33-71

BAJO NUEVO W4VPD, Enos Schera, announced in mid-week that there will be a Bajo Nuevo operation with the opening date scheduled for August 16th. The operation is scheduled for four days of effort and will sign HKOVA.

Along with Enos on the trip will be TI2J, Jose and TT2CF, Carlos. The frequencies to be used will be:

8.W. 17005kc listening 7030+kc. Also 7030kc, 14030 and 21030kc...listening up two or three kcs as needed.

14195 transmitting. Listening on this frequency and down 5kc for foreign stations....listening at or about 14280kc for W/Ks.

21295kc transmitting...listening zero beat or down 5kcs for any foreign calls....listening for W/Ks 21350kc.

W4VPD will maintain daily schedules with W00GI for any necessary Dxpedition traffic. The schedule for this will be 14030kc with 21030kc as an alternate. The schedule will be maintained at 2100/2200/or 2300Z.

Enroute to Bajo Nuevo, HKØVA/mm will be signed and to pass along any late information. During the Bajo Nuevo effort, there will be an especial effort to listen for VK-JAs on the following schedule:

7mc 0500 -- 0900Z 14mc 0500 -- 1300 21mc 0000 -- 0200

Strict ground rules for QSOs have been outlined and Enos wishes but one (1) QSO per person. Should a person not be certain of a valid contact, two will be tolerated but any more than that is verboten. There is a definite antipathy for the one who must flex his muscles by workint the Dxpedition every hour on the hour. Tail-ending okay with one (1) call. Fast contacts desired with the minimum of talk and no rag chewing.

Anyone interested in helping with the e penses will be welcomed. The costs of this trip will be sizeable and some help will be needed. Efforts will be made to get the QSLs expedited to those who help with the trip.

W4VPD has operated in several previously successful efforts, having previously signed HKØTU, W4VPD/KC4-Navassa; W4VPD/KS4 Serrana; TI9J and TI9CF-Cocos and ZFlVP. With the previous experience and the other operators involved, this should again be a most successful effort.

FAR EAST DESK Word this week from our Hongkong Desk indicates some skepticism over the raft of BY-China calls being heard. VS6DR who has been given as the QSL manager in some operations says that he knows nothing at all about any BY station or operator and cannot supply any QSLs. Phil says he has been getting QSLs from many JAs and UAs but cannot be of any help. Some sources suspect that either a JA or a UA...or possibly both, as being under the BY activity.

Speaking of VS6DR, long acknowledged as the Biggest DXer in the Orient, there is a report that he is down to 300+/- pounds and probably lose the Big DXer title within the coming month. Phil also feels that because of the political matters surrounding

Spratly as reported in last weeks WCDXB, that there is little chance for action there

in the foreseeable future. Too many people with guns taking an interest.

BHUTAN K6KA recently received a letter from Thuji Yonten who presently is operating AC5PN and this should end any doubt on the validity of this one. AC5PN says in brief:

Dear K6KA: Your friends in Southeast Asia are very correct to have heard my call. I have very recently started to work on the amateur bind. There was Mr. N Chhawna previously working AC5PN, our ex-Ghief Signal Officer of Bhutan. But the said gentleman is no more in Bhutan now. Since he left the country, no substitute dared to occupy his work immediately for want of proper knowledge which continued for the last 5-6 years. I am the new comer in this line and very new. My name is T Yonten (full name as Thuji Yonten). Before I should regularize my work in amateur bands, I would like to enrole my name in the membership of Amateur Radio and would also like to change my call sign for which I have already written to ARRL. Soon I get confirmation from them I shall immediately arrange to print my new QSL cards and that time I shall forward a copy to you.

I shall be very much thankful to you if you please help in providing a regular membership of amateur radio and in changing my call sign as AC5PY instead of previous AC5PN. The technical description of my station....transmitter Bel Et 402, 400w a.m. 1.5-30mhz. Receiver--Bel Ru 536 1.3-28 Mhz. Dipole antenna 30 feet high favoring east/west.

I am b onafide citizen of Bhutan.

73, /s/ T. Yonten

Director, Wireless Communications D/Tshe, Thimphu, Bhutan

SHORTLY NOTED VRIAA which showed up during the week will eventually have all band capability but presently is stuck on twenty. This was another rush job this week when Enos passed the word on his Bajo Nuevo operation. Time is short and some of the things we often do in mailing the bulletin were skipped this week...Patience.

Those looking for 40meter action can watch for HKØBKX at 7205kc every Wednessay at 0200Z. 9M90EA is often found at 21300kc+/- from 1430 each day. ZKIMA is opening up a half hour later on his Tues/Thur/Fri sked with K6UFT....0430Z.

Those looking for VP8LV=South Orkney from last year, can send QSL to W3DJZ. Apparently VP8FL was supposed to forward the logs some months back before going on leave but failed to get all tasks completed. They should be on hand shortly. LA2PC often on from 0600 is looking for those elusive W6s to get the California Award. XW8AX is presently home on leave...will go on to Washington and then possibly to XU-Combodia and possibly some action there.

ZD9BR is on regularly from 1400Z around 14050kc and looking for stateside contacts, Les will be leaving Gough Island at the end of October. Often coming in LP over Asia but sometimes covered by Asian stations.

HZ3-sources indicate that inquiries indicate that no 8Z4 licenses have been issued for some years. Political situation makes any possible licensing questionable. VQ9TF logs from start of operations to this July are now in JAØCUV/1 hands.

EAST AFRICAN DESK Andre, 524KL, reports that his efforts for a 601-Somali license have come to a dead-end with the authorities advising....'there is no need for Mr. Saunders to operate an amateur stat n in Somali'. Though this is hardly the encouraging work desired, Andre has not given up and will continue to try to get a license.

Presently 5Z4KL is in Mombassa and will be there until the end of August. While there he is checking into the possibility of air transportation to Desroches Island, having recently uncovered a lead on this possibility. Should this not develop, it is possible that something may develop during the Christmas or Easter vacations. Should nothing develop from the Mombassa trip, Andre will operate from LAMU Island which will help the IOTA Award seelers. A possible special prefix may be used for this and the activity....Lamu or any other possibility....will be between Aug 20th and 30th. Any QSLs for Andres efforts will go to Bob Hope, Bx 7872, Nairobi, Kenya. Darlene should be showing from 5X5-Ugan a the end of this week and should be there through the rest of next week.

GOLDWATER-LICENSE BILL Senate Bill 485, introduced by Senator Barry Goldwater, K7UGA, has been adopted by the House of Representatives after having been previously passed in the Senate. The measure now goes to the White House for presidential signature and enactment into law. This bill will allow future citizens of the U.S. to obtain amateur radio licenses.

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of local QRPers came by recently, obviously concerned. "Say", he said in his original fashion, "I just saw old CN back from his vacation and he sure looks peculiar. There are white stripes all across his front. What do you think it might be? Nothing serious, I hope". We hustled over to take a quick look...sure enough, there they were. Narrow white stripes across a brown expanse. But as all fat QRPers know, it is difficult to tan within those an le folds when sitting in the sun. Sure was happy to bring balm and solace to the worried one. Son of a Gun, where else can you get such answers to environmental problems? \$9.00 for a full year of biodegradable answers....\$10.50 brings it airmail. Zebras may be a member of the ass family but not all striped ones are zebras....that's an environmental fact!!

WEST COAST DX BULLETIN 77 Coleman Drive San Rafael, Calif. 94901
