

WEST COAST DX BULLETIN

October 14, 1975

41-75

CHINA We got a report from the Japan Desk on the China situation and it may give a bit more background on your chances of running across a BY-station on the bands....

No one has heard the BY2CP here. I asked all JDXA members but they say: "No!".

In early September, a secretary of a JA-legislator visited China, going with the JA-congressman. This secretary is a friend of a DXer in Tokyo and before the departure for China, this DXer asked the secretary to get some details on possible Hams in BY-land. At official talks in China, the secretary asked about amateur radio, directing a question to an official from the BY-telecommunications department. The reply was:

Communications to foreign countries from China is prohibited completely except for official stations.

Amateur Radio is well known to the By-telecommunications people. One high official in the China Telecommunications Department has met with a JA-amateur, possibly some official of JARL.

There have been visits or letters in recent years from JA-amateurs inquiring about the possibility of operations. No official reply was sent in return.

There are some kind of Hams in China, some technical schools appear to build transmitters and receivers as part of their technical training in electronics.

At this time, no license will be issued to foreign amateurs to communicate with foreign people.

Permission to do some experimental station work was issued to some group. Not certain if this was an amateur group.

At the present time it does appear that there is No Ham in BY-Land.... One bit of cryptic information that was relayed was that M....some....demonstration of ham (radio) is possible..... This matter was not clear as relayed by the JA-Desk, they acknowledging that they did not quite understand the significance of this statement. One of the difficulty was that the person seeking information is not an amateur and this is always a difficult hurdle in getting the sense of a talk.

Back on the banks of the Potomac, the FCC on October 3, 1975, issued a notice that effective immediately, the ban on communications between U.S. amateurs and amateurs in the Peoples Republic of China has been rescinded.

IRAQ W7KW will depart for Iraq on October 12th. An expert in hydroponics, W7KW is heading for Baghdad at the invitation of their Minister of Agriculture. It is reported that INDXA supplied a transceiver and antenna. Last week Bill was figuring he had a fifty-fifty chance of being heard from the banks of the Euphrates.

SUNSPOT LOUIE Some sunspot activity developed in the period since the last report, the sunspot shown on the chart first appearing on Oct 2nd. Visibility was not good on the previous day and it might have appeared a day earlier, being visible as it rotated into position on the face of the sun.

The spot is approximately 10,000 miles in diameter and of moderate intensity. It should be with us until it turns the corner and rotates to the back of the sun in a week or so.

Conditions have been moderately good below 21mc and even on the 21mc band there have been some fairly good, though brief openings. A check of the Red Eyed Louie reports will give you an idea of what is going on and to what areas is fifteen meters opening to.

With even a single...but vigorous...sunspot welcomed after a couple of weeks of blanks, the thoughts of every red-blooded DXer must turn in these October days to the CQ WW DX Test and the golden week-end coming. Just like those home-coming days at the old campus when the leaves are turning to yellow and red and gold and the thump of the pigskin is heard. What will the conditions be? Not too good.....

For the contest, conditions are expected to be depressed at the start but to improve gradually until late on October 25th they could rise to High Normal. It is not so much that the solar activity will be high....probably it will be in the high 70's.... maybe as low as 76.... but its that the geomagnetic activity should settle down on October 25th after a minor geomagnetic disturbance which should begin late on Oct 23rd.

What should the daily forecast be? Well, it goes something like this....

