

# WEST COAST **DX** BULLETIN

July 15, 1975

27-75

MT ATHOS Though there have been some minor changes, this one looks rather solid for the coming week-end. All the necessary papers appear to be either in hand or were expected momentarily. Some of those who had been mentioned as possible participants have had changes in their plans and of last week it was shaping up pretty much as an all-Hellenic effort. In addition to Aris, SV1GA, it appears that SV1DB will be in on the operation plus other operators.

The plans are to gather in Athens this coming Saturday and then on to Mt. Athos with arrival there expected on Sunday, July 20th. The forecasts look good and at this point all you can do is wait in anticipation....

BURMA Band conditions were not good but then again, neither was the news from the SEAsia area. Robin, 9V1RR, did go to Burma but he could not get all the gear aboard the plane. In fact he could not get all his needed field struments aboard, this being the gear he needed for the h.f. communication survey he was to make for the Rangoon government. A slight matter of weight limits....

Word out of Hong Kong last week was that it is possible that Robin will have to make a second trip to Burma. More information on the possibilities of amateur operation may be developing but at this point it is a waiting game.

FERNANDO DE NORONHA PUØYS and PVØAKL were not heard as expected and nothing is known of what the problems might be. The last direct word from Joe, PY7YS, in June had things rather definite. There has been a third-hand rumor that the effort was put off for a week and may show around July 13th. If it did, you may have heard it by now.

TUNISIA Jorma Saloranta, OH3XZ, passes along the information on a projected OH-effort in 3V8-Tunisia. This will run from August 1st to August 15th and will include the operators OH3XT/OH5UX/OH3XZ.

The group have asked for licensing and the assignment of the call-signs 3V8CW and 3V8DX. As of last week Jorma was figuring that they had better than an even chance of getting the licenses. The problem at this point that the licenses must be applied for in person in Tunisia and they will be a bit on edge until they get the permission in their hands.

The gear will include a Kenwood TS-520 with a 14AVQ and a dipole for eighty meters. They plan to use both c.w. and phone all bands and reportedly will be asking for a special license for the eighty and fifteen operation.

QSLs will go to OH3XZ.

8Z4 Saudi/Iraq Neutral Zone Over in Saudi Arabia, Iraq and Saudi Arabia delegates meeting in Riyadh signed an agreement on July 2nd to delineate their borders. The borders, which have been in dispute for years, will be drawn to equally divide the neutral zone. The border will then be a straight line with each side keeping an equal share.

This probably will eliminate 8Z4-Neutral Zone as a DXCC Country. The activity there has been rather sparse and when Geoff Watts ran his 'Needed List' last year, 8Z4 was No. 6 in the needed ones.

SUNSPOT LOUIE After the magnificent showing of last week when it was possible to note that a single, large sunspot had appeared, this weeks finds us back in the ruts as the cycle bumps its way long the bottom.

That large spot rotated to the back of the sun on July 6th and propagation dropped. Band conditions were not good in the last week and probably will continue low through this week. It might be noted that around the Fourth when the effects of the sunspot might be noted, the East Coast was working into Europe on ten meters. Remember the days when the sunspots would be numbered in the hundreds?

A note passed along by W8ZOK relays come comment by K3EC who noted that this large spot observed around the first of July was trailing three small spots when it crossed the center meridian of the sun on June 30th. The sunspot diminished in activity and was noticeably less active on July 1st and the small trailing spots had disappeared.

We ran a check with the Palos Verdes Sundancers on their summer plans. "We were going all out for the Fourth of July....had to help with the tourist traffic, you know", the leader reported, "but we will rest until it is time for the Mt. Athos effort. We drafted a new bass bongo beater and 3B will certainly help us". You know something, we're passing this along just as it was told to us for there are mysteries in the heaven that as yet we do not understand. A 3B?

