October 10, 1972 <u>Mt. ATHOS</u> The call sign on the Mt. Athos effort, coming up this week-end will be <u>SYVMA</u> and not SVVMA as previously recorded. At least this is the game plan and if you should heard them on, jump in and work them and worry about the call-sign later. ARRL DXCC Desk has indicated that this will count as a new country. This has been an autonomous area in greece. While this trip has been scheduled only for the coming week-end, there may be a follow-up trip around the end of the year, possibly around Christmas time.

+++++

+++++

++++

The group expects to arrive at the action site on Friday arourl 1600z and may be active as early as 1900z. The plans are to operate until sometime Monday morning, keeping at least one transmitter going at all times.

Frequencies to be used: 14280kc 21280kc 28580kc. If there are 40 mater activities look for them at 7080...

For c.w., the plan appears only to try this if SSB does not work but SVØWII may be found with c.w. at 21180kc. On 40mtrs they will generally try the Advanced/General area unless QRM drives them down into the 7010-7020kc area.

The gear will include two complete rigs with linears. For antennas they will have 3 verticals, 1 dipole and hope to have a pelta Loop. possibly they will work by districts and will announce changes before they look for fresh action. Late word may be had by monitoring 21355kc or ther abouts from 1615z where  $gy \emptyset WJJ$  had a daily schedule with WA1HAA. Most information on be had by reading the mail without taking up the short time available by asking questions. This is a brief schedule..... QSLs will be handled by WA1HAA whose address is

> William B deLage 238 slater street Attleboro, Mass 02703

and this is a correction of his former address which used to be in Rhode Island if you may be using an older call-book. QSLs will need s.a.s.e or s.a.e. with IRC. SVØWJJ hopes to get to crete and Rhodes before returning stateside in January and to run up the action at those two spots.

MIKOMOS There is a report that three from the Athens Radio Club are going to Midomos Island over this coming week-end and this will also count for a new country. This was passed along right from a SVØ station and it has popped up before. There have been a couple of spellingson the islands...Mykonas...Mikomos...etc. However, last week it was figured here to be a garbled version of the same Mt. Athos effort. This week we are not so sure.... Listen this week-end. You have the information where the Mt. Athos group will be working. If you hear a Mikomos/Mykonas operation going on, jump in and work it

also. This has bee reported as a possible new country and a fourth one to bear a SVØ-prefix. No time or frequencies are known at this time.

KAMARAN Aldo apparently still waiting for the written message. Some have reported that written permission for the operation would be essential to the effort getting DXCC credit. However, keep in mind that this may, boil over any time and you may hear ET3ZU/70 under a pile-up....any time...

10 october 72

PACIFIC REPORT From Stan Kohn, KC6SK, comes a fill-up on what the DX Scene is sounding like out yap way ...

FK8BQ, Jean in Noumea, was at 3503kc late september, QSL to F6BBO. At Alice springs VK8ZZ has also been work 80 mtrs, Gordon was at 3506kc at 1000Z late in september. FK8BQ was coming on about this time.

On Bougainville, VK9GO was a 21285kc at 1130z the last week of September. Roy QGs to VK2ATZ

The Micronesian Net which meets at 14305kc/0830z recently has VS5RL and HS1AHE. HS4AGZ, Jerry, has been coming through on 15 mtrs from Thailand....21325kc/1400z. and XW8GW, Jack at Wat phow has been on the same frequency a half hour later. CR8AK, Raul on Timor, at 14303kc at 0730z a week ago. This one QSLs to CT1CY, Box 2529, Lisbon.

ZIJKK/C on Chatham, handle is greg, was at 3805kc/1020z the last week in september working KP4AN who is ex-KC6SK. Greg says he will be on Chatham for five more months...to March 1973 except for a couple of weeks leave in December.

- On Marcus, JD1YAA, Kato, was at 28565kc/2120z the first gunday of October. ZL1AQ says he has caught some good DX on ten meters including JY9BO who has been active 1500-1800z and around 28550kc.
- SPRATLY There are recurrent reports that a spratly operation is near with one being that some, including HS-amateurs, are ready to sail as soon as the weather is right. Most planning....and rumors....point to early December.
- 10 Meters This one continues with surprises...the east-west being the one that pops your eyebrows up. But rather than tune around hoping one will fall over you, try the scientific approach. KV4AM supplies the following information on 10 meter beacons....all these are 24-hour c.w. beacons.

GB3SX	28185kc	25 watts	25	
DLØIGI	28200	200 watts	200	
DLØAR	29000	170 watts	170	
3B8MS	28200	·	-	

These stations generaly identify every five minutes. A bit of listening for these beacons may be helpful. As the Hero of Mafeking would often say: "Be prepared".