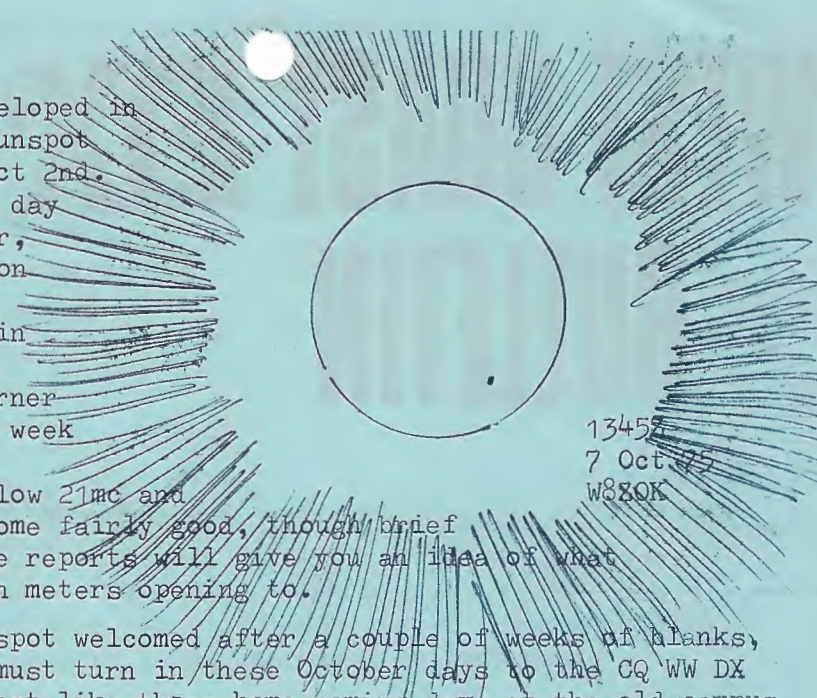

October 12	Low Normal-increasing to High Normal	Oct 20	High Normal
13	High Normal	21	High Normal
14	High Normal	22	High Normal
15	Low Normal	23	High Normal....slipping to Low Nor.
16	Low Normal	24	Low Normal
17	High Normal	25	Low Normal..rising to High Normal
18	High Normal	26	High Normal
19	High Normal	27	High Normal
		28	High Normal

There's the Big Picture! We do not have the solar flux and A Index reports this week, we regret that we have to say that Gene Darlington, W6TTS, became a Silent Key on Sunday, October 5th. He had suffered a severe heart attack during the previous week and was not able to come out of it. He had previously suffered heart damage some years ago and this one was too much for him.

We will probably make other arrangements to continue the solar flux and A Index reports but we will miss Gene. He was not a power-house DXer with a slamming signal to blast everyone out of his way. He worked a lot of DX but he was a most friendly, helpful and obliging fellow and always ready to help in any way. Gene tried hard....awfully hard... to be a help and an assist to everyone who passed his way and devoted long hours to doing things that would be helpful to others.

At the Fresno Hamfest this year he was named the Northern California DX Club DXer of the Year. It was an honor well bestowed for Gene was very much the best of the best in DX.

Gene Darlington, W6TTS, ex-3AIJ, ex-W2ALP, ex-W2ZZFA, dead at the age of 71. A Good DXer....

FOOD FOR THOUGHT (A Few Words from W1WDD)

When was the last time you did have a QSO with such places as China, Iraq, Burma and South Yemen? Why do you ever expect to QSO such places as Libya, Somalia, Cambodia, South Vietnam, Spratly and other rare places which are inactive?

The plain facts are that no matter how thin one slices it, that the DXCC Honor Roll is becoming a very difficult thing to achieve, if not down-right impossible because the DXCC list is clutter with 'dead places' with the greatest portion of their demise cause by the rise in power of those governments who are outright hostile to Amateur Radio Activity. Furthermore, it might be stated that things will be getting worse than better in that respect.

The foregone conclusion is that unless a change is made in the ARRL DXCC Honor Roll rules to provide for the deletion of 'dead places', it will become an outright impossibility to achieve the Honor Roll.

From a legal viewpoint it is interesting to observe the fact that when a person is not heard of or seen for over a period of seven years, he is automatically declared dead in a legal sense. Why not the same for DX? Are the 'countries' more important than people? Or is it that some would keep things to themselves and the heck with everyone else.

The answer to this situation, if you ever hope to make it to the Honor Roll, is to get out your pen and write your DXAC representative and demand action. Let us show them the pen is as mighty as the sword. After all, there is a precedent in law and it is time to apply the precedent to the DXCC Rules as well.

In closing, I would mention that I have received word from one representative on the DXAC to the effect that if enough interest is shown, the issue of DX deletion could be reconsidered by the Committee though previously a 10-year rule was defeated. If you do not know your DXAC representatives, you can write to Gary Stilwell, W6NJU, the Secretary of the DXAC. If you would ever hope to make the Honor Roll, this is one way to get yourself the opportunity..

