## Bulletin

+++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++  
April 2, 1974 14.

SOUTH SHETLANDS VP8MS, Peter Fitzgerald, will operate LU1ZC from the South Shetlands for two days beginning this Thursday, April 4th. The operation will be with a transmitter that is crystal-controlled and the operating frequency will be 14205kc. The listening frequency will be in the 14210kc area. Plans call for activity from 2300Z to 0400Z during the stay there and this is somewhat dependent on his being able to get the time from other duties. VP8MS is with the British Antarctic Survey. QSLs for the LU1ZC==South Shetland effort will go to K4MZU.

SOUTH GEORGIA Later this month VP8MS, Peter, will open from another antarctic spot and will operate from South Georgia from April 20th to the 23rd, a possible five days of operation there. This operation will have 14195kc as the operating frequency and the listening will be above 14200kc. Peter will be listening for stateside stations from 2200Z to 0300Z. Again, this one will QSL via K4MZU. There is a possibility of a new operator being assigned to South Georgia to put in a twelve month tour there. At South Georgia VP8MS will find a station already to go and with antennas already up. At the South Shetlands it will be necessary to assemble things.

Mt. ATHOS Things are still developing for a possible Mt. Athos effort by some OH operators this Spring and the present indicators are that it may come in mid-May rather than in April as had been originally hoped. All the details have not been firmed on this one though it does look good.

JERSEY Amateurs on the Channel Island of Jersey are planning a 'Jersey Activity Day' next month, aiming to put the club station GC2DVC on the air on May 4th and 5th. At the same time other Jersey stations including the one often heard, GC2LU, will also be active...this being both c.w. and SSB.

MACAO While there has been no indication that Fern, CR9AK, has returned to Macaco from leave in Portugal, it is reported that Chester, XV5AC, will be in that area in early April and will try to see if he can get CR9AK on the air for some activity. Chester will be shutting down XV5AC and leaving Saigon soon and will be returning to the states. His next assignment will be in South America and he probably will be back on the air sometime in July, possibly from Caracas. Possible future activity from South Viet Nam is not clear at this time as Don Riebhof is in Cambodia with XU1DX and it appears that he will be there for some time.

EGYPT VE6CBJ/SU1, in the Cairo area, is the newly active station there in the Suez area and Frank indicated that he will be active most days around 1330Z....down in the 14175kc area. You might listen in that area and it is reported that often there are phone patches being run for VEs. VE3AIL/SU left the Cairo area early in March. The gear at VE6/SU1 includes both a linear and a beam and the station has been heard in the middle states still coming through with a good signal as late as 1700Z. Frank has indicated that when he is not working to get the VEs in the UN peace keeping duties in touch with those back home in Canada, he will listen above 14200kc...in the 14220kc--14225kc area and in the 14275kc area. QSLs go to VE1AL and should go only to the Sydney address....A.R Leith, 846 George St. Sydney, Nova Scotia.

 W8ZOK

Last week propagation forecasts from WWV were U-5 most days and on the date of this observation, March 22nd, WWV was handing out N-5 forecasts. Things probably will get a bit worse before they get better. But, as Albert would often say: "Things do".

HH2WF says to QSL to WA2JDT..which is his home call. SASE required but U.S. Postage okay as he is with the U.S. Embassy ther. in Port au Prince. Some who have had their QSL returned fro W9YYG/HKØ should try again. The correct address is Box 519, Elmhurst, Illinois. 60126.

ZF1AL who was in there in the second part of the ARRL CW Test goes to WA4SVH with the needed sase. BV2A comes through with a fast QSL .. once you have worked him. Ten days round trip. BV2A noted with his QSL to W2FPM that in forty years of operation he had not worked a Greenland station and was delighted to work OX4DL in the ARRL CW effort. 9J2BO there in Lusaka is listed as Box 2090 in the Call Book but gives out Box 2690 during QSOs.

It was the XV5AC logs that W6ISQ sent on to W1YRC. This was for the contest effort last Fall when John was zagging through SEAsia. On the XU1AA QSLs, KA6WS did act as m.c on some XU1AA activity. While the logs for the period of June through September of 1973 have been lost, Bill says that he did maintain a record of the log for the periods that he was in there as m.c. Send your QSL with sase and complete QSO info to: Bill Spencer KA6WS, Box 128 MCAS (F), FPO Seattle, Wash 98773. This does not mean that Bill is the QSL manager for XU1AA..only that he might be able to help with some for that missing period of logs...June to September 1973.

Joe 6CAZ

[illegible]

2 April 1974

CONSUMERS UNION/CITIZEN BANDS The national research organization, the Consumers Union, is doing work for a report on Citizen Band Radio and with especial attention being paid to Channel 9, the 'emergency' channel.

