WEST COAST DX

MALDIVES The YANKEE TRADER will be in the Maldives a month from now and W6Y0, Jules Wenglare, figures to get in some operating time there if everything falls into line.

August 16, 1977

33-77

The sailing schooner on a around-the-world passage was due to arrive in Sri Lanka this last Friday and W6YO was looking to see what the prospects were for some operating time from 4S7. There should be more information coming on the Maldives possibilities.

Looking ahead a couple of months, the YANKEE TRADER will be off Africa in another couple of months and will be in the Comoro group. Jules is looking for some possibilities at that stop though it is not yet certain whether the stop will be in the C6-Comoros or FH8-Mayotte. This decision awaits more information on harbor facilities, the skipper of the sailing vessel will make the decision somewhere along the way.

SEASIA With the team of Ted and Meredith Henry passing through the Philippines and headed for the Malaysia, there is other activity coming and EA4DO will be in the area from now until the end of the month. In fact Isidoro is in the area right now and will be stopping in Sri Laaka/Singapore/Indonesia and Thailand. He advised that he would be looking to operate at some of the stops.

The time for the SEAsia Net Convention is drawing near. HS1WR is often on the air to warm things up for the traveling DXer headed towards Bangkok. In November, this one should really delight the visiting DXers.

GABON TR8ECM was being heard around 14220kc/0300Z a week or so back. This is also F6ECM and QSLs go to

Box 3999 Libreville Gabon Republic

FRANZ JOSEF We got some late word on UW3HY that K50SC picked up from UK9AAN. Valery has been to Franz Josef and has returned....and no operation there. Seems that when he got there at the Arctic outpost, there was no gear available for amateur operations. Valery may go back again in September but on the next trip he will be planning to take his own gear.

Back in the Calendar country you may note that the advice is to keep watching. You can stop. We ran that page first so the addressing department could get organized and no sconer finished the press run when we got this information.

As long as we are working on the Russian Desk, the word is that UK5MAF will be getting married soon and may end up as UA1ZAX.

SUMSPOT LOUIE There is less in the number of active areas to note on this weeks chart but the single active area noted on the day of observation was a mighty one indeed!

#861 showed on August 3rd, one spot and forty millionths. Two days later it had 14 spots and 310/millionths. The day of this observation it had shown up with more spots but was covering a bit less in area. Things were being reported by WWV as slightly disturbed.

Picking up the numbers, No. 859 was a low latitude area in the southern hemisphere, one spot and hardly any coverage, it came on August 3rd, it was gone the next day. • (861) 9 Aug 77

> #861 39 spots 260 millionths

No. 860 showed on the third, lasted to the following day and then was some by August 5th. On the fourth this area showed 3 spots and 10 milliontha

No. 861 was at 23°N and 66°E the day of this chart. The low solar activity so far in the cycle continues to draw the attention of those who make a study of the solar activity and often the activity that does show appears to be remnants of Cycle 20. The monthly mean for July came to about 20 which will not boost the 12-month running smoothed sunspot number any great amount. With the July figure in and the 12-month figure centered on January, the January figure came out to 16 which would indicate that Cycle 21 is hardly zooming in any direction

So, what can we do about it? As any patient and deserving DXer will tell you, you smile on the good days, grit your teeth on the bad days and in between you do a quick shuffle or two and wonder if a refresher course with the Palos Verdes Sundancers might help you on the local scene.

And from the south bank of the Potomac where NLXX is always griting his teeth and working on the South Shore Shuffle, Ted works the dance theme into his report and it comes through like this.....

August	16th	Below Normal		Aug	22nd	High Normal
	17th	Low Normal			23rd	High Normal
	18th	Low Normal			24th	Highgoing to Dis-
	19th	Lowgoing	to High			turbed. (Who did not dance?)
	20th	High Normal			25th	Disturbed
	21st	High Normal			26th	Below Normal
		a marine i a str			27th	Low with periods of High
					28th	High Normal

There it is! Plan your vacation in the dog days of summer and next week we will bring the game plan from Ted for the Labor Day weekend. As Lord Baden-Powell would often say there on the Northwest Frontier: "Be Prepared!"

And K6EC is prepared! And up from the south comes the WWV report for the chartmakers and the zigs and zags of the Ap Index are something to note in recent weeks....and Ev says they were:

	Solar Flux	Ap Index		Solar Flux	Ap Index
Aug 1	82	6	Aug 5	84	26
2	80	6	6	86	22
3	80	5	7	85	19
4	81	10			

Note every flux above eighty

WEST COAST DX BULLETIN Second class entry and postage paid at San Rafael, Calif. Published every week by the Marin County DX Group at 77 Coleman Drive, San Rafael, California 94901.

