

HOW TO TELL THEM.....

the zones of those Asiatic Russians.

Zone 16	UA9	UW9	S T U V or X
17	UA9	UW9	A B C D E J F M or N
18	UA9	UW9	A B O P S T U V W and some with Q or R.
	UAØ	UWØ	
19	UAØ	UWØ	Some with Q, R, or C. D G I J L M or Z
23	UAØ	UWØ	Y

If there is a K following the numeral, disregard it and take the next letter. K for Club Station....for example, UAØKYP is Zone 23. This was taken from John Attaways column in June 1967 CQ. Once in awhile you will come up with a variant but generally the above is a good guide.

MacQUARRIE VKØKJ, Greg, being worked on the West Coast from 0430Z to after 0700Z. 14241kc. QSL via KHJE. Sometimes found at 14185kc working split frequencies into the American Phone Band.

COCOS Reports of a possible March operation from TI9-Cocoas by some Costa Rica amateurs along with their friends. TI2RE seems to be heading the planning.

SHORTLY NOTED: That ZALA in the 4080 last week should have been ZS1A...hope that no one got too excited. The correct QSL information for 4S7DA is W6FJ and not W6JF as previously reported.

Help the handicapped...if you know a DXer who might need late information, send his name and the QRP Foundation will send him a sample of the WCDXB bulletin. The bulletin went in the mail early this time in order that there could be proper presentation from Marin County at the Fresno International DX meeting.....also we had to make sure the NCDXC checkbook was there. Rememberthe WCDXB pays the postage.....Operation Headstart...on everyone else.

BURMA Relative to the XZ2AB which showed up a few weeks back, some months ago a XZ2AH was active on 20 meters....real strong signal...but all attempts to get a QSL were returned with the notation that there had been a ban on amateur radio in XZ-land for the past five years. Also in the good news line is ACHAE-Tibet frequently found at 14003kc in the evenings here. Beam heading 45°. While you are listening in that direction you might listen for 8X8AA on Cray Island. When this call came on the scene last June the reported QSL manager returned cards with a note that it was a phoney. Also, the 8X8-prefix supposedly not assigned by ITU.

WEST PAKISTAN AP5HQ, Fida, coming in mornings and evenings....sometimes LP, sometimes SP. Mornings look around 14204kc from 1300, evenings around 14220kc or one or two higher around 0300Z. Sometimes UA9KAI has acted as MC and some give AP5HQ name as Fidel....anyhow, he's there and you should work him to keep him satisfied.

SAO TOME Looking for Ws on Sundays around 2200Z....14200-14225kc.

DXCC CRITERIA What constitutes a country....reprinted in the February QST. Check page 88. Be informed....well, give it a try anyhow.

CHATHAM IS. The boys have shut down the operation during the last week....after making a lot of contacts. No operator there from the expedition but ZL1TU reported as they were closing down on January 22nd that a new operator will be going out there for a six month stay.

CENTRAL AFRICAN REPUBLIC TL8GL, Gilbert, at 14203kc on January 22nd at 2100Z. QSL via VE2DCY....Gilbert reported that he is not too active these days.

73,

WA6AUD

TNX: To all the big DXers including W6ZC, K6OZL, W6RGG, K6KA, W5LZZ, KH6GLU, WB6ZNM, W4OPM, WB6RZI, KH6GQW, W6DQ, W1EED, KH6BZF, W6MEM, W6EJJ, W6NJU, W6KOE, W6CDJ

WEST COAST DX BULLETIN Published weekly by the Marin County DXers. With the new administration in Washington, let us go forward...together...QRPers first and all others following. In other words, QRP Power...QRP is beautiful. \$7.00 yearly
