

West Coast **DX** Bulletin

+++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++ +++
February 17, 1976 7-76 +++ +++

POSSIBLE? These may be the dismal days but we are able to keep catching those vagrant possibilities which keep things interesting. And often they are the forerunners of the real thing. Like---

JAJAN, Shozo Hara, visited ARRL headquarters last December. Later on a broadcast program, he mentioned that there would be a 'brand new country in Japan'. And all of this may come on the Fiftieth Anniversary of the JARL.

Some of the JARL are reported as scouting about for a vessel which might indicate a sea voyage. It may indicate Parece Vela, a place which has come up a number of times in the past as a possibility. Then again some are taking a look at the Senkaku Archipelago. Parece Vela has been run past the Awards Committee a number of times in the past but they failed to stand up and salute that one.

Undoubtedly there will be something more on this before long. There is also the report that the Kanagawa Sea Expedition Team will be at Parece Vela in a month or so, possibly April or May but they are going for oceanographic matters and is not a DXpedition. However, there will be two amateurs in the group and they may be signing JD1YAH/JD1E. There is also another group which will be visiting this island group at the same time and they also have some amateurs in their roster. Weather is a chancey thing during this period of the year and the possibility of Typhoons sweeping up out of the China Sea must be kept in mind.

MORE?? 9L1JM is reported as planning a trip to Turtle Island off the coast of Sierra Leone and adjacent to Sherbro Island. It is also said to have a separate administration. This will be a 24-hour operation and a 9L2-prefix will be used:

We will have more information on this one and the target date is April 10/11th.

SOUTH SANDWICH Those thirsting for South Sandwich probably will have to wait a bit more but hope should be kept green by the knowledge that the Argentine Navy is very definitely interested in that island group.

It does appear that an Argentine vessel was off the South Sandwich group about February 3rd but the weather was so deteriorated that no attempt was made to land the amateurs and the vessel finally pull out to sea away from the islands.

At the best this would have been but a brief operation. Looking a few months ahead to next summer there in the southern hemisphere, there have been inquiries to the Argentine Navy on the possibility of logistic support and they are interested. The admiral who will have to approve the effort has indicated his favorable attitude. This would be more than the short effort planned for this month.

One of these days the sunspots will return and South Sandwich will be worked by all the deserving DXers. And always tomorrow will be a brighter day!!

SILENT KEY Freeman Lang, KH6AX, became a Silent Key on February 4th. Often heard from at his berth there in the yacht harbor in Honolulu, many visiting DXers often were dropping in to visit him.

SUNSPOT LOUIE These are the sad days and observations at the W8ZOK observatory were possible on the four days previous to this report. And no significant activity could be found on any of the days.

It has been three weeks since there was any real significant activity on the sun and the band conditions have reflected things. Few paths hold up for long, WWV has been handing out U-4 and U-5 forecasts and even the early morning and evening openings are often missing. The big guns are congregating on 80 and 40 and while SSB is getting a lot of action on seventy five, c.w. dominates the action on forty.

W4UMF in a note pointed out that the activity that does come is associated with the old cycle and there are few indicators of any action from the new cycle. With everything looking under the rocks for sunspots these days, we decided to check with one of the local experts on when Cycle 21 could be here. We got a quick answer. Quick, terse, brief, pithy, direct and a model of clarified declamation. "Cycle 20 will definitely end when Cycle 21 begins. You can count on that!!". Son of a Gun!! We will, we will!!

Looking ahead a bit, Ted notes that he is thinking of changing the reports from the ones you have been looking at to: Exceptional -- Above Normal -- Normal -- Below Normal -- Disturbed. Sometimes the Low Normal and High Normal cause a question and the part often overlooked is that these are relative reports....relative to what is going on now....and possibly the new labels may not raise so many questions.

anyhow, take a peer into the future, hand to brow and the forked hazel branch in hand, Ted says it positively will be:

February 17th	Low Normal	February 24th	Low Normal
18th	Below Normal	25th	Low Normal
19th	Below Normal	26th	Low Normal
20th	Below Normal	27th	Below Normal
21st	Low Normal	28th	Below Normal
22nd	Low Normal	29th	Below Normal
23rd	Low Normal	March 1st	Low Normal

That's it! If you have strong feelings on the change of labels, speak up!!! And seeing that we have run ourselves out of space, we will cut this off right here.