But with W4UMF we are able to get a better grip on things and Ted comes roaring out of the East with the latest up-date. No bongos!! No jump and jiggle!! Just straight flux!!!! Ted reports:

Jul 14	Below Normal	July 22	High Normal
15	Low Normal	23	High Normal
16	Low Normal	24	High Normal
17	Low Normal	25	High Normal (Possibly
18	High Normal	26	High Normal Above Normal)
19	Low Normal	27	Below Normal
20	High Normal	28	Below Normal
21	High Normal	29	Low Normal

There you have it for Mt. Athos. Ted did his best. Conditions are expected to degrade late on the 26th but if they hold up as predicted, things should go well.

W6TTS says that last week conditions were so low at times that he could not copy WWV. Gene said that if he could not copy WWV, there would have been scant hope for Burma.. always a consoling thought. Anyhow, the Solar Flux went like:

Solar Flux			A Index		
July 1	76	13	July 5	74	6
2	74	7	6	74	3
3	75	8	7	72	12
4	74	9			

Check WWV at 18 minutes after the hour and you will get the figures to help you with your charting.

WWV out of Boulder says that conditions should be depressed during the first of the week with things improving after that. Solar activity is expected to remain low. A geomagnetic disturbance which started on July 8th made conditions unsettled and this minor ionospheric storm was expected to continue to about July 15th. The predicted semi-monthly revised ionospheric predictions calls for a smoothed sunspot number of 17 to the end of July. While the smoothed number may show the long-range trend, conditions could be up sharply while the numbers stay low. Check your flux. It definitely is more revelant to existing conditions.

Chart for interpreting Quality of Propagation  
as predicted by Radio WWV, broadcasts. Every  
hour at 14 Minutes past 2½, 5, 10, 15 etc. MHZ

—Intersection of given values of solar flux  
and geo-magnetic activity determine expected h.f.  
ionospheric propagation conditions. (Example: S.f.  
—80, Ap —25; expect Below Normal conditions.)

DX MEETINGS A number of major DX meetings will be held in the coming months..some are regional, one is national. DXers may be interested in and wish to participate in some of these meetings. Often these are the places to make your opinions heard. For as W6TSQ often says: "What's good for DXers is good for Amateur Radio!". And all we can say is: "Sam, how do you come up with all those pithy sayings?" and all he says is "Practice!!". Anyhow, here's where you can meet the other Deserving DXers:

NORTHWEST DX MEETING

Bob Ferrero, K6AHV, will give the Kingman Story.  
August 2/3rd. Doubletree Inn, 205 Strander Blvd. Seattle  
Write: Western Washington DX Club 5608 37th Ave SW  
Seattle, Wash 98116

SIERRA HAMFEST

August 9th. Reno, Nevada  
Nevada Amateur Radio Assn, Box 2534, Reno, Nv. 89505

ARRL NATIONAL

Reston, Virginia....outside Washington on way to Dulles  
Check recent QST for details

W9DXCC MEETING

23rd Annual Meeting. Itasca, Illinois  
September 20th. Write for details to: W9ZTD/W9ZRX/K9OTB/  
W9VNE/WA9FUD or WA9BWY

NEW ENGLAND DX MEETING

October 4th Holiday Inn, Waltham, Mass.  
Write: Tony Berg, W1VAH, 11 Vanderbilt Rd, Action, Mass 01720.

There's something for most everyone. DX should be important at most if not all of these. Make sure you attend the DX Forum. This is where the DXer should be prepared to voice his opinion....short, brief and to the point. The ARRL Forum is another must and often DXers are noticeable by their absence there figuring it's all for the traffic and Sister Cities types. Get in there and speak up. DXers are smarter and more technically qualified than most amateurs. Give Amateur Radio the leadership it needs. Tell how you'd do it. They may give you the chance!