SILENT KEY IN New Orleans, Roy Alciatore, W5RU, became a silent key on geptember 29th. Roy was a dedicated DXer as well as the president and owner of the internationally famed ANTOINE'S Restaurant in New Orleans.

W J L Dalmijn, PAØDD, Chairman of IARU Region I, passed away in mid-september. He will be noted in the picture on the bottom of page 95 of the October QST where a photograph is shown of a number of IARU officials at the recent IARU Region I conference at Scheveningen.

- CYPRUS 5B4KP showed on twenty SSB last week, 14147/0400Z. QSLs to P.O. Box 1152, Nicosia, Cyprus. gaid that licenses have not been issued in the area for about ten years and his license is number #1.
- JORDAN EP2YL, Rosy, will be in Jordan and will sign JY7YL October 11th-15th...usually starting around 1400z. Contacts with this station will count along with the JY1s for the Arabian Knight Award. King Huessein was at 14202kc at 0030z on September 28th, mostly working to the Middle States and the Western Reaches. He has indicated that he will try to check in with the YL-SSB System at 14333kc when conditions are such that he has the time. JY9VO is another often found around 14250kc from 1400z. This one QSLs to Bx 5089, Amman, Jordan. The home call for JY9VO is WA60PJ, George Murray of Lompoc.

IRCs possibly as an off-shoot of the 3x1p operation, there have been a number of inquiries on the number of IRCs needed for airmail return of a QSL. These questions are asked as the charts do not show this information. These are situations where the number of IRCs needed have not been established officially by the postal authorities through the Universal postal Union. Thus there is no set number. The solution...? Ask a gwede what it takes....possibly unofficial but effective. This since it is not peculiar to gweder it also applies to others.

## 0\_October 1972

oct

## SUNSPOT LOUIE

Five small to medium size spots showed up on this weeks chart and since september 21st there have been from five to seven present on any day in the period.

Band conditions have reflected these conditions and generally DXing has been good. The size of the present spots range from about 5000 miles to 8000 miles in diameter.

FCC A number of decisions are coming out of the FCC, some of the changes in the phone bands are listed on the last page and a couple of weeks back there was a ruling on the Repeater Docket 18803.

The text on this one is carried in the October QST. It might be that in some instances there are those who are only mildly interested in repeaters and will pass this one up. However, the docket does cover some items a bit more than just the use and licensing of repeaters and it may be well to study the changes.

97.3(a) has been rewritten to redefine an 'amateur'. There are changes in logging requirements, licenses, call=signs to use, portable/mobile operations, plus a number of other things. The requirements for logging phone patches has some interesting changes. page 100 of the October QST starts the educational process. It might be well to study these rulings inasmuch as some constitute some definite changes in direction or approaches for amateur radio policies...

SHORTLY NOTED On that CR9BK which was reported during the All-Asia Test, the Hongkong Desk reports that this must have been Sampan Slim as the one and only CR9 license in existence at this time is CR9AK. To go a bit further, CR9AK issues the radio licenses in Macao and until he retires some years hence, there will be but one and only trueblue CR9 license in existence and that will be CR9AK.

Now how is that for direct, concise and definitive information. We argument on this one. On the other hand, XEIIIJ is hoping to sign a new prefix for the CQ Test...and hopes for 6CØAA. The Africana DX Net at 21353/1800Z daily picks up a lot of the African DX plus a few good ones from near-by. This has been a difficult issue with out normal schedule out of kilter...it took four hours to just open the mail when we arrived home. W1YRC gets some flak for trying to ensure that there will be no question on the validity of XV5AC QSLs. He is checking one hour either side of a reported QSO...plus one day either way. These should ensure that a XV5AC QSL will be gilt-edged but some impatient ones gripe over the time spent checking things out. Patience!! XV5AC will be available for some time....and will work 80 thru 10 meters in the coming CQ Test. Can anyone come up with a FR7AM QSL for either the Gloriso or Europa operations during the efforts recently or in 1970?? Some leaning to be belief that there are a lot of QSOs but few QSLs from this one. Also, we are looking for any indicators that QSLs for TN8AU have come through. Except for the Franz Josef, most others seem to be showing up sooner or later...and sometimes only Excedrin gets you through....

## CALENDAR

Mt. ATHOS MYKONOS' ISLAND

JORDAN KAMARAN EASTER ISLAND DES ROCHES SERRANA BANK LORD HOWE SPRATLY VK-ZL This week-end, October 14-16th. PREPARE!!!
Reported operation...also this week-end...by Athens Radio Club
for a possible new one with SV-prefix. WATCH!!
JY7YL by EP2YL October 11th-15th.
Keep hoping...may develop on short notice if things jell.
SM2AGD/CEØ ... will be on for some weeks.
VQ9R due about October 23rd.
KZ5PW et cie signing KS4KZ from October 26th
VK2BQQ due to open this week....until October 18th.
Early December....PREPARE!!
C.W. go-round. October 14-15th...