HAM RADIO OUTLET 999 Howard Avenue, Burlingame, Calif. 94010 (415) 343 5757
NORTHERN CALIFORNIA'S MAJOR AMATEUR RADIO SUPPLY HOUSE

This is the Time to Visit HRO and Check on all the New Amateur Gear.....
 Sooner or later you are going to visit HRO. Why not now? It's the best time...

Full lines of amateur gear. Full inventories....towers, beams, linear, two-meter, receivers.....the top lines! HRO is for Amateurs!

Write HRO if you cannot visit.....tell them what you need. HRO understands the needs of the Deserving DXers. Discuss things with K6AHV.....

Bob Ferrero

K6AHV

Howard Hale W6SC

17 February 1976

K6EC The Chartmaker Seeing that we ran out of space on the previous page, here is where you get your chart material this week. Ev says it was so----

Solar Flux			A Index		
Feb 3	71	14	Feb 7	70	16
4	70	9	8	71	17
5	70	7	9	70	22
6	69	9	10	70	-

WWV gives a 60% probability figure for that minor ionospheric storm that W4UMF braces for in the February 27-29th period. And if you really want to know what is good about all of this, most if not all of it is behind you. And, with chin up and shoulders back, you can look forward.....or is that really a good idea/

SINAI The U.S. Department of State has awarded E-Systems a \$16.5 million dollar contract to install, operate and maintain an electronic surveillance network in the Sinai, this being a base camp, three watch stations and four seismic-type sensor fields around the Mitia and Giddi passes. This is scheduled to be operational this weekend utilizing temporary quarters and the permanent station by July 1, 1976.

About 200 U.S Personnel will staff the monitoring facilities. And if you start hearing W and K stations with some unusual suffixes....Like /SU....be not a bit surprised. Jump in and work them and get full QSL information. H.B Zachry Co. of San Antonio is doing a large portion of the work. The annual budget for the maintenance of the monitoring lash-up will be about ten million. Israel and Egypt have the rights to conduct reconnaissance flights over the buffer zone on alternate days.

SOUTH PACIFIC We have some advance word on a JA effort for the South Pacific which will include operations from Nauru/Gilberts/Fiji/New Hebrides/Solomons and two weeks from Tuvalu in March.

The effort will include JA2PJC/JA3KWJ and JA0CUV. Their itinerary calls for them to be at Nauru for one day on March 23rd; VR1-Gilberts for one day on March 24th; two weeks on Tuvalu-VR8 from March 25th; 3 days at 3D2-Fijis from April 8th, 4 days from YJ8-Hebrides from April 11th; 3 days from VR4-Solomons from April 14th; 3 days from Nauru from April 16th and they will be carried back to Japan, happy but thinner, on April 19th.

They are planning a lot of c.w. work but will give the CQ WW WPX Test a thorough going over with SSB during that Test. More on this later.

SHORTLY NOTED We are still looking for the loan of a TA-33 beam for an outbound DXpedition heading far out beyond the setting sun. If you want to help, send the word to the WCDXB and we will get it to the principal.

W5UFF will be headed for the Cayman Islands in late May and he is looking for the loan or lease of an Atlas 210X to use from the Caymans. Either an Atlas 210X or something similar.

AP2KS who has been plagued with heart problems during the last year reports that he continues to improve but he did have a major surgical operation and the recuperation period is expected to be long. However, he does expect to be back on the air one of these days.

That GB2SM is definitely not the QSL route for ZD9GF. They are bouncing them back with the notation that he is not with the GB2SM. Conditions may be bad to worse but W1WQC worked 3D2KG on ten meter SSB at 2340Z and it was already dark there in Miami where Ham is 14.

17 November 1976

SEANET CONVENTION The SEAnet convention certainly must take the lead as the most exotic DX gathering and it does seem that a few more of the Deserving W/K DXers head out that way every November. If you would like to take a long look ahead and really make the Grand Tour of the Orient, there is a Seanet Convention Tour being put together by a travel agency in San Francisco.