Peter C Card W1WDD

OTP

After we typed that it was realized that the eternal problem of acronyms is that they are great if you recognize them but confusing when you do not. This one stands for the Office of Telecommunications Policy, a White House Office, some feel is another FCC....potentially.

The head of the OTP was asking the House Appropriations Committee recently for an increase in its budget, it being noted that the OTP is currently a 'way station' to a comprehensive federal agency handling communications matters in the future. However, it was acknowledged that the time was not ripe for a stronger office outside the Executive Office of the President. OTP was asking for \$8.9 million to run the 48-man office for the next year. The FCC got a much stronger going-over when it came up to discuss its budget, the FCC asking for \$49.8 to run that agency in the coming fiscal year.

The OTP has been heard in the past urging the FCC to faster action for the OB Service. As one astute observer has said: "What this country does not need is two FCCs....or maybe even one OTP!!"

CANADIAN DX ASSN Nick Sawchuk, VE3DLD, who has done the DX chores for the Assn's publication, LONG SKIP, for a number of years, has relinquished the duty because of the press of other affairs.

SOME QUICK, SHORT NOTES

VK3MR, Snow Campbell, who uses a group of rhombics but no great power has found that he can work 80 meters on the long path. He is currently working W/Ks on 7mhz over Africa, working stations as far west as W5s and W0s. This path usually peaks at 8:00-9:00a.m. Melbourne local time and possibly just before the signals drop out due to local daylight.

The Intruder Monthly Summaries for IARU Region I, published by G3PSM, does contain reports from all three IARU Regions. These reports are now running about 18 pages. For Canada and the USA, the ARRL contributions run about 13 pages but are more extensive in the 80-meter and the 40-meter broadcast types.

Some 80-meter F4-FAX "Intruders" have been noted but some of these are legal. The 3980khz Tokyo one is in a broadcast band. Others from Tokyo include a spurious signal on 3600khz, at 3623khz...often an idle A0, 3712khz, 3820khz, 3824khz, 3829khz. The one on 3810khz does not appear to be associated, a channel assigned to Minsk RST76, but signals suggest an East Asia location. More extensive reporting to the FCC may satisfy the Japanese government that harmful signals indeed are received in the U.S., reports covering about five years have been assembled and reviewed by the FCC on this matter.

Reports from Intruder Waters in Europe show several hundred 21mhz and 28mhz harmonics and spurious signals, mainly from Europe, during sporadic E-layer short skip conditions, this being especially noticeable in recent months. This includes a large number of German and Italian CBers, broadcast stations, jammers, etc. That 28703 F1 RTTY signal heard in the U.S. is a good indication of short skip band openings to COY3 in Cuba. This is a 2-f harmonic of the one on 14351.5khz which is really out of the twenty meter band but many amateurs tune above 14347khz and as a result hear the signal when in USB.

The Intruder Watch notes come via K6KA and anyone who might be interested in this work to keep the bands clear might think of dropping an inquiry to the ARRL.

While Tuvalu/Ellice Islands are expected to be independent on schedule come January 1, 1976. It also appears that the prefix VR7 has been assigned to the Southern and Central Line Islands but has never been activated. There are a number of spots in the Pacific which have been studied for possible 'new country' status and it is possible that these will pop up in future operations. There are still islands which are seldom visited and a number hardly worth visiting just to see the sand and the sea birds.

SY5MA was an operation a couple of years back. And apparently though a handful of cards have been submitted for DXCC credit, no credit has been given as the ARRL did not receive what could be considered as satisfactory proof of permission to operate there.

Ormand Meyer, K6QX, has taken over the WORLD QSL BUREAU from Lloyd and Iris Colvin. The Colvins felt they had to make arrangements so that they would be free for their planned DX trip coming in the future months.

SV0WKK often found on a Monday schedule at 14225kc/1930 Z....also often found under a pile-up of many who are striving to work Grete for a new country and those who are trying to burnish their previous 5x9+20db report. Either way you look at it, it's a gouger...