SEANET CONVENTION

BANGKOK .... November 10-12th. positively the only one in 1972!

CARIBBEAN Apparently there has been a little noted happening to a number of the small islands, reefs and shoals in the Caribbean which would end the U.S. soverignity over a number of islands including Navassa.

As of this point we have run the matter through some sources for a check out and it does seem that the U.S. has agreeded to turn Navassa over to Hondouras. The U.S. claims to Serrana Bank and Baja Nuevo, which have been shared with Colombia are being waived and full soverignity by Colombia over these islands and reefs will be acknowledged.

These seem to reflect actions taken concurrent with the Swan Island matter though that was the one being noted by most sources. It is expected that by the next issue there will be definite information but at this point it does seem right and the U.S. is waiving its claims in the Caribbean to some of the real estate...soggy and otherwise...there.

LORD HOWE VK2BBQ, G page, will open this week-end if all goes well and will run to October 19th. The activity spans the VK-ZL Oceania Test and the stations plans to be in on the c.w. portion of this one.

Frequencies announced for the operation are ....

c.w. 3502/7002/7045/14002/14045/14095/21045/28045kc SSB 14110kc

There may be other SSB frequencies but this single 20 meter one was the only one uncovered to this time. From 1000z daily there will be efforts to work at 3502z for 80mtr contacts.

FCC The following is an ARRI-BUlletin...No. 921...which has a few interesting items.
FCC has acted in the matter of Docket 19162 regarding phone band expansion. Effective November 22; 1972, there will be 25kc more on 75mtrs, moving down to 3775kc, and 50ke more on 40mtrs, down to 7150kc. No expansion on 20/15/10 mtrs and no change in the 25kc c.w. segments for extras. Voice sub-bands for extrans will be 3775-300kc and 21250-21270kc. gub-bands available to Advanced/Extra for voice will be 3800-3890kc 7150-7225kc, 14200-14275kc, 21270-21350kc and 50.0 to 50.lmc. Novices stay at3700-3750, move to 7100-7150 and 21mc r.duced 21100-21200kc...get c.w. 28.1-28.2 mc.
TNX to W1AM, W1YRC, K2AGZ, #A2BCK, WA2MBP, W2FXA, WB2YQH, K2LGJ, W3CDL, W4EH, W4HU, K4FRY, W4KA, W4NJF, WB4PUD, W4TUC, W4UF, W5ALA, WA5EMH, W5LZZ, W5UBW, WA5WEY, WA5ZNY, WA5ZUH, W6AM, W6APW, K6AQV, W6BJI, W6CIM, K6EC, WA6JVD4 K6LAE, WA6MWG, W6OL, W6PT, W6TSQ, W6TTS, WB6UDC, K6UFT, WB6UJO, W6VBI, K6WR, W6YHT, K6TWT, W6ZTJ, WA7RKA, W7PFZ, W7TE, W7YTN, K7ZHS, W80A, K8RWL, K8TVO, W8ZOK, WA9JDT, W9DDL, W9DRL, W9BWJ, W9IYP, W9JRN, K66SK, KH6BZF, KV4AM, HL9UH, ZF1EP.

WEST COAST DX BULLETIN published every week by the Marin County DX Group. One of the local QRPers had been out of town and when he came by we asked about his trip. "How did it go?", we asked. The QRPer shrugged his shoulders. "So-so", he said. "Nothing much exciting about it". He thought for a moment and continued. "T got an early flight out of Dulles with one stop scheduled at Kansas City. There was heavy fog there and the pilot shot an instrument approach and missed. So we went to Omaha and unloaded all the Kansas City passengers". The QRPer gave us a quizzical look and went on. "You know", he said, "We sat on the ramp there at Omaha for two hours.... and they were trying to locate some dinners to put aboard the plane. All they came up with were some sandwiches. Boy! Were those stewardesses mad. So all the cocktaik and other drinks on the plane were declared complimentary". By this time the QRPer was getting our attention. "What happened then", we urged him on with. "Well", the @RPer said, "there was only about fifteen passengers left

him on with. "Well", the GRPer said, "there was only about fifteen passengers left on the plane and they were singing and dancing in the aisles all the way to San Francisco...and they were still most happy and singing when they got off the plane. As for myself, all I had was a cup of coffee. Had to drive home you know". "You had coffee with your singing and dancing", we asked a bit incredulously. "No", the QRPer said. "Only coffee..no singing". Son of a Gun, what could we say. There he was in playland in the Sky....and he asks for a cup of coffee. \$9.00 for a full year of hints on how to miss the good ones...\$10.50 brings it airmail. Like youth, some of the good things....and happenings in life....are wasted on those who cannot use them.
