July 12, 1971

ALDABRA Andre Saunders, 524KL, will head an Aldabra effort in the latter part of August, the tentative date calling for a departure from Mombasa on August 20th. Also in on the effort will be Darlene, 3B9DK and Jack, DUIDP, and his XYL. 'The trip to the Aldabras will be made on the "INTREPID DRAGON", a Chinese junk owned by DUIDP....actually a finely built yacht. Call will be VQ9KL/A. Plans call for a five or six day operation....all bands and the frequencies will will be announced shortly. The INTREPID DRAGON is presently in the Seychelles and is expected at Mombasa in early August. QSLs will be handled by 524LW, Bob Hope, P.O. Box 7872, Nairobi, Kenya. Support will be needed and is being requested. Andre says that if the Aldabra effort does not jell, that contributions will be returned. Support can be sent to Andre Saunders, Kenya Polytechnic, Box 30214, Nairobi. Andre has also applied for licenses for future operations in 601-Somali and for TZ-Mali, but has not received replies to his application as of last week. These are future possibilities should all hopes develop.

CHINA BY1AB has been showing up on twenty, was at 14204kc at 1900Z on July 8th...has been reported at other times and days. Said his name was 'Mao' careful to say he was no relation to the Chairman ... and to QSL to 579B Tong Tien Men; Peking 11, Peoples Republic of China. Reports from Thailand say that BYLAA has been showing up along with BYLAB...and that the accents and beam headings look good. They are supposed to be working for Radio Peking and their English is not the best. Son of a Gun....what can you say? Work them first and worry later. Beam headings from the West Coast would also indicate that the stations are in the Orient.

DARLENE Darlene still on from Rodrigues and apparently turning into a demon DXpeditioner. Late information on her activity indicate that she will be on every day but Mondays....the antenna is now at the 70' level and this apparently has contributed to an improved signal. Actually she has been worked on some Mondays so that day of rest is not for sure. Darlene will be on Rodrigues until the end of July, departing then for Mauritius where she will be the guest of 3B8CR. She will leave Mauritius on August 10th bound for Kenya where she will be the guest of 5Z4KL. She will participate in the scheduled Aldabra operation and is also trying to obtain a 5X5 license. From this area she will go to JY-Jordan to put in a spell of operating 3791K. Beyond Jordan her plans call for travel to Italy, Germany, Sweden, Denmark and sne will try to operate from Monaco. Darlene hopes to return to the states late this year and plans to be at the Fresno International DX Meeting the last week-end in January. She was there last year..... Son of a Gun, all the big guns go to Fresno!!! Last week Darlene was showing up regularly at 1400Z at 14285kc to work into the Western Reaches with W7GOC directing traffic but without any lists being taken. She moves around when QRM gives trouble, last week was generally around this frequency but may move 20 or more kes either way. At one time last week she was at 14196kc at 0430Z working Africans, SSB to CW. Monday reports indicates that the Monday operation may be below 14200kc.

Darlene often found on the SouthEast Asia Net (SEA)...14320kc from 12007...then moves down around the 14285kc slot until around 1600Z. QSL to VE6AKVfor sure!!

ANNOBON At the end of last week, nothing but praise was being heard for the 3COAN Annobon operation by the OH-DX Group. It would seem that anyone who made a determined effort worked 300AN, many reporting both c.w. and SSB contacts. ation was due to secure last Friday and the group to return to Fernando Poo. Transportation was the hang-up to the very end. The plans to use the Spanish vessel evaporated, things not jelling and transportation by plane was again sought. It is reported that back in June a Dornier twin=engined plane was offered but because of some doubt as to the airworthiness of the plane, the offer was refused. When the plans for boat transportation evaporated and after some experienced fliers said that the plane was okay, there was a second look at air transportation. It was also reported that a Cessna 337 would be used....this being a twin-engine craft, with engines fore and aft and the tail empennage carried on twin booms. Anyhow, they finally got to Annobon after being on the air from Fernando Poo up through Saturday and the bands were thick with rumors....they would be off at 1000Z....at 1600Z.... at 1800Z....they were on the ground setting up equipment....the plane had not kept schedules with a TY1 ... There were plenty of reports and every DXer it seemed, was sitting around impatiently with his spoon ready for the DX feasting but Monday passed without Martin or Villi showing up.