\$18.00 per year by first class mail in the U.S./VE areas. \$14.00 per year by second & class mail in the U.S.

\$20.00 per year for airmail service to Mexico and all the far DX lands down the edge of the night and beyond tomorrow. All of them!

Last week we mentioned that we had the report of the DXAC to the Board of Directors and we intended to run it this issue even though it took nine pages. After studying it a bit, we figured we could get in into a bit smaller space if it were retyped from double-space to single space. Here it comes....not in the original form but with every original word that was in the original.

Louis A. Muhlemen, dr., KSFUA

The Board of Directors The American Radio Relay League, Inc. Gay Milius, WhUG, Liaison 225 Main Street Newington, Connecticut 06111

Subject: 1977 Semiannual Activities Report of the DX Advisory Committee

Gentlemen:

In pursuance of our advisory committee function, the DXAC so far in 1977 has considered the following:

1. Should special consideration be given to the Pelagic Islands for country status?

The Pelagic Islands consist of the islands of Lampedua, Pampione and Linosa. They are geographically located in the Mediterranean Sea near the African Continent, and are the southernmost Italian territory. The Pelagic Islands meet none of the present ARRL Countries List Criteria.

This was pointed out in the original request from the president of the Associazion Radiotecnica Italiana. Nevertheless, an exception to the rules was hoped for by the president of that society, and at the same time he noted that recently the ARRL had granted to another IARU society, the JARL, a similar request in the matter of Okino Tori-shima. The reason given for this request for special consideration was to help remind all amateurs in the world of the Golden Anniversary of the ARI in January 1977. A recommendation that the Pelagic Islands not be given special consideration for country status was sent to the Communications Manager January 25, 1977.

2. <u>Should any countries that do not meet Rule 4 of the ARRL Countries List Criteria be deleted effective</u> January 1, 1977?

Rule 4 states: "Unadministered Area: Any area which is unadministered will not be eligible for consideration as a separate entity." On January 25, 1977 the DXAC recommended to the Communications Manager that any country that does not meet Rule 4 of the Countries List Criteria as of January 1, 1977 should be deleted.

3. Should Geyser Reef, Saudi Arabia-Iraq Neutral Zone and/or Spratly Islands be deleted under the provisions of Rule 4?

Geyser Reef is an unclaimed reef in the Madagascar Channel. The Spratly Islands are located in the South China Sea and are claimed by at least four countries, therefore they are allegedly unadministered since ownership is not clear. It should be pointed out, however, that areas involved in military conflicts have never before been considered for country status or changes therein. The Saudi=Iraq Neutral Zone is said to be unadministered by definition. In addition Saudi Arabia and Iraq have signed but as yet, have not ratified, an agreement to divide the Neutral Zone between them.

4. Does the Transkei meet country criteria by reason of government?

The Transkei is a new nation carved out of a portion of South Africa. Its request for admission to the United Nations was turned down unanimously with the United States abstaining. Recommendations that the Transkei not be granted country status by reason of government was sent to the Communications Manager on March 10, 1977. The DXAC is presently considering the Transkei's country status by reason of "distinctively separate administration".

5. Does the Autonomous Region in Southern Sudan (STØ) qualify for separate country status by reason of government?

The "Autonomous Region", according to Mr. W. R. Rindone, WB7AEK, dame about during negotiations to end the Civil War in Sudan, when a bilateral agreement was reached which declared the three southern provinces of Equatoria, Bahr el Gazl and Upper Nile as having regional autonomy. Later, during final negotiations, a peace treaty, subsequently known as the Addis Accord, was introduced which granted total autonomy with two notable exceptions foreign policy and defense. This has since been modified and all troops in the "Southern Command" are directly under the control of the "Regional Peoples Assembly" which is the governing body of the "Southern Sudan". The Regional Peoples Assemby has its headquarters at Juba, the capitol of the Southern Region as established by the Addis Accord.

(Next page)

DXAC July 1977 Report (cont'd)

(5-Southern Sudan-conclusion)

On March 10. 1977 recommendation that the Autonomous Region in southern Sudan not be added to the countries list by reason of government, was sent to the Communications Manager. The DXAC is presently considering the Autonomous Region's country status by reason of 'distinctly separate administration".