We got one item out of the Middle-Aged DXers Assn News. It went like this:

THE SCANDAL!! The YOUNG LADY, weekly yellow magazine for chickens, reported lately that JH3--, M. Ok---, had made love with a gal twenty one years old from the beginning of this year. But his wife, JH3--, had known nothing about that. The girl explained that she had not intended to break up his family but was worried from his 'house keeper'. Thus he cannot be on the air comfortably for awhile. N.B!!! N.B!!! N.B!!!

Who says that DXers do not have more fun?? Especially the middle-aged ones!! The real fun begins when you reach 65.....the threshold of middle-age and good times!!

NOTED Those planning to make the SEAsia Convention in Kuala Lumpur should send their reservation to MARTIS, Box 777, Kuala Lumpur, Malaysia as soon as possible. Single rooms will run just over \$16.00US and double \$20.00US. Action starts on Friday, November 7th and runs through Sunday with many SEAsia DXers already making plans... The FCC is investigating an order issued by a U.S. District Judge in Louisville to 'jam' the CB channels on September 6th when protest demonstrations were expected. W5AG, William Schmitz, ex-W5EFC, passed away on October 2nd. We still did not get all the available news in this issue. Next week we'll try harder.....

GEOFF WATTS 'MOST WANTED' LIST'

Geoff Watts in his 'DX News Sheet', out of Norwich in G-land, recently printed the results of his poll for the 'most wanted' countries. The list is based on returns from 149 DXers and this is an annual poll conducted by Geoff Watts. It is reproduced for information.... The figure in brackets indicate how many needed it...

FO8 Clipperton (138)	VP8 South Georgia (58)	VR1P British Phoenix (33)
3Y Bouvet Is. (132)	3CØ Annobon Is (51)	3X Republic of Guines (32)
VP8 South Sandwich (124)	ZL/K Kermadec Is (48)	YVØ Aves (31)
BY China (119)	VR3 Fanning (45)	FB8W Crozet (30)
YI Iraq (104)	KP6 Palmyra (44)	FR7/J Juan de Nova (29)
8Z4 Iraq Neutral Zone (100)	XF4 Revilla Gigedo (42)	SV/A Mt Athos (28)
XZ Burma (99)	PYØ St. Peter & Paul (41)	KC4 Navassa (26)
70 Kamaran (81)	ZM7 Tokelau Is. (40)	XU Khmer Republic (26)
HKØ Baja Nuevo (80)	CEØZ Juan Fernandez (39)	A5 Bhutan (26)
VK9 Mellish Reef (78)	FR7/G Glorioso (39)	TI9 Cocos (24)
1S Spratly (76)	VK9Z Willis Is. (38)	S2 Bangladesh (24)
- Geyser Reef (74)	ZK1 Manihiki Is. (38)	TL Central African Rep (24)
VKØ Heard Island (73)	ET Abu Ali (37)	60 Somali Dem Rep (21)
HKØ/ Malpelo Island (67)	FW8 Wallis (36)	VU Laccadives (18)
70 South Yemen (67)	BV Taiwan (35)	VP8 South Shetlands (14)
KP6 Kingman Reef (65)	ZL/A Campbell Is. (35)	
ZA Albania (63)	VQ9F Farquhar (35)	
CEØX San Felix Is (61)	ZK2 Niue (35)	

The list does appear to have a bit more Continental flavor than W/K needs. It is still interesting. Perhaps as you read it you will draw a few conclusions of your own.

MORE OTP

Now that we can throw that acronym about and everyone can understand it, here is a bit more....

A recent item in the newspapers called attention to a manpower crisis in radio spectrum management which had been raised by John Eger, Acting Director of the Office of Telecommunications Policy, who declared a 'state of emergency' and announced a government-wide career development program to rectify the situation. The fear was expressed that the lack of qualified spectrum managers could damage the U.S. interests in the near future.