SHORTLY NOTED We are still getting airmail renewals and we still keeping running up the flagpole the fact that the Post Office is moving to discontinue airmail as a service for the letter mail of light weights...it will still be available as a priority item for heavier items. By this time next month it may be pretty definite. As as of August 1st we will not take U.S. airmail subscriptions. This puts us back right where we were in 1968 to 1969 when we would not take such subscriptions as there was little advantage in earlier delivery. We admit we had to change our minds.

This last week has been a loser. Word has come through Japan that 3B8DL will not be going to Rodriguez in the foreseeable future. This came from another 3B8 on July 5th and 3B8DLs QSL Manager is reporting that he has not heard recently on these plans. There has been more confirmation that Sikkim and Blenheim are being scrubbed though nothing official has come across the desk....or we lost it somewhere. Speaking of Blenheim, Don Miller will be at the W9DXCC meeting in September. That's Dr. Don Miller, W9NTP, who was recently on an archeological trip to Easter Island. Definitely not the other Dr. Don Miller but the question still comes up. W9CTY a newscaster for WBBM in Chicago will be the host at the W9DXCC....he was also reported as possibly being in Nepal in September. Don Riebhoff expected to be in Portugal last week, arriving there on July 10th. He has applied for a license and expects to be on the air around August 1st. The Andaman Islands, if you check the Call Book, has VU2DSN/VU2RNI/VU2RSR/VU2VNB/ and VU2YAK listed....VU2ANI is another one to be found. VU2ABC now back in Washington, notes that often people fail to check things out and figure that VU2 is just another Indian... W9SZR sent in this list of stations on Andaman which are listed in the last update on the DX Call Book. This is another edition which pushes the weight limit. If we missed anything, you will know why. Even at the bottom of the cycle there is more DX news available than we can fit in each week. Some day we will work up to a 'New York Times' edition of DX items.

5 July 1975

CBers and STUFF LIKE THAT FORBES Magazine in their July 15th issue notes that it is not hand-held calculators which are the hottest-selling consumer electronic product but rather Citizen Band Radios which sales are growing at 30% a year while the calculators are only up 13%. Sales of CB gear was \$140 million in 1973.....they should reach \$350 million this year and \$500 million next year. Many electronic retailers report CB gear as the hottest selling items. License requests are reported as scaling 200,000 per month.

Some point to the fuel shortage and the truckers strike as triggering the interest in CB gear, the publicity that was given to those matters got a lot more people interested. Prices have declined and where the price of a good piece of gear was \$250.00 a couple of years back, the switch to integrated circuits has brought the price down in some instances to less than \$150. Tie-in sales of scanners are also going well with house-wives among the biggest buyers.

70% of the CB gear is made in Japan but E.F. Johnson and Hy-Gain Electronics are still significant factors in this field. Johnson in 1974 had sales of \$46 million and Hy-Gain of \$16 million. Johnson stock has gone from 10 to 48 this year and the share-holders equity has climbed to 22%. Hy-Gain lost money in 1970 and 1971 but in recent years has been turning a margin of up to 6% on sales and has averaged about 9% on stockholders equity.

CB gear is expected to be offered as optional gear by Detroit between 1977 and 1980. This may bring some of the bigger companies in the two-way radio field such as General Electric and Motorola into the field.

The use of CB gear by truckers and the like is not always harmonious....as some may have suspected. During the 1975 running of the Fourth Cannonball Baker Sea-to-Shining-Sea Memorial Trophy dash, the contestants using CB gear heard truckers whistling up the Smokey Bears when they zipped by. The feeling being that the truckers were using the CB gear to alert the patrol and ingratiate themselves with the locals.

Some may wonder what the Cannonball Baker Sea-to-Shining-Sea Trophy dash might be. It's a speed dash from the start at a garage in New York City to the Portofino Inn at Redondo Beach. You are clocked out in New York, run any course you wish and the crew to check in at Portofino with the least elapsed time is the winner.