6. Should the Annual DXCC listing in December QST be changed to list credits first by country of origin, then by number of countries, and then alphabetically according to call?

This item failed by a vote of the committee, hence no recommendation was made.

7. Should Rule 9 of the ARRL countries List be changed when applied to 5BDXCC?

You will remember that on October 14, 1976 it was recommended that to the Communications Manager that Rule 9 be made country-wide, however at that time the DXAC specifically excluded any changes in Rule 9 when applied to 5EDXCC. We have now examined this as a separate question and on May 31, 1977, recommended to the Communications Manager that the new country-wide Rule 9 be applied to 5EDXCC also.

8. Should an operator who possessmore than one station location and more than one call issued by the same DXCC country be allowed to submit GSL cards from any or all stations within that DXCC country towards one DXCC?

On April 12, 1977 it was recommended to the Communications Manager that an operator who simultaneously possesses more than one station location and more than one call sign in a DXCC country should be allowed to submit QSLs for contacts from any or all of these stations towards his DXCC from that country.

9. Should deleted countries' QSOs be allowed for 5BDXCC?

This item failed by vote of the committee, nence no recommendation was made.

10. Should the ARRL issue a DXCC for contacts made exclusively via satellite?

On January 25, 1977 it was recommended to the Communications Manager that the ARRL should issue a DXCC for contacts made exclusively via satellite, subject to all the rules for DXCC, except that the award will not be subject to endorsement for additional countries beyond 100.

11. Should the DXCC certificate and/or endorsement stickers be redesigned?

This failed by vote of the committee, hence no recommendation was made.

12. What is the desirability of establishing a new beginning for DXCC, with updated country criteria, as of January 1, 1980?

This item came as a result of the following motion from the September 1976 Executive Committee meeting. "On motion of Mr. Thurston, unanimously VOTED that in light of the numerous suggestions for overhauling the DXCC criteria and award which have been received from the membership over the past several years, and the possible changes in our frequency allocations and/or operating privileges that may result from the forthcoming World Administrative Radio Conference, the Executive Committee requests that the DX Advisory Committee, in cooperation with the Headquarters Awards Committee, explore the desirability of establishing a new beginning for DXCC, with updated country criteria, as of January 1, 1980. A coordinated recommendation would be needed by July 1, 1977, in order to permit action by the Board of Directors at is July meeting"

On June 21, 1977, the DXAC recommended to the Communications Manager that there should NOT be a new beginning for DXCC with updated country criteria as of January 1, 1980. The following rationale was offered Mr. Hart as an aid in preparing his coordinated recommendation to the Board.

Director Thurston stated in his motion before the Executive Committee that it may be desirable to start DXCC over because of "....possible changes in our frequency allocations and/or operation privileges that may result from the forthcoming World Administrative Radio Conference.....", yet there is no evidence that our operating privileges will change significantly, nor is there much hope for any additional HF bands. Furthermore, should we pick up another HF band, it seems that this would in no way affect DXCC, although it may affect 5 band DXCC.

Director Thurston also stated that there has been "....numerous suggestions for overhauling the DXCC criteria and award....over the past several years". With this we cannot argue. However, no one could create a perfect system which would never require change, and any attempt to do so would destroy the very foundations and traditions that have made the DXCC program so popular.

Negative effects of starting over:

- A. The QSL burden would be severe. It would be severe not only on the DX stations and their managers, but also on stateside amateurs, 93.6% (according to the recent DXAC survey) of whom include return postage when QSLing a new country.
- B. The QSL burden would be severe on the QSL bureaus of the world and especially on those bureaus using volunteers, such as our incoming bureaus.
- C. The work load on the DXCC desk would multiply and possibly require additional personnel to keep pace with the additional workload.

2.106

(DXAC July 1977 Report - cont'd)

(12 - Restart of DXCC in 1980 - cont'd)

- D. A major incentive for DX operations would be removed between now and January 1, 1980
- E. Although the DXCC program is very competitive, it is not a contest. Everyone has his own beginning and proceeds at his own rate towards the Honor Roll. This action of necessity would reduce the DXCC award to a contest for the first ten or twenty years.
- F. Many long hours put in listening for a new country would be lost by not only those presently on the Honor Roll but by those who have yet to achieve DXCC. Remember, the 75 countries confirmed by the person running 100 watts to a vertical over the past 15 years are held with as much esteem as are the 330 countries acquired by the Honor Roller during the same period of time.

The DXAC included several questions relevant to starting over in its recent survey. These questions were answered by circling a number from 1 to 5.

