March 26, 1974

13-74

ANGUILLA Ken Palmer, K2FJ, will be in the Caribbean for the next month and will operate from Anguilla during the WPX Test. The call sign was not known last week but Ken hopes that it may be VP2EDX. All bands will be operated, ten through one-sixty, and he will operate both c.w. and SSB while there on Anguilla. The frequencies will be:

C.W 7020kc 7030kc 14010kc 14030kc 21030kc

SSB 3790kc 3810kc 7173kc 14215kc 14280kc 21295kc 21355kc 28580kc

160 Transmit 1827kc...listen 1824kc

Word relayed from WB2ZMK who handles some Anguilla QSLing chores indicates that there is no station currently active on Anguilla and that there are problems at times in getting QSLs for some of the stations which have operated there in the last couple of years. This operation of K2FJ may be the chance to get what has been one of the harder VP2s for many years.

After Anguilla the action will move to Eustatius where PJ8DX will be signed from April 8th thru 12th. QSLs for all of these operations go to the CBA of K2FJ.

LORD HOWE There is a fragmentary report that VK2BKX will be operating from Lord Howe Island during the current week and possibly in the WPX Test. The only definite information is that the station may show on the YL-SSB VK/ZL session on Friday evening... or early Saturday depending on whether you use UCT or DST. Anyhow, this YL-SSB System meets at 14333kc and is a controlled system. Most everyone is welcomed if they follow the rules.

SAUDI ARABIA HZ1AB says he will be in the area of 21290kc--21310kc territory on most Thursdays and Fridays from 1200-1330Z and looking for stateside stations.

CAPE VERDE In the coming WPX Test this week-end, CR4BC will be a multi-operator effort with CR4BS and CR4BC jumping in to run up the totals.

Mt. ATHOS No definite information on this but Martin will be in Athens towards this last week of March, probably on business purposes for KOMDEL which imports electronic equipment and components into Finland. The previous indicators were that any effort for SY-Mt. Athos would be a number of weeks off at this time.

CLIPPERTON Little new in this area except for some rumors about one operator headed that way in a yacht and hoping that permission will arrive while at sea. This has persisted in recent weeks but some previous hopes have been dashed when a valid landing permit turned out to be somewhat illusionary. Some say that a watch around 7170kc/0130Z might give more insight on this one. This seems a long range hope but it has not been the first time that the unexpected and unexpected leaped out of obscurity. Be Prepared.....for anything!!

ANDAMAN More Andaman stations are expected with a local club organized there. Radio Amateurs of Andaman/Nicobar Islands (RAANI) and VU2ANI and VU7GV are the officers. Possibly up to ten or more amateurs...or SWLs. VU2FBZ QSLs handled by K6TWT.

SUNSPOT LOUIE The spot shown on the previous chart disappeared to the back of the Sun about March 15th. For some days there was no significant activity and WWV was reporting U5 and N6. On March 19th the observation showed one sunspot, about 12,000 miles in diameter and it probably first showed on March 18th. It should last for about a week, if it survives that long, and conditions should improve while it is still there on the sun.

Band conditions have been not been especially good but there have been occasional and brief openings. Watch the chart for spots that start showing in higher latitudes on the sun and those will signal a return to the days when the skip will be long on twenty and short on seventy-five. The axis runs roughly from 4:00 o'clock to 10:00 o'clock...and most of the spots that have been seen in the last year or so have been rather close to this line..

W8ZOK

TROPO SEASON The end of March is the start of the Tropo season and this usually is good until sometime in August. KH6BZF is ready to supply the KH6-end for any 432/220mhz tests and Lee is looking for some success this year. Last year there were some successful one-way communications but this is the year for two-way according to the Tarot cards, Lee says.

Anyone interested in some serious tropo-work should contact KH6BZF. Usual schedule is to start at 0400Z to 0415Z on 432.000mhz with liaison on 14225kc. After this they start at 0415Z for fifteen minutes effort on 222.000mhz. KH6BZF would like to hear from any serious West Coast tropo-streakers.

SHORTLY NOTED The FCC has informally indicated that a limited number of temporary authorizations for special calls will be issued for use during the World Telecommunication Week starting May 11th and running to the 19th. KD4ITU issued to Stu Meyer is an example. Write a letter to the FCC...

Roy Albright, W5EYB, has asked to be relieved as liaison with the VHF Repeater Advisory Group and has been replaced by Vice-president Carl Smith, W0BWJ. The added duties of serving on the Executive Committee and as Chairman of the International Affairs Committee led W5EYB to ask for relief.

There is also some indications that the DX Advisory Committee is getting more than a bit of attention with DXers in several call areas demanding more attention to what the DXers want and less inclination to follow personal inclinations or bias. If you have a row to hoe, hoe it with President Dannals....he needs your sagacious advice. This has been another week of interruptions....Thursday into the Big Town to grapple with the bureaucrats, that evening to a dinner....Friday to a luncheon where the Postmaster General blasted the subsidization of magazines. Sure ruins our sleep and DX periods.

Something has not been ringing right for us and we finally figured out that we were checking the March QST for 1973 rather than March 1974. They sure looked the same but we found...finally...in Minute 30 that the ARRL did vote affirmatively to issue DXCC pins with the holders current country status. Sure took a lot of reading to find out that the year had changed.

What got us started researching was a motion in the '1973' meeting to seek ways to "...encourage the ARRL staff in its efforts to reduce areas of delay within the Postal Service...for late deliveries of QST". Then March/74 QST was mailed a couple of weeks late. As we said to Ted Klassen over the Chicken Kiev....."Son of a Gun!!".

Some trying to break French operators on those islands in the Indian Ocean wonder if the government policy also extends to amateur operations...nothing makes them hear. There was a 3B9AC from Rodriguez(?) last week but back in the Seychelles there is much doubt expressed about this one. Some have wondered if that M1DX may not have the same fist, signal and m.o. as good old JX1AX/Franz Josef. Slim, you are a good c.w. operator but the QSLing is terrible.

Those looking for Caribbean action might check around 3809kc from 0200Z or 7160kc from 1100Z. The Caribbean Net in action. ZF1BR QSLs go to W4KA for the action there a month back. SV0WMM showing regularly from Crete. W5QBM has returned to Texas to wait for things in Grenada to cool a bit...Joe is located at Sanfield, Texas.

26 March

REPORTS FROM RED EYED LOUIE

The silence that is in the starry sky,
The sleep that is among the lonely hills....

FORMOSA BV2A made a brief appearance in mid-March. Was working in his usual area around 14022kc and checking off some Europeans. F8..came into to call "CQ Zone 24" and was answered by a FG7.. Then all Europe jumped in.....and there never was a decision on whether they were looking for Zone 24 or the BV2... This is the only BV2-Formosa station active at this time and intermittently active in the 14022kc area. Was there at 1230Z on March 15th.

COCOS KEELING A VK6 reports that an Australian amateur may be going there to work on a big commercial radio installation. Something may be developing in this area...and there has not been to much doing there since Don Miller got stuck there in October 1967
