PALMYRA There are a number studying a possible KP6-Palmyra operation and one group has already declared its intent. Walt Schroeder, WB2EXK and Bob Sullivan, WØYVA, are aiming for a mid-year operation with the date tentatively in the period from mid-July to mid-August. The operation will concentrate on the c.w. side of things and will work all bands..ten through eighty. The team plans to visit both Palmyra and Kingman Reef.

Because of separate administrations, the operation looks for Kingman Reef being accepted as a new country. Kingman Reef, 35 miles northwest of Palmyra, is under U.S. Navy jurisdiction. Palmyra is administered by the U.S. Department of the Interior. Kingman Reef is not exactly a spacious area, at high tide is measures about 35 feet by 150 feet and is looked upon as more a navigational hazard than a tropical paradise.

The group is looking for any available information about these islands and the area in the Pacific about them. Anyone with helpful information can send it on to Walt Schröder, 121 Wayside Drive, Cherry Hill, New Jersey 08034

BANGLADESH A Swedish licensee has been reported from this former East Pakistan area and is consistent enough to get attention. While reports of QSOs with stateside stations are practically non-existent, Pete, HS4AGN, passes along some information. The station is SM2DWH/S2, the handle is Eric and he is located at Dacca. Any QSLs should go via the SM-Bureau. The best time to look for him is from 1200Z to 1600Z and possibly only on weekends.

CLIPPERTON Nothing new. Some word that the University Zurich/Friburg were working on the plans and expected to be in communication with some stateside groups for information or other matters. However, nothing surfaced up to last weekend and it is expected that something will be coming soon. Keep hoping.....!!

EQUATORIAL GUINEA TR8SS will be traveling to the capital of Equatorial Guinea sometime in April and he has applied for a 3C=license. If this one jells, the action would come possibly in mid-April or around the Easter period.

SEAsia DX W7PHO is being found around 14225 most evenings from 2330Z and a number of the more exotic DX Stations have been dropping in. In recent weeks this has included XV5AC, XU1AA, VS5MC, VS6FJ, XW8FA, XW8FN, YBØABK, KC6VE, KC6MW and HL9VV. Some of the middle states stations say they may lose the signals after an hour or so but while the band is in, there is some rather good DX there.

ZAIRE Some 9Q5s continue to show in the last week which would indicate that either the mile per QSO tariff is being ignored or that there is something else in the woodwork. Anyhow, 9Q5ZT was in there last week, 14031/2155Z and working QSOs in contest style though. it was not a contest period. He was also reported again on February 6th at 2200Z which would indicate his possible operating time. 9Q5DX was also reported, showing at 14205/2040Z a couple of weeks back. This one has shown up repeatedly and also looks good.

SUNSPOT LOUIE Cloud cover is still hampering regular observations of the sun and the last possible observation on the first of the month showed nothing....nor had there been anything of note on several previous days when it had been possible.

Up to the middle of last week WWV was giving N5 and N6 propagation forecasts but things were during the ARRL DX Test were hardly anything to get excited over. As of last Saturday the bands did seem to be somewhat better with Europe coming through to the West Coast on Saturday mornings. It might be noted that while no significant sunspots were noted at the last observation, it is always possible and probably that minor solar activity is in progress which will affect the band conditions. Keep hoping! Sunspots will rise again!!!

(Sob!)

W8ZOK

SHORTLY NOTED CR9AK has not returned to Macao as yet...and no one knows anything about any date when he may show up. VS6AW will be leaving Hong Kong next week after about 9500 VS6=contacts but without the CR9 action he had hoped for. Doug expects to be signing a HL9=call sometime this summer.

KZ5SD who is handling the QSLs for HC8GI is away behind in filling the demand for cards and one will have to practice patience. The amount of QSLs coming in is a bit more than expected.

There seems to be nothing really imminent on the Bajo Nuevo and Malpelo plans which were announced some months back. They have not been forgotten...just postponed a bit while some logistical and financial problems were worked out. There are some studies going forward and these will surface one of these days....they always do if you wait long enough but a long wait should not be in the books for these...

Don Riebhof is still putting XU1AA on the air regularly though Don has noted that it may be necessary to leave all the gear, tower and antennas behind should there be an undesired shift in conditions there. Cut and run...and forget about taking down the tower and beam with the artillery rounds inbound....

