another one was WD5FWA which was used to commemorate the opening of the new Dallas-Ft. Worth Airport. This one QSLs to W5EJ.

With the change in the DXCC status of the two Germanys, DM8THI has been heard a number of times, last Saturday was calling for the elusive sixes and sevens at 21327kc around 1600Z. This one QSLs to Box 9, Ilmenau or via the bureau. This is another special prefix.

10 METERS With the ARRL Test showing in mid-December and an occasional ten meter report showing in Red Eyed Louie, it may be interesting to note the effort of G3RFG to find some life in a supposedly dead band. G3RFG in September concentrated exclusively on ten meters, sending out 'CQs' at 28040kc and 28182.5kc at various intervals during the day. The first half of the month produced some of the following:

Sept 2nd	W1EVT working PY1HQ	28042/2030Z	G3RFG called but no reply
	W9DD working YV5AIZ	28041/2045Z	" " " " "
	PY1HQ de G3RFG	28040/2055Z	His 579-----G3RFG 599
3rd	EA2JP de G3RFG	28040/1650Z	579 579
6th	UP2PBI de G3RFG	28011/1739Z	569 559
	SM5DKJ de G3RFG	28040/1744Z	579 559
	UP2PAP de G3RFG	28060/1925Z	579 599
7th	PY1MB de G3RFG	28030/1819Z	579 569
	LU3DSI de G3RFG	28045/1829Z	439 569
15th	W1?? working PY1MCC	28042/1917Z	Called but no reply
17th	HB9LO working 9H1HC	28047/1740Z	
	9H1HC de G3RFG	28047/1744Z	579 559

G3RFG would like more W/Ks. would turn their beams to Europe and listen intermittently while operating on ten meters. Stan believes that QSOs on ten meters would be more often than expected if a studied effort was made to listen on something other than the North/South paths during the back curve of the sunspot cycle.

SHORTLY NOTED W1JFL has the logs for A51PN for the period of 12 August 73 to 6 Sept 73.

Mike is sending out cards for these days and he is asking for the back logs into 1972 so that he can handle all requests. The full address is Mike Samarco, 79 Plymouth Road, Bellingham, Mass. 02019....sase or sae/IRCs.

Speaking of IRCs, W3RX has several hundred which will go at the black market price of 20/\$3.00 if a sase envelope attached. This may not last long as Elmer Klassen is looking at the postage rates. Buy early....one IRC always good for 1 first-class rate no matter what you paid for the IRC.

W2PN turned up the QTH for 'Slim'. JX5CI on Jan Mayen is Ivar 'Slim' Nygaard. How about that? Slim lives!! A51PN will be QRT until October 15th.

4W1BC will be QRT in early December....but until then is often QRT on 40/80 on request to help with 5BDXCC. On Sept 21st Geoff was at 21031kc/1800Z working both coasts.

VQ9M will be there until January.....QSLs to Box 191, Mahe.

SVØWY would like to get on c.w. but needs the tech manuals. The present trustee was instructed only in SSB and they have no references on how to get on c.w. Anyone who might want to hear some c.w....or would like to help....can send the information to Robert A Rude, Box 33, B602, EPO New York 09540. SVØWY is a MARS Station and is equipped with Collins S-Line gear.

SY5MA showed on forty c.w. last week. Really not the one we were looking for and undoubtedly Pelagius Slim. FPØSS QSLs to WA2CXP. HZ1TA often showing around 14252kc from 2000Z. Those KH6EDY QSLs for the CQ contest of last October are still somewhat elusive. Seems like it was a committee operation and like most committees, things were tossed in the air to the general cry of 'Catch!'. No one seems to be catching. If you thirst for Kure, look for KH6HDE whose QSLs for Kure come swiftly from WA3HUP. WAØETC will have TA1TS logs soon. KA2BL plans to operate from Marcus in the CQ Test. F6CLZ/FC to the F-Bureau. need QSL information for VQ9D and HS3AJJ..
