## Bulletin

\*\*\* \*\* May 14, 1974 20-74

Mt. ATHOS Word from Martin, OH2BH, during this last weekend indicated that the planned Mt. Athos operation has been put back to the first week in July and that this is a rather definite date.

The present plans call for OH2BH--Martin, OH2MM-Villi and SV1GA-Aris, to be in on effort along with another possible one from a Ministry there in Athens. The indicators are that the trip was postponed to assure that the man from the Ministry was along so that matters could be facilitated at Mt. Athos.

More should be surfacing on this in the coming months. But as for now, the plans are for early July.

FORMOSA The Minister of Communications on Taiwan has issued a permit for the installation of one (1) 100-watt single sideband transmitter and has assigned the station the frequency of 14218kc.

The actual operation on the air will follow the inspection of the station by the Garrison Command and the regular submission of logs for review. In addition to the 14218kc SSB frequency, the station is also authorized to operate at 14025kc on CW. This permit was issued on April 18th and BV2A should be on the air any time now. It is expected that a beam will be added to the station in the coming month. QSLs for this activity will be handled by INDXA.

ZAIRE There have been a number of 9Q5 reports in the last couple of months, some of these obviously bootlegging someone else's call. There has been no legal activity from 9Q5-land for a number of years. However, some of the QSOs with 9Q5 stations in recent weeks have brought the advice that they expect any restrictions to be lifted in a matter of weeks. Some of the stations cheerfully admit that they have no license to operate but they are in there anyhow. There could be something developing as the stations on the air apparently do not exhibit any apprehension over possible action against them.

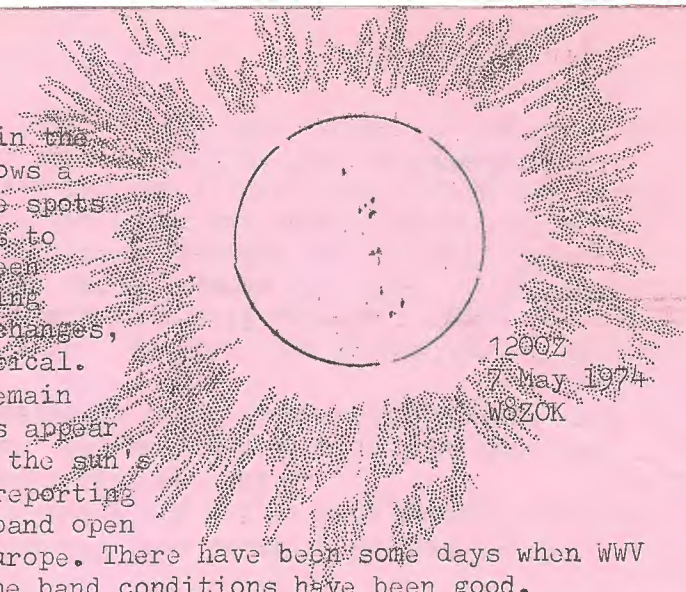

CHRISTMAS ISLAND VR1AA is due to open from VR3-Christmas Island about May 16th and will operate for five days. Plans are to operate on all bands but with some emphasis on 40/80mtrs. However, the action will follow those bands that are open and they will be working everything. QSL to INDXA

KINGMAN/PALMYRA Planning for any activity in the KP6 area seems to be part of the Triple Crown effort with a couple of groups working out but keeping things under wraps so that the other side does not know what they are doing. Reading the carefully phrased code-words, look for some activity in June from the Kingman Reef area. However, do not be surprised if there is something before this time.

The scenario goes something like this. One group gets the idea of a Kingman/Palmyra effort and their research indicates that the DXCC Desk will approve Kingman for a new country. As soon as this is announced another group figures that this is a chance for some claim-jumping and starts some surreptitious planning to get there first. All the secret planning is discussed over the air which includes a great many more in on the planning. Look for activity in June....but the zigging and zagging may bring some group on the air early. Naturally, all this is confidential information and should not be divulged to any other amateur DXer....that way you may be the first to work them...

## SUNSPOT LOUIE ...

There has been considerable sunspot activity in the last couple of weeks and this week's chart shows a bit of what has been going on. There are nine spots shown and their diameter range from 6000 miles to 10,000 miles in diameter. These spots have been changing rapidly since May 1st, four spots being visible at that time. With these continuous changes, there are no two days when the spots are identical. It is also somewhat unusual that they would remain in such a straight line. Usually the sunspots appear over a range of about 15 degrees each side of the sun's equator. DX activity has been good with WWV reporting N7 and N6 last Saturday and the twenty meter band open just about all night from the West Coast to Europe. There have been some days when WWV reported unsettled conditions but generally the band conditions have been good. The February report on Sunspots show a mean count of 27.7 with a top of 50 on Feb 13th. The sunspot count exceeded 40 most days in the period February 12th to 22nd.