The plans for another Spratly effort are looking bleak with the energy crisis offering some problems and there being a lack of suitable vessels in the area for transport. Possible charter rates are escalating and the hope to open Spratly to those areas that could not get through last time is not especially bright for the next several months. There are some still working on the problem and Don still hopes to leap from the boat to Spratly one of these days, proclaiming: "I have returned.....".

New officers for the Northern California Contest Club are: President W6RGG; Vice-prex and Contest Chairman WB6AIN (ex WB4YOJ); Secty-Treas WA6NLQ and the Directors are W6HQN and W6PAA. The Jr Past President is W6OAT.

Nothing ever developed on that Chad report...it was a 'maybe' thing to begin with. On Bhutan, Clyde-W6KNH, was due back home in California last weekend and it would seem that things are off until the next time. The Southern California DX Club has asked ARRL President Dahmels to get out more information on the matters the DX Advisory Committee is studying so that interested DXers may comment before the DXAC takes any action, stand or recommendation. Also some study possible on redefining aims of DXAC.

SOME NOTES If you should catch a TV movie "Strangers at Sunrise" on the late show, you might note that Avril Pearson, a child star in the movie which was made in South Africa, is the son of ZS6MP. George Montgomery and Dina Martin are also in it. In the REF test at the end of January, one station was signing FBA5L/74. Wonder how many repeats were asked on that one? In spite of the dead conditions, some 10 n/s paths opened during the ARRL Test. It might be noted that Bob White's birthday is in November... #310 in the 5BDXCC went to K6WR. Brad says it took almost as much work to get the QSLs as it did to work the stations...

SOME QSL INFORMATION One deserving DXer seeking the address for K6SE to QSL for the recent PJ8SE and PJ6 efforts, checked the Callbook, the FCC and magazines and came up with three addresses. We could have given a fourth. This is John Irwin, K6SE/2, who teaches in the Earth/Planetary Science Depart at Newark State College in New Jersey. QSL to 578 Morris Ave Apt A-6, Elizabeth, New Jersey 07208. On that VR1PD, W6LUVs address is only correct in the 1974 Call Book. VR1PD goes to Frank Ulrich, 424 Direction North E, Lompoc, Calif. 93436. Actually the callbook gives it as 424 NE, Lompoc, Calif. However, either version should get it delivered and the first one was being given over the air last week to 9M2CJ. Send sase/2 IRCs. DU2EL QSLs to: Don McCarthy, P.S.C. - 2, Box 18873, APO San Francisco 96311. Those trying to QSL FP9CA might as well give up the effort. K2OJD who was FP8CA from 1962 to 1969 and FP0CA from 1970 to 1972, advises that the call was retired and that any recent operations probably was St. Pierre Slim.

FCC/CALLSIGNS There are some recurrent rumors that the FCC will issue a proposed rule making item sometime in March and this will deal with the revision of the amateur licenses, both with regard to privileges and the prefixes of the license itself.

The matter is rumored to be a wrapping together of a multitude of petitions into one package, some of these petitions going back a good number of years. The intent would appear to divide the amateur license into two categories, one to cover the lower frequencies and which would require a code test. The other would be only for the VHF/UHF frequencies and might possibly be a non-code license. In most instances two separate licenses would be required to cover the full amateur frequencies. It is possible that the Extra Class license would cover the full spectrum. The proposal would cover the matter of special identifying prefixes, grandfathering and a number of other recurrent proposals. There is also some rumor that the FCC may change its method of administering the code tests....or even the amateur test itself. Anyow, something is brewing on the banks of the Potomac.... Be Prepared!!

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of the local QRPers dropped by last week, worried as usual. "What can we poor, suffering DXers expect", he asked, "when everyone and everything is against us?" The sunspots are falling and some say they will never rise again in our lifetime. All the special interests groups are aiming to carve up our sacred frequencies. And there are times when I feel both unwanted and unloved". Son of a Gun, what could one say to this opener? So we hauled him over to the Old Timer who listened to the log of these melancholy days. The Old Timer thought a bit and finally said. "It's an illusory world. And things were never quite the way we remember them. And they never will be quite the way we anticipate them". The QRPer looked at us and asked: "It sounds good, but where's the handle?". While we seek the answer to this one and the memory of the rose dawn on twenty fades, look for us on eighty. \$10.50 brings the dawn's early light by first class mail...\$12.00 flies it exceedingly fast..
