

BILL RINDONE Bill will be definitely heading out in the next week or two. The tenative dates for departure are either June 19th or June 26th. So it will either be this Saturday or the following one.

The departure dates were depending on his getting some needed visas. He was getting things all lashed together last week, aiming for the Red Sea areas as his initial stops and then down the east coast of Africa.

More should be coming through on this for next weeks billetin. However, keep the possibility of the June 19th date in mind and possibly keep an ear attuned for something in the following week.

RECAPPING While one can often make some early appraisals of how an operation went or is going, it takes a couple of weeks to get any sort of a grip on what the overall results might be. Some form is starting to shape on two recent operations, Baja Nuevo and Oki-no Tori Shima.

On the Oki-no Tori Shima, while no final report has been received on the number of QSOs, there were areas where 7J1RL was a difficult one to hear and to work. The east coast of the U.S. was not fat in the number of QSOs and it does seem that some of the bigger names in DXing could not catch up with this one. Some have reported as never hearing the station with a strong signal and not being able to work it. It would seem that the percentage of success with 7J1RL was not especially high, a longer operation might have been a helpful factor for some as the pile-ups diminished in itensity in a longer effort.

Early reports from Europe indicate that no early success was found over the weekend when the station opened up. With little reported success up through Monday, there probably was not any great number worked though this is a presumption. This is not the period for long-haul DXing with any consistency and it is expected that 7J1RL left a lot calling even though the JARL did go to considerable effort to make this one a success.

Baja Nuevo in early reports may have been a more successful operation. At 1500Z on June 7th the party was southwest of Serrana Bank on the way to San Andres on the return trip. HKØAA on Baja Nuevo went QRT about 1700Z on Sunday, June 6th. Conditions favored their return journey, they had hampered the outbound course and they were expected in San Andres on Tuesdays. Operation on Baja Nuevo started shortly after 2030Z on June 3rd, two rigs being in operation, with three generators. 7500QSOs were made on 6 bands. It was reported that many JAs were worked on twenty and forty, as well as a large number of Europeans. Several comments have been noted on the ability of the operators, SMØAGD, K6AHV and HKØBKX running up a good high hourly total of QSOs.

SUNSPOT LCUIE There is still the lack of significant sunspots and the period of relative inactivity has now stretched on to a month. With observation conditions good at the W8ZOK observatory, it just has not been possible to locate any spots.

Conditions have not been especially good and if you have been active you probably have noted how things are. WWV has been giving out an almost unbroken string of '6's in their 6-hour indices of radio quality, actually from June 2nd to 8th there were but two 6-hour periods out of the 28 periods in that week where the quality slipped to a '5'. It would seem that there are more important things than these numbers. The next week or so may not be much important there.

than these numbers. The next week or so may not be much improvement with Low Normal and Below Normal showing up like they intend to settle and stay for awhile....like in-laws visiting on their vacation. Scarcel welcomed but one must tolerate....

Cycle 21 is making itself scarce and there still is no sign of these high-latitude spots that all the Deserving DXers are looking for. Though the first signs of Cycle 21 were noted some year or two back, they are slow in making much of an appearance.

Sob )

12152

8 Jun 76

MSZOK

We are now into the flat bottom of the cycle, WWV predicting a SSN of less than 10 to the end of the year. One must grit their teeth and smile for certainly these are the dog days for Deserving DXers.

From the south bank of the Potomac, WhUMF takes a second long look into the future, it was hard to believe the first one, and Ted says that it may not be a time for joy and jubilation as we move across the summer solstice and approach the Glorious Fourth of July. Ted says that with lady-finger firecrackers being ruled as the safe way to enjoy future celebrations, the conditions are pip-squeak to match.....

June	15th	Low	Normal		June	22nd	Low Normal
	16th	Low	Normal	oger Inh	II on all	23rd	Low Normal
	17th	Low	Normal			24th	Below Normal
	18th	Low	Normal	MIN 18	and lo	25th	Below Normal
	19th	Low	Normal	DESCRIPTION		26th	Below Normal
	20th	Low	Normal	th annual		27th	Low Normal
	21st	Low	Normal		A TOPE	28th	Low Normal

That may be bad and WWV comes along to say: "There are no obvious periods within the next 27 days when radio conditions should be worse than fair to good". This would seem to tie in with WhUMF's squint into the murky future for Ted again says: "There will be some good days ahead and some bad days ahead. And in between there will be more of the same..."

All this cheer and relatively speaking is sometime a difficult thing to cope with so we turn to K6EC and Ev the Chartmakers Friend has all the flux and indices which will help you figure that someday things may be better but it will not be before the Fourth of July....or even the start of the Tricentennial.... Ev says it was:

	Solar Flux	A Index		Solar Flux	A Index
May	31st 4 66	9	Jun 4th	66	20
Jun	lst 67	6	5th	66	18
	2nd 67	6	6th	67	ġ '
8-	3rd 66	THE 7 LINEOUSE	7th	67	di ta um chem

The political parties will be having their conventions in the next couple of months. You might watch and see which one promises to do something that the country vitally needs.....Bring Back Sunspots!!!