But Tuesday ... that was a brighter day. 3COAN started being reported from 1400Z onwards and the rest of the story should be a multitude of entries in log books for a new country worked. At times the signals coming through were extremely strong with evidences of the operation being a iron-man effort. On Wednesday 3CØAN was comin through to the Western Reaches on 15mtr c.w. from 1700Z until 0100Z Thursday without a break, a consistent high QSO rate being maintained. At one time Martin said that he had been operating for 30 hours continuously and while tired, he was still sticking in there. The operation was due to secure about 1100Z on Friday. Apparently the gear had to be left behind, possibly to ensure the plane getting off the short air strip. This strip apparently is little used, some reports saying it was last used six months ago some saying three years ago some saying that it had been converted to a hayfield. At one point on the scrambling, information on the airstrip had to be obtained from the Jepperson Aviation Chart Agency in Denver. Originally this had been planned for a two day uperation....it ended up as 31/2 days of concentrated activity. Last Saturday they were expected back in Fernando Poo. Martin has had his leave extended until July 15th and there were some reports that the OH-group might activate Rio Muni on the African mainland on the way home. Their operating permit is good for Rio Muni and this might count for a new country. In the retrospect, there does appear to have been more than just a bit of hazard and the several hundred mile flight across the Atlantic to a questionable landing strip had some keeping their fingers crossed. Things turned out well and the operation must certainly bring credit to the OH-DX groups effort. It should be obvious at this point that there have been considerable expenses and support for the effort will be most appreciated. Such support can be send either via OH2NB who will handle the QSLs, or via W6AOA.

More details on the effort should be available soon but as of this date it surely appears to have been a highly successful Fernando Poo and Annobon operation. Do not hesitate to tell Martin or Villi what you think of their effort.

MANIHIKI ZK1MA, Tuatai, kept the schedule with K6UFT on July 2nd but did not keep any of the schedules last week. During the July 2nd operation Tuatai went off the air briefly, returned to say that he had some rig problems and had changed a tube. He finished out that operation but that was the last heard...

As far as Gordon, K6UFT, knows, Tuatai will be back...hopefully without rig. problems. The schedule is for 0400Z on Tues/Thurs/Fri just above 14200kc with WB6UNS warming up the action by taking the list around 14210kc starting at 0300Z. QSL via the INDXA.

PREFIXES

The prefix world went mad over the Fourth of July week end.... among those heard were:

KC2GMF Greater Monmouth County Fair

KF4SJ Anniversary of San Juan...oldest city in North America!!

QSL to Bx 1871, Ponce, Puerto Rico 00721

WS7BCM Believed to be in Portland but no definite information

available.

KCØKC County Hunters Convention. QSL to Box 753; Shawnee

Mission, Kans 66207

WSØATA QSL to KØBLT. Bellevue, Nebraska Radio Club.

TI9-COCOS Apparently there was activity from Cocos last week by TI1AAC but apparently few worked him. There was one single report by HPLJC of working TI9AAC at 14204kc on July 4th at 0415Z. This was supposed to be a four day operation until July 7th on twenty SSB only.

FRENCH WEST INDIES W4VPD reported as preparing to work over the French islands this month with St. Martin--FSØGD scheduled to open July 17th. Also scheduled are FMØGD -Martinique and FGØGD-Guadeloupe. This is reported to be primarily a twenty meter c.w. effort.

160 mtrs--PERU W4QCW will operate 160mtrs from Peru during this month, using the following call-signs:

OB8V Jul 9-12th from Cuzco
Jul 16th from Pucalpa

The OB-prefix will be used from Jul 1 through December 31, 1971. 15 OB-QSOs will qualify you for a special award.