CU is asking for reports on the use of Channel 9 by anyone with CB gear. They ask that any reports be sent to CBR, Electronics Division, 256 Washington Street, Mount Vernon, New York 10550.

In their introductory paragraph, CU notes that while the FCC regulations are very clear, they "...may be more often breached than honored". On the emergency use of Channel 9, they want to know what sort of a response was obtained to a call for emergency help and how far away was the station that answered.

FRENCH ANTARCTIC/INDIAN OCEAN There are a number of active stations on the French Islands in the colder portions of the Indian Ocean and they seem to hang out in the same territory.

CRÖZET-FB8WB Hangs out in the 14120-14125kc area from 1500Z. Sometimes one of the African stations is in there taking a list for calls. FB8WB is said at times to listen for stateside stations making c.w. calls at 14125kc sometime around or after 1600Z. The operator is Rene and apparently he speaks nothing but French.

AMSTERDAM FB8ZB was also heard in the same territory and around the same times. The operator there was supposed to leave sometime last month. His replacement...should be an amateur....probably will show in the same area if he is active.

TROMELIN FR7ZL/T also showing in the 14125kc area from about 1545Z. Often talking with the other French stations. This one not exactly an antarctic station but often just as hard to catch.

KERGUELEN No recent activity has been reported, the last active one, FB8XA, was due to be rotated a couple of months back.

There are changes in these weather stations a couple of times a year and sometimes they work amateur radio, sometimes they stand outside waiting for a sight of the ship with their relief. Anyhow, they seem to be regularly meeting in this 14125kc territory and this might be the best spot to listen should you need them.

MORE QSL INFORMATION K3TUP is handling the 7P8AY QSLs. Cecil expected to have a beam up shortly. WA5ZWC is now handling the QSLs for 5N2ESH...Drake also handles the QSLs for EL4D...and does maintain schedules with them. That CF3CGK QSLs to Box 756, Brantford, Ontario. There is supposed to be an award for working three CF3s. QSLs for ZF1FOC and VP1FOC have been received....came via: Marvin Carter, Box 706, Old Spanish Trail, Bay St. Louis, Mississippi 39520. Said that he wants to QSLs for all those contacts he made.

KZ5PW, Pete Witcosky, is now handling the QSLs for HC8GI. Pete says to be patient as he has a mountain of QSLs to shovel through but all cards will be answered. Pete was in there last week running m.c. for HZ1AB and EP2VJ on 75 meters...3795kc at 0230Z. 5T5KJ goes to Box 6, Nouadhibou, Mauritania. QSLs for the WA7IXE/KP6 are coming through...WB8EUN getting his last week.

DAYTON HAMVENTION Brochure and registration form can be obtained by sending sase to Box 44, Dayton, Ohio 45401. Those who may be planning to drive can be advised that the HAMVENTION Committee has arranged for several stations to be open to service any who may need petrol to get home. Stu Meyer, W2GHK, will handle the DX Forum which starts at 0900 local time on Saturday. Barry Goldwater will speak at the banquet on Saturday evening.

ALBANIA There is a report of a W-operator planning to travel to Europe later this year and to try to find a spot where he can put a transmitter across the ZA-border for some quick operations. This has been done in other places...but "Be Prepared!!"  
+++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++

FOR SALE Tower..TRI-EX HZN-354 motorized, self-supporting tower...\$575.00.

Custom system for raising and lowering large antenna installations. This special system includes motor, reduction gear box, channel guides and 20 feet of 2½"x ¼" mast with associated hardware \$250.00 TH6DXX with Hy-Gain Balun \$110.00

2 April 1974

SHORTLY NOTED: ET3ZU reports that he is not planning any activity in the future except a holiday in Italy. Nothing further has been heard concerning the plans for K4DAO to head for Cocos Keeling this Spring. Last heard Vince was working in the Darwin area in Northern Australia. WB6BGQ who was the QSL manager for the CR8AM effort by Vince last year has been transferred to Japan by the U.S. Navy but he had not heard much from Vince in recent months on his plans.

9J2BO will QSY to 80meters on request. UA9VB has been heard in mid-March taking a list for JT0AE...14230kc/0230Z. This JT0AE QSLs to OK3AYO and there has been considerable JT-Outer Mongolia activity in recent weeks according to Red Eyed. K4IRQ heading down slope for 5BDXCC with four needed on Forty and seven on Eighty to complete the totals. Gary who has operated in the Northwest before going to Florida says he thinks 5BDXCC might be a bit easier from the eastern shores.