The tour will take you to Tokyo, Kyoto, Hong Kong, Bangkok, Singapore and get you to Jakarta for the 1976 SEAnet Convention. After the convention the tour will go to Bali, Hong Kong and back to the states from Hong Kong.

The full particulars are a bit lengthy to list here. If you are thinking of those far away lands and SEAsia, drop a line to Russell Chinn, Golden Sun Tours and Travel, 736 Washington Street, San Francisco, Calif. 94108, and ask him about the SEAnet Tour. He will be glad to hear from you and will furnish all the details.

MORE SHORTLY NOTED Art Westneat, W1AM, recently received the Distinguished Service Award from the IEEE. Art was cited for 'outstanding leadership' of the IEEE Oceanography Coordinating Committee in the years 1973-1975 as well as his 'outstanding personal contributions to underwater acoustical engineering'. W1AM is also Chairman of the IEEE Council on Oceanic Engineering and a founder of the IEEE Journal of Oceanic Engineering. He also works a lot of DX. How about that?

We will take another run on that 4U1ITU QSLing....it's W4KA handling the QSLs for the October 26/27th operation. Those dates alone and it is not K4KA...its W4KA. We have a handful of those KA suffixes on the mailing list and it does seem that we cannot keep them sorted.....W4KA, Leo....and not K4KA.

The ARRL test period last week did not come up with very good conditions for the testers....and you did not have to be rare and beautiful to get a lot of attention. Many fairly common DX types were getting the full rush treatment. VE1ASJ plans for some Lesser Antilles 160meter operations was cancelled. Down near the San Diego area K6GLC, Jim McCook, has traded for a new call and is now W6YA. Jim, the happy, fun-loving DXer and always enjoying the Fresno gathering from his favorite position on the floor, surprised a lot of the scene watchers and recently got married. As one Southern California type said: "If that happens, who can doubt that the sunspots will return one of these days!"

K6TWT has relinquished the handling of the VU2ANI/VU7ANI QSLs for Fred Burn there in the Andamans. Ken says to send them direct now to Fred, P.O. Box, Chatham, Port Blair, Andaman Islands (via India). ZD7WT says he will be on St Helena for about three more weeks and then will be going home. The CR9AK QSLs went into the mails this week, the Petaluma Radio Club doing the QSL chores in jig time. Also, the VR8B and the VR1Z QSLs are reported out. Everyone is getting Glorioso cards and agreeing that Guy P de la Rhodiere, FR7ZL, is truly "Reliable Guy!". As many say: "Now that I've worked Guy, who needs FR7AM anymore?". Some have heard VR7EK on c.w. Some also say that it has the same fist as a DU1--. And all agree that it's the same rotten fist. Ah, Slim!! So good to work you again!!!

** WEST COAST DX BULLETIN Second-class Postage Paid at San Rafael, California. **

17 February 1976

SHORTLY NOTED

W6KNH will be back home about now after visits in SEAsia and Africa plus a few stops in South America on the way home. Clyde will be mailing many QSLs for some difficult ones that he picked up on his travels. The word is that any cards that got to his QTH last Fall before he departed on the trip will be in the mails this week.

W1BB in noting the good conditions on 160 meters points out that W8LRL made WAC in two hours. KV4FZ reports working 71 European stations on 1.8mhz on Jan 24/25th. All he needed was Africa to break his own WAC record....then EA8CR showed up the next day from EA9-Spanish Sahara. Herb now has his DXCC total on 160mtrs up to 106 with PAØHLP/LX and EA8CR/EA9 being the last two. Anyone interested in this band should get the late information from W1BB...a sage to Stew will bring you a copy of his 160meter bulletin.

In the 6th World Telecommunications Day last May, the total points made by U.S. stations was 40.9k. Over 70% of these points were made by KC2ITU operated by K6SE/2 who racked up 29.6K points alone. The seventh running of this contest will come again this May.

Some industry magazines report the FCC bending under the weight of CB applications. One report says that the Safety and Special Radio Services crew at Gettysburg has been expanded to sixty employees, most putting in a full day on CB applications. Forty sacks of applications arrived in one day recently. Even with some of the work contracted out, it is taking ten weeks or so to process a CB application. It is also estimated that there are one million CB operators who are unlicensed. The FCC has problems in administering the law, fiscal year 1975 seeing 1363 notices of liability being issued and 200 licenses were lifted for persistent offenses. Some 40 cease and desist orders were cranked out.