INDXA Bud Kellam, K3RLY, reports that most of the problems that had INDXA inactive for the last year have been cleared away and INDXA is back and jumping around again. At the present time K3RLY is getting things organized at the new QTH and has been working on a mailing....these have gone out to the 7/8/9/0 and part of the 1-call areas and the other areas will be covered soon.

K3RLY promises that there will be some good activities by INDXA in the coming months and notes that they are handling the QSLs for BV2A, VR1AA/VR3 on Christmas Island and for YK1AA, INDXA now in possession of the logs for YK1AA for 1972, 1973 and 1974 up to a recent date.

YASME The Danny Weil group of a few years back, later activated by Lloyd and Iris Colvin, showed activity again during the ITU week. The YASME Foundation put WW6ITU and KE6ITU on the air with the special calls and QSLs for these two can be sent to:

YASME Foundation, Box 2025, Castro Valley, Calif. 94546.

There are indicators that YASME will be active in other efforts in the future. For other ITU calls you can try QSLs as follows: KW9ITU/K9WEH; KY5ITU/WB5BFZ; WD6ITU/WA6FIT/WZ6ITU/W6SC. Undoubtedly there are more floating around and it probably will be some time to nail all of them down. This may be a bit difficult in some instances as the early action showed one ITU call issued to two different stations. Son of a Gun!!!

SHORTLY NOTED We are mailing a day late this week. Last week's bulletin was mailed a daily early so do not beat your mailman. The whole WCDXB staff took off Saturday for the Arizona and Utah country. On the return Friday it took two hours alone to sort out the mail. By next week we should be back on schedule.

We were so rushed a week back that we forgot to note that we are not into the seventh year of continuous weekly publication. Well over 300 weeks of DX bulletins....

A bit further on we mention that Don Reibhoff needs a Collins Manual for a 62S-1 VHF Adaptor. If you can help it goes to Don, American Embassy Box P TCU, APO S.F. 96346. And we also turned up some more ITU calls....KK4ITU to W4WST/KQ2ITU to LIDXA, Box 73, Coram N.Y. 11727 and KX5ITU to W5SBX.

An XF1A showed on twenty SSB last week. This one does not seem to ring just right. The TU in the photo in the May QST looks like TU2CX and not TU2CS. He is now back in Virginia and QSLs can be sent to W4SUS. JX2FL and JX6DS are different operators at the same station on Jan Mayen. Weekends are times for especial activity though they can be often found on other days. 3D6AZ is ex 3B8CA and can be found in Swaziland most days from 1600Z in the 21355kc area. QSLs to Box 626, Manzini, Swaziland and you might include a note to encourage his XYL who handles the chores.

Down in San Antonio they are forming a DX Club...The Alamo DX Amigos. W5LPO and W5BE are a couple of the main organizers. Danny Weil, who now lives in San Antonio, will be an honorary member. Listen for the Southern California DX Club information broadcasts at 14220kc/0300Z Thursdays. Next week we clean up but we are out of space again this week.

14 May 1974

CALENDAR

MT ATHOS	Now set for first week in July. Rather firm....
KINGMAN/PALMYRA	Mid-June current target for one group....
LORD HOWE	VE8RA planning...but dates not set as yet. More soon.
MARKET REEF	OH3SA and OH1VR from OJØ-Market Reef from May 27th...
CHRISTMAS ISLAND	VR1AA operating from VR3-Christmas from May 16th...
ARMED FORCES DAY	May 18th...work some unusual ones.
FORMOSA	BV2A on SSB soon
MALI	TZ2A returning in July for one year tour of duty.
CHRISTMAS ISLAND	VK9AA back for one year tour....

**NEEDED!!** XU1DX is hungering for a manual for the Collins 62S-1 VHF Adapter. Don has written to Collins and they say the manual is no longer in print. Don has the rig but not the bible and he seeks guidance. Any help would be greatly appreciated. Back before the 1S1A effort, Scotty broke his foot jumping a wall enroute to the village bar. Fifteen months later Don did a repeat....broke his foot jumping the same wall!!!