This year the winning time was 35 hours and 53 minutes....that's total elapsed time from start to finish and included a speeding ticket in Ohio. Average speed was 81.0 miles per hour and the vehicle was a Ferrari Dino 246 G.S. Second place went to a Chevrolet pick-up truck which had 37 hours and 50 minutes elapsed time and averaged 76.8 miles per hour. The Chevrolet pick-up led some more exotic types such as Mercedes-Benz 450SL; Buick Electra; Porsche Carrera; Pontiac Firebird; Porsche 911. One contestant was a TRAVCO motor-home which covered the distance in 45 hours and 35 minutes and a Bristol 410 Saloon!!

Speeds well over 100mph are maintained on sections of the Cannonball. 61 vehicles have made the run, putting in over 52,000 highway miles without an accident.

Bet you didn't know all of that before.....

CARIBBEAN K0SGJ, Lawrence Robinson, was looking up celebrate Bastille Day in St. Martin as FS0BUY and will be there July 14/15th and then on July 20/21/22nd. In between he planned to hit FG7-Guadeloupe; FM7-Martinique; VP2A-Antigua; VP2E-Anguilla; and PJ7. You can add up the countries and figure the days and you will probably conclude he will be one day at each stop.

MOZAMBIQUE It would appear that new call-signs are being used in the CR7-area and W6YFR reports working Joe, CR7JO who was signing C9MJO. Joe was at 14217kc at 0730Z on July 6th. Said to QSL to P.O. Box 3512, Laurence Marques.

NAURU C21NI being heard on twenty last week. Said to QSL to Box 29, Nauru. Was found mostly at the low end of the twenty meter phone band.

15 July 1975

REPORTS FROM RED EYED LOUIE

Breathes there the ham with soul so dead  
Who never gave up sleep and bed  
To work some foreign land

(Sir John Burke)

CANTON/PHOENIX John Dudek, KB6CU/VR1AC advises has a new address and it is....

John Dudek KB6CU/VR1AC  
 Box 1158  
 Canton Island 96736

John has been active recently as KB6CU....at 14336kc/0900Z on July 9th and was at 14291kc/0800Z on July 5th. Canton has previously been served by an APO but this would indicate that a U.S. Postal Facility is now on the island. Mike Berkwit, KH6GKD, should be heard from Canton/Phoenix this week and through the APOLLO/SOYUZ mission. Check 25-75 for Mike's operating plans.

15 July 1975

# CALENDAR

MT ATHOS	Rather solid! From June 20th....Prepare!
CANTON/PHOENIX	KH6GKD signing KH6/KB6 and VR1PE through APOLLO/SOYUZ

ALL ASIA TEST	CW....August 23/24th
CQ WORLD WIDE TEST	Phone....October 25/26th The Hour Nears.....
NEW ENGLAND DX MEETING	October 4th.....Holiday Inn, Waltham, Mass.

ANDORRA C31GN showed with good signals a week or so back. This one QSLs to DK3SF.

June 24th Issue Something happened somewhere and we have been shipping out replacement copies. That issue was mailed about 9:00p.m. on Friday, June 20th. All the reported missing copies were those sent by 1st Class mail and follow no pattern. Some have shown up late, arriving after the following week's issue of July 1st. If you did not receive the July 24th issue....(24-75)..advise and we will supply a reasonable facsimile.

BRUNEI Maurice, VS5MC, will be leaving around the end of this month and will take a long trip, heading for the United Kingdom and possibly on to the States in September. There is an outside chance that Maurice will be at the ARRL National at Reston, Virginia in mid-September. W2AUS has been issued the license of VS5WM, this being William Maddox, and he is expected to be on the air shortly. If you check the Winter Callbook, you will note they were looking for his address. Listen for QSL information.

JIM HENDERSON/ZM7AH Jim who operated from Tonga and the Tokelaus in past years, was to be married the last week in June and was expecting to settle for the time being in New Mexico, possibly in the Farmington area. This might slow some of the long-range scouting and patrolling Jim did in other years but it apparently has not completely dampened the planning as he was still mentioning some possibilities as the wedding day approached.