REPUBLIC OF GUINEA Recurrent reports of a 3X1CG being active from the Republic of Guinea....last rumored as active on July 3rd....c.w. No details on time, frequency of whatchamacallems....but this one was rumored previously. Similarity to the 7G1CG noted in the call-sign....

CRETE SVØWLL reported as being found in the 21250-21300kc slot from 2000-2200Z. Also being reported as coming through from the island is SVØWBB. SVØWLL QSLs via Box 1134, APO 09291. SVØWLL QSLs to SVØWT...often reported on 15mtrs around the 21275-21280kc slot from 1930Z. Latter part of June was being worked in the Western Slope at this time.

DODECANESE The active stations in these islands are SVØWE and SVØWUU on Rhodes. These have been reported as active....SVØWE sometimes found on the low end of 20mtr SSB after 1800Z and SVØWUU on or about the 21350-21365kc area around the same time.

YEMEN European stations reporting a 4WlAF the last week in June....21295kc from 1430Z.

MOST WANTED COUNTRIES ... D.A.R.C. LIST

DX-MB, the bulletin of the DARC in Germany, recently listed their compilation of most wanted countries for them. In order the top ones were:

1--Clipperton; 2-Minerva Reef; 3-Bouvet; 4-British Phoenix; 5=Maria Theresa;

6-China; 7-Willis; 8-Tonga; 9-Tokelaus; 10-Revilla Gigedo; 11-KB6-Baker; 12-Spratly;

13-Manihiki; 14-Juan Fernandez; 15-Fanning.

This last...compiled as of by, found out of 120 polled, 63 eded Albania, 47 were looking for Franz Josef, 39 for Market Reef and 29 needed Monaco. How does that

CALENDAR

ALDABRA ... VQ9KL/A by Andre Saunders and Darlene & Co late August.

RODRIGUEZ 3B9DK, Darlene, most days from 1400Z.

GARIBBEAN WAVPD in the French Islands in mid-July....St. Martin, Guadeloupe as

Martinique.

BRUNEI VS5CB on daily.

FORTY/EIGHTY DESK

3796kc 1115Z Jul 3w KC4USN 7264kc 0845Z Jul 4w DU1FH 3796kc 1115Z Jul3w 9V1QI 1110 . 3w KG6JBD 3829 0946 4w ZP3AQ 3806 1005 7085 9V10I 2w VP8ME 3806 0945 · 2w VP8ME 7205 0715 DU1FH 7085 1100 3W 7001 8R1J 0520 2w HKZLP 7001 0520 2w 0725 7e KS6DY 7032 VU2SX 7029 0745 7e

OGASAWARA JD1ACH operating from the Bonins and will be there until early
August. Weekdays often finds them with little time for action.....14040kc one of
the favorite hangouts. Over the 4th of July week-end they were on this frequency
as well as the lower portion of twenty SSB from 1030Z....14206kc and 14227kc being
reported as being used in addition to the 14040kc neighborhood. QSLs go to
JA3GZN.

DX Station shows. Innocuous, naive, juestioning, argumentative....or just style of 'V's or 'CQ' to show good intent. To argue is folly.....far better to have the phone number of a FCC Monitoring Station ready and to phone them. And not just of call from an area.....everyone should call. The magnitude of the problem will be measured by the number of calls.....everyone bellow!!!

OFJUSA was asked on the Red Sea plans, said there were some problems in arranging for a boat. Planning should be definite by the end of this month. KC6CT on Yap will be departing the island soon to return home. JEICKA, a newer JApanese prefix is often found in the lower 50kc slot of twenty SSB from 1130Z. JRIBMU also in the same area and time is a Tokyo station. WB8BTU is looking for some VP2 activity with a possible start with VP2-St. Vincent. YJ8BL was trying to get on the ZKIMA list recently..., this is ex-VRIL. Says is available on 80mtrs.