In cases that have been taken to court, the fines have averaged about \$150 and often it is felt that this is hardly worth the trouble of the Justice Department to make a court case to collect unpaid fines. And the FCC cannot revoke a license for failure to pay a fine though it has for operators having lied in denying culpability. The Vanik Bill is given attention as a possible remedy for CB interference to radio and TV but the 23 channels now available are expected to be supplemented by frequencies taken from the land mobiles. Now there's your update on the CB crisis!!

It is noted that not only the U.S. amateurs but also the foreign DX bulletins are making inquiries on whether QSLs were ever sighted for that HKØAA operation of last June. Anyone with some up-date on that crisis would like to be heard from.

We have a couple of addresses to note, these being F2QQ and A2CCY. The late word from the F2QQ Desk is that the correct address is.....Richard Gemehl, F2QQ, 51 rue de Saussure, 76017 Paris, France. This is the same as it has been for some time but the question does arise.

Bob Furzer is living in Canada yet and the address is a retread on what has been run before. It is: Bob Furzer, Apt 411, No. 20 Carabob Court, Agincourt, Toronto. However, he does not have his logs with him at the present time but he says to send the QSLs along as eventually he will answer them all.

K8CFU recently had that article in QST about the planning needed and preparations for any DX operation in a foreign clime. Part of the article which appears not to have made it was a check list for supplies and a listing of the voltage/frequency of electric power in a number of countries. Of the 35 countries listed, 24 had a voltage in the 200-240 range while 30 of the thirty-five had 50cps. Arch did not say so but he might part with a copy of the list if you send a sage.

W7OK says that he is filing requests for VP2KC and FK8BG QSLs until he gets his hands on the logs. Don suspects that VP2KC forwarded the logs by surface mail.

17 February 1976

MORE SHORTLY NOTED

Ian Cable who once was heard with good signals out of Bahrein a few years back has been visiting in England after working in the Philippines for a couple of years. Indications are that he will be back in Bahrein with an A9-call in late April or May. He used to sign MP4BBW when the MP4s were being heard.

Tommy, ZD8TM, has returned to St. Helena as scheduled and has been worked under his ZD7WT call. Look for him around 14040kc from 2230Z most days. He says to QSL via W3KT. Sometimes this one moves to forty after 2300Z. That VC9UM was a special call for the Festival of Life and Learning at the University of Manitoba at Winnipeg. QSL for this one to VE4VV.

Some inquiries on the May Fresno International DX meeting are surfacing and if you are really eager, here is what you can do. Write to the Southern California DX Club at Box 73, Altadena, Calif. 91001 and they will mail full convention information to you when it is ready, this probably being in the middle of March or thereabouts. If you are really shrewd, like all the big gun DXers are, you will make your reservation at the Fresno Hilton right now as housing often is the tight area. Advise the hotel that it is for the DX convention and specify the nights you will be there.

That XJØNEH heard around the first of February was the Canadian Tribal Class destroyer, the HMCS Iroquis enroute to Cuba. QSL this one to the ship at 'FMO, Halifax, N. va Scotia. Another naval vessel heard about the same time was the South African Navy Ship 'Protea' which was the escort vessel for the yachts in the Capetown to Rio race. This one was signing ZS1CTR.

K5FVA, Louis Muhleisen, was named the Delta DX Association "DXer of the Year". This is the New Orleans based group which often is heard from in the Lesser Antilles during contest season. CN8DX is reported as planning some African activity but no definite word.

On that planning for San Felix, one of the principals says that they have run into a few problems and the prospects for activity this spring have pretty much evaporated. However, the long-range plans have not been abandoned and it is hoped that they will be able to solve all their problems and get things moving again some time later this year.

FB8ZG said recently that he was leaving the Amsterdam Island area on February 15th and he was not sure if there would be an amateur operator in the new crew coming to Amsterdam.

ex-CR6OZ is back in Portugal and if you are looking for a QSL from CR6OZ or XX6OZ you can send it to:

Jorge Fidalgo, Rua Marques de Pombal No. 4, Tomar, Portugal.

George was a consistent contest operator from Angola.