Lawson B Walters, KA2BP/WB8KAW, is handling the FEARL News now. Mail address for the Far East Auxiliary Radio Operators group there in Japan..at least for the editor, is Box 74, APO San Francisco 96525. Sam Yates, KA2AI, will be leaving Japan in middle of April and headed for the states... Well, he is getting as far as Hawaii. Sam's home call is W6PYT. WB4SIJ, through diligence, perseverance and the working of 654 prefixes, has been placed on the WPX Honor Roll (Mixed). You can still do it even in the soft portion of the sunspot cycle. 9Q5DX, Rich Davern, confirms that he shut down 9Q5DX on July 27, 1972 and as far as he knows, the station has been silent since then. AP2AD will be active when the bands are open...you can watch for him in the 14220-14225kc area from 0130Z. Often on a list operation. You might also watch for him at 3793kc from 1345....Wed-Sundays.

The AFRICANA NET has been operating every time the bands favor the deserving DXers and during the period two weeks back there was a number of good DX stations being heard on the West Coast on the 21355kc frequency. Among them were ZD8MF/6M8RB/SV0WMM on Crete/CR4BS and 5Z4NH. Jim McCook, who decided to give dentistry a rest and to head for the warm waters of Central America for some scuba work, was in Guatemala last month and was operating TG9YN.

Conditions on the WPX were not especially good at the outset. There were a number of exotic ones...more or less..scheduled to be on. ZB2WPX was supposed to be multi/single from the top of the Rock and Martin and Villi were aiming for action from 5B4..SV1GA was going to accompany them. The TE9s from Cocos were not heard up to mid-Saturday and there was doubt whether this one ever jelled.

On some other planning, we do not have any late word... On the possible BY-effort in mid-April, nothing recent has been heard. We ran a query through some Far Eastern contacts and as of last month there was apparently no arrangements made with U.S. officials in the area on the visit. Don't give up hope...there are still a few surprises left in life. However, we would still want some more definite information to brighten our day.

Nothing new on Palmyra or Kingman though there certainly are a number looking at this area. It would be surprising if the summer of 74 goes by without some efforts in this direction. On Clipperton, nothing new...not even some good rumbles.

But, do not give up hope easily. We know of efforts aimed at two extremely rare ones ....these being high on everyone's DX Needed List. And a third one in the top ten has shown some signs of action. There may be something on two of these in the way of hopeful news within the coming month. As Lord Baden Powell, the Hero of Mafeking, would often say in the chow lines. "Patience, men. Patience". A number of decades later we were still waiting in lines...Old Bob did teach us patience.

We still get grumbles over the delivery of the WCDXB. The problems that brought more or more complaints of a year back....namely restrictions on manpower...have been long gone. The Postal Service guarantees second day delivery of airmail and third day delivery of 1st Class anywhere within the lower 48. We mail on Saturday...airmail should be delivered everywhere by Monday and 1st Class no later than Tuesday. If you are not getting this regularly, write to your local postmaster and ask him to forward your complaint. Write..don't talk with them...write and include the postmark portion of your bulletin with the delivery date noted thereon. Actually, there are areas where problems exist while other areas have no such comparable problems. Call attention!!

# CALENDAR

SOUTH SHETLAND	LU1ZC for two days from April 4th...twenty SSB only.
SOUTH ORKNEYS	LU1ZC for five days...April 20-23rd...
Mt. ATHOS	Possible Spring operation...looks like May now
ANGUILLA	K2FJ there until April 7th...
EUSTATIUS	PJ8DX April 8th thru 12th...by K2FJ
KD4ITU	Stu Meyer in World Telecommunications Day..May 11th to 19th
WS7MVM/WS6MVM	During the Mercury fly-by....until April 3rd
JERSEY ACTIVITY	GCs on May 4th and 5th....SSB and CW

THE MILLION DOLLAR STATION The Harmonic Hills Radio League, 23 New St. Katonah, New York 10536, has set up a trust fund to help W2OVC in his legal fight with the neighbors who are suing to put him off the air.

The FCC made an inspection of the W2OVC station on March 12th and found everything proper and in order. Some court action was due the latter part of March and this may give an inkling how things are going in the Gilleran et ano vs Mendel case... Any one who may be interested in helping in this matter can direct their help to WB2KDE, Tony Anzevino at the Harmonic Hills Radio Club, the address is above.

On the raising of the license fees...amateurs slated to pay \$10.00 for a new or a renewal and \$5.00 for modification without renewal. There was a Supreme Court decision in a Cable TV matter and the FCC followed this with a notice that there would be more study on the license fee raising due to go into effect May 1st. Probably more on this during the month.