With the next international general frequency conference scheduled for 1979, world wide allocations will be established through the year 2000 - and there lies the problem. Assignments of spectrum space are negotiated at these international meetings and the resulting agreements supercede national law. According to a study made at OTP's request, more than 57 per cent of the U.S. Agencies experienced and conference-tested negotiators will have retired by 1979 leaving only 15 top-level experts to represent the United States. The study found that of the 194 individuals now involved in national-level agency activities for spectrum management, only 35 are principal managers with the negotiation, regulatory, compliance, technical analysis and decision-making experience bearing on radio frequency management. Of that number, 20 are expected to retire before 1979.

According to a General Accounting Office report, such an impending personnel shortage could jeopardize the U.S. interests at the most critical international radio conference in 20 years and could spell trouble for future users of the radio frequency spectrum.

For that reason the OTP has instituted the first government-wide career development program for the training and retention of the highly specialized personnel needed in spectrum management. "National and international concern mounts over the continued availability of spectrum space", the OTP said. "To respond to that concern it is necessary an adequate investment be made in personnel development".

WEST COAST DX BULLETIN

WHO NEEDS IT?????

Someone always needs something. Someone missed it the last time out. But who may need what and where and when.....that's what we are after. The fifty most-needed countries for the readers of the WCDXB. Undoubtedly there will be some that will need more than fifty....but send in your list, give us the information and sometime in November we will tell you what you need the most....and what it may be that the most need.

Return by November 1st. Our computer time is scheduled..... And your call and your present country total is needed.

CALENDAR

GLORIOSO	FR7ZL, Reliable Guy, going there for two months from Nov 20th
NIUE	VK5XK opening in early November.....ZK2AP the possible call
RODRIGUEZ	3B9DA presently active... probably to end of the month
SEASIA CONVENTION	Nov 7-9th at the Equatorial Hotel in Kuala Lumpur.... Hasten!!
EUROPA	FR7AI/J being heard often
ANTIGUA	ANTIGUA QSO Party...November 1/2nd
	WA2BCK and K2IGW there from Oct 23rd to 30th....in CQ WW Test!
LIECHTENSTEIN	HBØNL present active
4U1ITU	CQ WW Test effort by K4ILF
SINT MAARTEN	K4YFQ with PJ8YFQ and possibly FSØ...October 21st to 27th....
GRENADA	VP2GMB from October 19th for two weeks by W5MYA
IRAQ	W7KW heads there this weekend....optimistic
MONTERRAT	VP2MIR in November for CQ WW CW Test...Nov 29/30th
MACAO	CR9AJ rumored to be active....
AALAND ISLANDS	DK5XN/OHØ until end of October
KT4MB	Oct 31-Nov 3rd...special call from Dry Tortugas
MONTERRAT-AGAIN	VP2MF from October 20th thru CQ WW Test...
EQUATORIAL GUINEA	Scratched...

SHORTLY NOTED 9V1SH, Don Hall, is trying to locate a copy of the OT Telecommunications Research Engineering report: "Ionospheric Predictions" OT-TRER 13 Volumes 1,2,3,4. The U.S Government Printing Office says they are no longer available. Don is looking for them to do some predictions from the Singapore area. His address is 14 Mt. Sinai Rise, Singapore 10, Singapore. A former W5----

YBØABV managed to work W6PLH on ten meters on Sept 28th....which shows the equatorial path still has some life in it. WA6AHF has about 600 IRCs which he will sacrifice for the astonishing low price of twenty for \$3.00 (cash). Send cash with sase...a postal money order is a good substitute but Rubin says no checks. Its something about the commodity market....seems like some have had more rubber than silver when he got the checks to the banks. Cash along with sase.

DK5XN/OHØ was aiming to put up some wire for 40/80 work. There to the end of October. Lloyd Colvin, W6KG, notes that if any NCDXC member has trouble with getting a VR6TC card to contact him. WZ1AEQ and WZ1AEQ/VE2 was supposed to be heard from the trip of the re-enactment of Colonel Arnolds march on Quebec in 1775. Some fear they got lost in the woods...they started Sept 26th. That CR9AJ has yet to be reported by any W/K though Horacio is supposed to be on. 75+ hungry DXers showed for the NEngland DX meeting....all toasting the broiled scrod!! There was something else at the DX Forum at Reston....hardly broiled at all. Hardly topless at all either! Interest in DX waned...momentarily.....when the crowd was confronted by twin 38s.....