1 = Strongly disagree 2 = Disagree 3 = Neutral 4 = Agree 5 = Strongly agree.

Therefore a ranking of 3.000 is neutral, anything lower indicates disagreement and anything over 3.00 approval. The results of those questions follows:

- A. In light of numerous suggestions for overhauling the DXCC country Mean Rank Value criteria and award, and the possible changes in amateur frequency allocations and operating privileges that may result from the forthcoming World Administrative Radio Converence, a new beginning for 2.638 DXCC with updated country criteria should be established Jan 1, 1980
- B. The effect on the ARRL DXCC award program would be enhanced by srarting over every 10 years
- C. DXCC should be de-emphasized by removing to various degrees its creditability and/or tradition. 1.793

In addition the comments received by the DXAC relative to starting over, since Director Thurston put forth this motion, have exceeded 80% against. Finally, the DXAC can find nothing by starting over.

In June of this year the Survey subcommittee submitted its final report. The survey subcommittee was commission in February 1976. Its purpose was to draft, circulate and analyze a survey on DX related matters. The amount of time expended by the members of the Survey subcommittee on this project was considerable. They composed, typed, printed and addressed the survey themselves. The results were then key punched and analysed. Bob Wood's expertise here was invaluable. The results of the survey ware then typed (no small chore itself) and it is presented here for your inspection. Mr. Locher and his committee have done a very commendable job, and I applaud them. The DXAC will be studying the results of the survey closely in the coming months, and undoubtedly recommendations will be forthcoming.

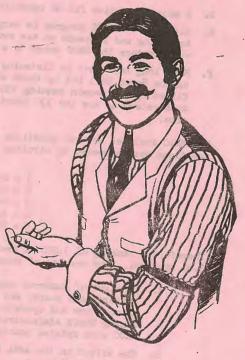

As a result of the decision to add Okino Tori-shima to the ARRL Countries List, I requested, in my last report, that you consider the matter of exceptions particularly as follows - Should the DXAC recommend against an exception, and others act contrary thereto,you, the Board, make the question a part of your agenda and at the next meeting approve or disapprove it. This action would tend to remove the stigma of arbitrariness and the ARRL Countries List would have some protection from compromise. Unfortunately, this request was overlooked. I have an obligation to ask again that you review this matter. It represents a very serious issue in which the membership has considerable interest, and I pray that you will this time accept a resolution to this effect and put it to a vote. If our liaison cannot offer such a motion then I respectfully request that a Director make the motion and that it be discussed and voted upon.

As always, I would like to thank the members of the DXAC, our liaisons, and the headquarters staff who have helped the DXAC function successfully. And thanks to you, the Officers and Directors of the American Radio Relay League Inc., without whose support there would be no DXAC

Respectfully Submitted, 12 July 1977

Louis A. Muhleisen, Jr., K5FVA 1977 Chairman ARRL DX Advisory Committee

SHORTLY NOTED We managed to get the nine pages of the DXAC Report to the Board of Directors down to three pages but it messed up our space assignments. Maybe you noticed that.

Since June we have been getting complaints on the erratic delivery of the newspaper copies and we think we have nailed down the problem. While the Postal Service is involved, the day of mailing seems to have become a critical factor.

If we mail the newspaper edition on Saturday, things seem to generally go okay. The local Post Office hastens them on their way by including them with the other priority mail....like the letter mail...in pouches made up to many of the states. However, with the low volume on Sundays, the 'newspaper' version is sent to the AMF for consolidation with mail from other offices.....and the suspicion is that it is pulled out of the priority mail and dumped in with the junk mail.

Some are going to ask: "Well! Why don't you just mail on Saturdays?" We would like to....if we could get everything together. In recent weeks we have been mailing over 2000 copies of each issue. Remember when at 800 we screamed that we had all we wanted? Remember at 1600 we advised we were being pushed to the wall?

Well, here we are at the 2000 mark and hanging on by our fingernails.

Basically, this is still a one-man operation with some help from the XYL. The Marin County DX Group consists of one person. That one person does everything.

We have asked in the past that the bulletin not be promoted. We do not want any increase in subscriptions. Yet we know that this goes on. The problem with the second-class is symptomatic of the strain we are having with the whole bulletin. Now if you can sell a couple more DXers, you can figure you are possibly hastening the day when we completely come apart.

