49-73

MELLILA The EA9AA effort has been put off for one week and is due to open next Monday, December 10th. One of the participants in the upcoming effort had some business problems and could not make it this last Monday.

The plans call for a full five days of operation from EA9AA. All bands probably will be used but with the initial activity on fifteen and twenty meters. The frequencies to watch will be 14210kc and 21260kc, present indicators are that they will be transceive on these frequencies. If there is action on the other bands, the frequencies will be announced.

EA9AA will look for the Western Reaches on the longpath from 1430Z to sometime after 1500Z each day. When the longpath is in other callers probably will not be recognized. After 1630Z each day the action will try 21260kc transceive. These frequencies are the indicated ones but may be changed due to conditions.

Equipment at EA9AA includes a linear and a beam. EA5AX has been pounding in on the longpath in the last week and with consistently strong signals.

SAN ANDRES W9UCW and W9YYG will be on San Andres Island on December 29th and plan two weeks of operation with the HKØ call. The operation will be from the Hanza Club Villa and they will be active on all bands..160 through 10 meters, c.w. and SSB. Francisco, HKØBKK, will be in on the activity and there will be emphasis on the 160/80/40meters. HKØBKK will be on 160mtrs while W9YYG/HKØ will be the call used on 80/40 meters.

There will be one day of operating from the island of Providencia which is about 50 miles north of San Andres. There probably will be no 160meter action from Providencia, the trip being there to help those working on their IOTA count.

Gear will include a FT101A and on the lower frequencies they will use a 50' top loaded vertical which has worked well in the past.

W9UCW, Barry Boothe, has operated from San Andres before, having visited there in 1971 and 1972 when HKØAI and HKØBKK helped them get organized and on the air. In 1971 Barry and K9CQV worked on getting up 40/80mtr antennas for HKØBKK, putting up center-fed dipoles at that time. On this trip they plan to hang some new dipoles from the 60' tower now in action there.

The following is a tentative schedule and the frequencies though it is not planned to follow these as fixed.

160mtrs - CW	Transmit 1805kc	Receive 1824kc
SSB	1805	1820
75mtrs. All Over	-SSB	40mtrs cw-7025kc SSB All over
20 mtrs c.w. -	14025kc	SSB 14270kc. Daily sked with W9YYF at 0000Z
15 mtrs SSB	21310kc	10 mtrs 28600kc

After their arrival and setting up the operation in the Presidential Suite at the Hanza Club Villa, they will make any possible schedules.

San Andres is about 150 miles east of Nicaragua and is about 8 miles long and 2 miles wide. After San Andres W9UCW and W9YYG may detour to Cali signing HK5 and to Barranquilla to sign HK1.

SUNSPOT LOUIE W8ZOK returned home a week ago, and the reports are that the fishing for groupers in the Florida waters was a rather discouraging proposition. Then after he got home cloud cover has prevent any solar sights and the last good look was on November 22nd when there was one spot about 8000 miles in diameter visible. Maybe things will improve for next week.

Comet Kohoutek should become increasingly visible in the morning skies during December and it may pay to check about an hour before dawn in the southeast skies. One of the magazines on astronomy said that WWV may be giving reports on the comet but as yet we do not have the schedule on this one.

SHORTLY NOTED This issue has not been easy...the staff going 60 miles south to San Jose for a ARRL Pacific Division Directors meeting on Saturday. We will be late at the Post Office but maybe not too late. But should the bulletin be late this week do not beat the poor, innocent postman. It was not his fault. Also, it is full throttle and no time for any of the niceties of life. We will try to arrange to catch those later.

We picked up some more information on W6GSV. Ed Bookbinder was a bachelor and on his passing last April, the estate was handled by the County Administrator. Just about everything in his office was disposed of as valueless except for one item which was carefully preserved by the Administrators staff in the belief that it had some value. This was W6GSVs DXCC Certificate. It seems that most of the estate was settled without the administrator even knowing that W6GSV had a residence.

It may also be possible that remittances were discarded and if you have sent a check and it did not clear, it probably never will. There are a lot of loose ends and it seems that some will never be unraveled.

The rumored changes in Burundi are still not clear. Some sources say that all the amateurs will be off the air...other reports say that there may be a change in call signs. TR8SS is only about 25 miles from Equatorial Guinea-3C but says that nothing in the way of operations seems possible this year. The licenses are a bit difficult to pry out and he is going to keep trying and aiming for something next year.

The FCC is going through some reorganization and realignment of duties. Some of the divisions are being renamed and the initial reorganization in the various divisions in the field should be completed in about 60 days.

That ON50 prefix was a special one to mark the 50th anniversary of Amateur Radio in Belgium. Was only used over a 24 hour period. VK9ZC shut down last week on Willis Island and split back to Australia on November 28th. KH6HDB on Kure is going to take a trip around the Pacific and is planning to visit Tahiti, both Samoas, Fiji and the Cook Islands. We are not sure if we mentioned it before but XV5AC has had good success in working into the Western Reaches on 160mtrs in the last month.

Speaking of that area, it seems that some plans are jelling for possibly another effort at Spratly sometime after the first of the year...most likely February. This effort may concentrate on working all the Midlands and Eastern Seaboard which missed out last February on 1S1A. By the reports, about 110% of those needing Spratly missed out that time and this upcoming one may cut that down a bit.

OSCAR 6 is available on morning, descending, orbits on Tuesdays, Fridays and Sundays GMT. Ascending orbits, evening, will be on Thursday, Saturday and Mondays GMT.