VK6RU, Jim Rumble, is the QSL manager for VK9XI and VK9XW. Jim reports these stations are on every Monday from 1300Z to 1500Z in the 14225kc to 14235kc area. Another area which is seldom reported but with more activity than the reports might show is Thailand. Reports from the area indicate that HS1WR, HS1BG and one more often check into the SEAnet plus another european businessman with a three-letter suffix. We will have more calls for the HS-active list in coming issues.

For Sale: Tristao CZ-471-HD 71' heavy duty crank-up tower. About two years old and in excellent condition. Ham-M rotor and TA-33. All for \$700.00.

Ken Farr K6TWT (707) 643 2046

CALENDAR

No word....keep the candle in the window
VP8MS in a week or so
KC6AQ operated by WA6AHF to about the end of Feb...
VR3AH should be heard shortly....long stay
JA DX Group making plans for 2 weeks across WPX Test
Colvins still aiming for C21 operation....
FL8OM for a week around Easter
5T5CJ in March for ARRL CW Test
North Florida DX signing VP5 for CQ WPX Test/March
April 23-25th..... Prepare!!
May 14-16th at the Hilton. Make your schedule
This week-end!! Feb 21/22nd. Work one for George....
Phone go-round Mar 6/7th....

It might be but there were a few variations from the usual Slim style. This one was not a good operator, was sending very slowly and was not exactly scintillating. This one was not. The stations he was heard to work were mostly close to his area. It probably is too much to hope for but there is still the feeling that Iraq will show one of these days. And it could very well be a stumbling operator such as this. Some Slims are excellent operators, knowledgeable in pile-ups and are very evident close to the DX scene by their choice of QSL Managers or use of calls. And if you want to know what to do when you hear that rare one....just work 'em first, worry later.

The action starts at high noon on Friday and will run into late Sunday. The big Hamvention banquet will be on Saturday. Get the full word from Box 44....

Dave WA5ZNY

ARRL The FCC has taken two more deregulatory steps, one being permission to operate repeaters in the 29.5--29.7mhz area without the special proof of need that was previously required. Only those signals of those classes of amateurs licensed to operate in the ten meter band may be retransmitted by such a repeater. The second change redefines a club and simplifies procedures for groups meeting the new definition when they apply for a club station license.

At the January Board meeting, David Houghton retired as ARRL Treasurer and with 54 years of service for the ARRL. A ways back when John Huntoon, W1RW, stepped down as General Manager, he retained the position of ARRL Secretary. With the retirement of Houghton, John Huntoon, W1RW, was elected Treasurer, declining the nomination for Secretary. Dick Baldwin, W1RU, was then elected Secretary to the ARRL as well as General Manager. This makes things lined up as they were a few years back, the General Manager also being the ARRL secretary...

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. One of our more strung-out QRPers came up the hill last week, his voice ringing across the ridges, joy in his smile and happiness everywhere. A couple of us were just sitting around and we braced for the worst. "I did it", the QRPper was yelling, "I did it, I did it! This time I got one for sure and it has to be a real blockbuster for sure". We calmed him down to get the story out of him. "This morning, on the dawn path, I worked this AC8BT/AJ4. There was this big pileup of JAs fighting to work the station and I knew that it must be a real rare one. So I jumped in and worked him.....got a five-eight-nine out of him, too. I don't know where it might be but with Sikkim gone I'm wondering if it might be one of those other Himalayan kingdoms, something around Tibet. It might even be China. What do you think?". Son of a Gun, what could one say to something like this on a warm day, the sky blue and the flowering trees all in early bloom. We finally said: "We'll have to research this one and try to get a line on things" and the QRPper was off, jiggling his way down the hill. The two of us sat in silence for a bit and finally the other spoke. "Why didn't you tell him. That AC8BT/AJ4 is Al Hix from Charleston down in Puerto Rico to warm up a bit". We were long in answering for there are enough of the dark days and this for now was a happy one for the QRPper. And at the end all we could say was: "Take from no man his dream". And there are yet those happy days in DXing and there will be more to come. And all the DX dreams comes your way each week....\$10.00 by second-class mail---\$14.50 by first-class to US/VE and \$17.00 flies it to anyplace in the world.