That's it for this six months. We will try to get the second-class to the Post Office for sure on Saturdays. Maybe if we run into problems, we will hold it off until Mondays on the theory that one day is better than three weeks. However, we think that we will make the Saturday mailings....someway. Hold on!

IH9HLO was on Pantelleria and goes to I2YBC. HC2SL is aiming for a Galapagos operation from September 16-20th and will be aiming for an all band, c.w. and SSB effort. C31IP to F6AJ. PY1ZAE when asked in the last week on thost PY0ZAE QSLs said that they should be going out in a week or so. If you run into him on the air you might check to get the exact date. 5ZLJE is looking for North Dakota most nights....around 14240kc/0430Z.

SV1FT heard on twenty c.w...right at the band edge....is on Crete and a fast QSLer. After 0130Z. WLICL schedules VP2SQ on Saturdays at 1700Z....their business takes about an hour and from 1800Z you might catch Bill around 21300kc.

TFLF was a special event station DXpedition. QSLs should go to Box 1058, Reykjavik, Iceland...with IRC but no envelope required. TFJKX was one of the operators...there were four. OZ5HT has a new two-element Quad up. ALXFV will be on vacation about now but will return to Oman after Septembe 1st. Wolfgang says that the local post office does not recognize IRCs and he thus would prefer to see mint Oman stamps on the QSL requests. Otherwise, it is via the bureaus. That CG1CR was a Girl Guides encampment. On the WARC 79 preparations, an Ad Hoc group has been formed in the U.S. Consulative Committee International du Radio at the August 3rd meeting in Washington....this ad hoc group being formed for the Amataur Service needs and will advise the FCC, the State Department and others on the upcoming international meet....

We've run out of space but not news.....next week we will deluge you with short stuff.....

CALENDAR

SHORT NOTES for a short space WB5UQH, a 17 year old YL Extra Class type. is headed for Brazil this week where she will sign PY4 until the end of the month. Look for her on the higher bands....SSB and CW.

The Henry's, W6U0U and W6WNE, will be heading for the Philippines and then stops at Hong Kong and places in Malaysia. Keep tab on these two. Somewhere along the way they may come up with a surprise.

A Silent Key in July was OH2SF, Lars Ravander. A pilot with FINNAIR, Lars brought the first Douglas jet from the U.S. to Finland. He was also often instrumental in making the plans for DXpeditions by the OH-DX group.

be ready for the

next HRO Dxpedition

Representative Charles Vanik of Ohio has introduced HR-8496 which would give the FCC authority to set reasonable standards of susceptibility to RFI for consumer electronic devices. This measure joins two other RFI bills previously introduced, S-864 by Senator Barry Goldwater, and HR-8079 introduced earlier in this Congress by Congressman Benjamin.

The only way these measures will move even one inch towards enactment will be if DXers take to their pens and write.... RFI Legislation is strictly a do-ityourself proposition and in this case only some consistent effort in letter writing will have any effect at all

- WEST COAST DX BULLETIN Published every week by the Marin County DX Group. That QRPer with the lucid explanation of the Mysteries of the Ages was back last week. We did not invite him, he just came. "Look here," this QRPer said, "what's all this talk about some not understanding the meaning of 'DX Is'?Where is the misunderstanding?" Heck, how could we advise where the misunderstanding was when we had come comprehension problems ourselves. "Look here," the QRPer said, his eye fastened on us again, the tone in his voice allowing no argument, "I see that I will have to state it more simply. State it in such a way that, though it may be redundancy to the point of absurdity, it will be easily understood by even a low grade cretin. Understand?" Of course we understood. We were happy to hear that clear and lucid words of explanation were coming. "Put it this way," the QRPer intoned, picking up the thread of his mission, "the DX equation is and can simply be stated as 'DX Is'. But for those whose needs require the fuller explanation, who cannot grasp the Mysteries of the Ages and the Inevitable Truths, we will resort to being redundant. We will lift these ones up with more explanations. And all these will have to know and understand is ready?" Of course we were ready....there was no escape. The QRPer continued. "All these will have to realize is that.....DX Is Is!" And with that he leaned back, the smile of triumph and accomplishment on his face, almost as he had just delivered a new country to the deserving. We had to think this one over and we are still thinking. For we have learned not to ask this one questions as we often end up with more answers than we can match with questions....DX Is Is!! And for a full year \$18.00 will bring you the full'is by first-class mail in the U.S/VE areas. \$14.00 brings it someday to the deserving in the U.S. while \$20.00 a year flies it south to Mexico and all the lands where DX Is! Or is it DX Is Is?