4 December 73

CALENDAR

MELLILA	EA9AA next Monday, December 10th, for five days
BHUTAN	W6KNH on way to join VU2KV for effort starting around Jan 1st.
SAN ANDRES	W9UCW and W9YYG from December 29th
BRJA NEUVA	Activity by WØ-group expected in late December
CAMBODIA	Don Riehof in Phnom Penh through December....action expected.
PHOENIX ISLAND	Sometime in January....if all jells
PJ1	Special callsign during December
ARRL 160 mtrs	This weekend....December 8/9th
ARRL 10 mtrs	NEW! December 15/16th
ARKANSAS DX MEET	Trade Winds Hotel in Ft. Smith....December 8th...this weekend
WORLD DX TEST	The World's Championship...starts January 1st
SPANISH TEST	CW...December 8/9th

QSLs etc We thought that after running a couple of pages we would be ahead of the game but there are still a few to run by the thirsting DXer...

WB2KEA/VP7 can easily be QSLed via WA1HAA..along with WB2KLL/VP7. These two are on Eleuthera in the Bahamas and WB2KEA/VP7 is trying to corner a 5BwAS. 9K2AU can go to Box 77, Kuwait....or you might try it to: M.B. Harada, Kuwait-Dept of State, Washington, D.C. 20521. There is a saving possible on postage.

VK9ZB can be QSLed via VK3MK Box 708F, Melbourne, Australia 3001. ZF1TW active recently in the DX Tests can be QSLed to WB2JYM.

W2MIG has taken over the QSL chores for 8R1CB. Ed has a schedule with 8R1CB on Tuesdays at 2300Z--14275kc. Ed also schedules VP2SQ...and anyone needing a QSL for VP2SQ can route the card sase to W2MIG. Ed also supplies 9V1QD for anyone who might have worked him there in SEAsia when he was active there.

CR3AH goes to Box 200, Bissau, Portuguese Guinea. 4C5AA seems to be XE1IIJ operating under a special call in the recent test....QSL to W2GHK. 9Z4AA goes to W6CUF who reportedly has a two-letter call but still does business behind the old facade. EL7F to DK5BH...TR8SS to DJ5IO.

Anyone with the QTH for F6CLW who is the QSL Manager for 3V8CA. Recently we listed the QSL manager for ZS5PG and put it down as K6AKV...which is wrong. It should be K6AQV..Fred Shidell who also handles the cards for ZE6JP and JY6FC/JY3ZH. Also 3V8DM goes to VE6HN and not HM. CR7RM goes to WØGX and CT2AZ to WØJHY. EL4D to WA5ZWC and everyone wants sase if you want QSL.

A card for SY5MA went to W6TSQ...Sam says it is not him but rather W4KA who is the QSL Manager for this one. Also that his busy schedules on the low frequencies precludes any QSL Manager duties. Sam spends most of the night reading DX bulletins over the air to Russians in Eastern Siberia. If you don't believe that listen for UAØFGM around 3620-3630kc from 1300Z on Tuesdays. UAØFGM often rounds up other Russians to run them through the QRM mill for additional contacts.

CROZET FB8WA is a new operator on Crozet, opening up middle of November. Has a beam and a TR4 and will be active on both c.w. and SSB....fifteen and twenty meters. One problem is that he speaks only French so c.w. might be the best possibility.

GRENADA W5QBM, Joe Johnson, who has been on a number of DXpeditions in the Caribbean area, the latest being the VP2M effort in the CQ Phone test, has decided to make an extended stay and has leased a residence on Grenada for a year's stay. Joe is shipping a tower, antennas and gear for a year of operating from this island, the callsign being obtained after he arrives there the last part of December. He expects to be all organized for the ARRL DX Test in the Spring and QSLs will be handled by W5MYA, his companion on several Caribbean efforts. Joe is even taking the family dog along so the canine can have his vacation also.

TNX to W1AM, WA1HAA, K1ZCD, K2BT, W2FPM, W2MIG, W2OVC, K3ZOL, K3TUP, W4BAA, W4EH, W4GTS, W4HU, W4KA, WB4KZG, WB4SIJ, WB4TPU, W4TUC, W4UF, WA5EMH, K5FKD, W5QBM, WA5WEY, WA5ZUH, W6AOA, K6AQV, WB6BJS, W6GVM, WDX6GXV, W6MI, WA6MWG, K6OZL, W6TSQ, W6TTS, W6TZD, K6UFT, K6WD, K6WR, W6YHT, WB6ZUC, W7YBX, W7YR, W8IBX, W8ZOK, WA9JDT, W9DRL, W9UCW, W9YRA, W9ZTD, WØJRN, WØNDX, KV4AM, G5BAU, HS4AGN, G3RFG.

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of the local QRPer had been having trouble with housecats lurking in his garden to entrap birds at the bird-feeder. So when we came across him after a lapse of time, we asked about the cat situation. "Fine, fine", the QRPer beamed. "I get rid of those cats with gum drops..the large kind". You know, we thought things over a bit but this just did not jell. "Gum drops?", we asked and the QRPer smiled his beady-eyed smile. "Yep, gum drops did it", he said and we just had to ask how this worked. "Well", the QRPer continued in answer to our query, "I have this dog which has no interest whatsoever in cats but is always ready for some spare grub. And along the way I found out that this dog is nuts over gum drops. So when I see a cat in the garden I just hurl a gum drop at the cat. The dog takes off after the gum drop, the cat sees the dog headed at him and thinks his time has come. The cat then takes off in a mad scramble for sanctuary. The dog gets the gum drop and I get rid of the cats. See?". Son of a Gun, you know something? We suspected that this QRPer was pulling our leg. "That doesn't sound just right", we told the QRPer and he started to bristle. "It works, doesn't it?", he demanded and what could we say? Maybe we'd better stick to DX reports and forget about cats, dogs and gum drops. Wonder if anyone has the handle to this puzzle. What can you say to something that works?

??