The 5X5NA is strictly a list operation with W3ZNH....breakers not tolerated. Check the INDXA gathering at 14218kc around 2300Z for possibly catching W3ZNH or more info.

PT&T-Saigon running a telephone to Hong Kong for satellite relay to Oakland. They are reported using independent sideband in 21275kc with lower sideband on 21212kc carrier and upper sideband on 21218kc carrier....LINCOMPLEX System. Reported to be making a bit of a hole in the band with occasional spurious carriers. This is loudest on the night path—1700—1800Z. FCC getting into the act.

5B4ES reported as being heard recently, possibly Cyprus back on the air. Reported that the YB stations were off the air 28 June to 10 July while national elections were going on. This was the amateurs own idea so to avoid any blame should there be problems developing.

C21AA last week was operating at 14183kc and calling by districts above 14200kc. Dig down into that foreign territory....sometimes you will turn up something interesting. W4AQW is now W4AL. Presently active from 5H3 are—JR, KA, KG, LV, IZ, ML, MM, MT and MV. 5H3MA has moved to Ethiopia and is found now as ET3DA. AC5PN was at 14041kc at 1418Z on July 7th....anyone with info on this cat. Gave his name as Yusyonten. VR3DY efforts in early June was a pirated effort...QSLs being bounced back...N.G. QRPer I7ZCZ works the states with two (2) watts. Hail the suffering QRPer. FOØTG on Moorea is Ray Eichman, WA6IVM....QSL to JALDCY.

ZAZRPS The cards for the June Albanian operation were being received last week with DL7FT indicating that by last week-end all of them should be in the mails. There were slides and tapes made of the operation and these are being forwarded to the states for use by DX Clubs.

One unusual note is that there are stations who worked ZAZRPS in the 1970 effort

who have never forwarded a QSL card.

Frank hopes to visit the states next year along with DL7AV who was the c.w. expert on the Albanian effort. The financial nut for the effort still a bit of a problem with the contributions to date not yet off-setting the expenses. Should anyone need a QSL for the ZA2RPS for a contact made or wish to contribute to help with the expenses can direct either to Frank Turek, DL7FT.

- MALDIVES 8Q6WA and 8Q6AC have been issued to 4S7WA and 4S7YL respectively. There have been reports of 8Q6AC at 14202kc at 1700Z. QSLs for either of these go to their 4S7-CBA.
- FORMOSA Several JA operators working on plans for a BV action in the coming Fall DX tests. Licensing still the problem but they are working hard through a local resident there on Taiwan. Keep hoping, something may develop one of these days.
- JORDAN Reuters, the British news agency, reported that machine-gun fire was heard from JY1-King Hüessein's palace this last Saturday during the celebration of the kings birthday. Initial reports gave no details.
- TNX to W2FXA, WB2YQH, K2LGJ, W3POE, W4BA, W4HU, W4TUC, W4UF, W5ALA, K6AQV, W6KHS, K6EC, K6KA, K6LAE, W6ONZ, K6OZL, K6QZ, W6TSQ, K6TXR, WB6UDC, K6UFT, WB6WHM, K6WR, K6ZDL, W7PFZ, W8BQV, W9WKU/4, WØJRN, WØYDB, KH6BZF, HPLJC, JA1OED, JAØCUV/1, 5Z4KL.
- WEST COAST DX BULLETIN Published every week by the suffering Marin County DX Group. A couple of the local operators were eyeing the scenery at a recent ARRL convention. Several guesses were hazarded on the age of some scenic attractions. Finally a QRPer tired of the guesses and advised: "Check the elbows, Men, check the elbows. You can camouflage a lot of wrinkles but you cannot hide the elbows". Son of a Gun...one never knows when a QRPer might add to your span of useful knowledge. \$9.00 for a full year of wrinkled DX reports....\$10.50 by airmail. A full year's supply of test kits on the road to greater perspicacity.