1976 ARGENTINE DX CONTEST This is a two-stage contest, the CW weekend coming over the July 4th weekend, the phone portion coming on August 7th and 8th.

The object is to work as many LUs as possible, signal report and QSO number being given starting with 001. 3 points are given for QSOs in 3.5 and 7mc....1 point for 14/21/28mhz. LU4AA is worth ten points.

Multipliers are given for each Argentine province, this in each band. LU provinces are indicated by the letter following the call. Such as:

LU-A/B/C	Federal Capital	LU-P	San Juan
D/E	Buenos Aires	Q	San Luia
F	Santa Fe	R	Catamarca
GA/GO	Chaco	S	La Rioja
GP/GZ	Formosa	T	Jujuy
H	Cordoba	Ū	La Pampa
I	Misiones	V	Rio Negro
J	Entre Rios	W	Chubut
K	Tucuman		O Santa Cruz
L	Corrientes	XP/X	Z Tierra del Fuego
M	Mendoza	. Ү	Neuquen
N	Santiago del Estero	Z	Antarctica
0	Salta		

Log sheets showing callsign/mode/band/date and time (GMT) serial number sent, serial number received, province or country and QSO points go to:

Radio Club Argentino Subcomision de Concursos Box 97, 1000 Buenos Aires, Argentina

Plaques, certificates amd medals will be awarded to high scorers in each category. With the n/s path fairly dependable, this may give you some action in the coming weeks.

QSL INFO WB80FG, Dick Ackerman out of Birmingham, Michigan, operated from three South Pacific spots a couple of months back and you might be looking for the QSL route. We also had to look for the list as along the way it got misplaced. Anyhow, late or not, here it is

In New Zealand, WB80FG was issued the reciprocal call, ZL2AWK, and operated from Napier at ZL2WC's station. Dick also operated in the Solomons with the call of VRIDA, this being from March 29th to April 3rd. In the Solomons he operated from the station of VRIDX and in Nauru, he operated the club station, C21NI, from April 4th to April 6th. If you worked any of these stations during these periods, QSL to WB80FG.

Dick also passed along the information that VRLDX asks for patience as he left for the United Kingdom on a ten week leave in mid-April and will have the cards printed while there. He will OSL on return to VRL, possibly late June or July.

WEST COAST DX BULLETIN Second-Class Postage Paid at San Rafael, California
Published every week by the Marin County DX Group. Hugh Cassidy WA6AUD

\$10.00 per year by second-class mail (newspaper treatment) in the U.S and VE areas. \$14.50 by first-class mail to the U.S/VE areas. \$17.00 flie it south to Mexico and to all the DX Lands back of beyond and past the utmost purple rim.

Believe!! DX Lives!!! Somewhere....

SHORTLY NOTED Last year we ran that 'needed-country' poll which W1AM and some helpers in the Southern New England DX Assn broke down into several different lists. It is planned to take another poll later this Fall. If you cannot wait....or are a bit late to the scene, W1AM will supply a set of the lists for \$1.00.....which will then go to the No Calif. DX Foundation. This is the poll which was in the WCDXB but there have been recurrent queries for it.

VK2FT/LH was there on a broadcast station construction job. He was due to leave on or about June 10th. QSLs for this one go to K1TZQ. VR3AH has been showing with a booming signal from Christmas Island....this one QSLs to K2BT. KB6CU was due to close down the American Phoenix operation on June 14th and will be heading for another assignment in the Pacific....vis KS6.

There are still a few ITU calls to account for. NLITU goes to WLIVM. NIGITU to WB6QBJ. VK2AR will be visiting in VU and LS7 in the next several weeks, possibly also 9N1. Possibly you will find him on forty c.w. from these spots.

That YI2AD on the last week of May was heard by a number of east coast stations but little else is known. Odds are that it was Slim. That station signing WLPUZ/XZ2 is rather definitely Slim.

TF3ST/4U, Stefan, is at Ismara with the UN forces there. Often found in the 14265-14275kc area from 1900Z. IE9CBM heard a week or so back goes to I2YDX. KJ6DL has a QSL Manager or two....he has WB5HVY for stateside and JA10CA back in Japan.

If you are looking for registration information on the DXPO 76 effort in late September, WA3NGS is handling this detail. DK5JA indicated recently that VS5MC would be active again starting last week. This seems to be Maurice Caplan, back in Brunei after trying the air in a few other areas.

If you might be interested in Esperanto, and apparently some are, there is a group meeting on Mondays at 1800Z at 14266kc or thereabouts. The report is that the International Radio Assn, a forerunner of the IARU, had Esperanto as its official language. Also, it is said that in the early years of amateur radio the ARRL favored Esperanto. Maybe you will learn more on the above net.

VP8MS indicates he will be listening for the W/Ks at 3795kc from 0100Z....this one is on South Georgia. Note that elsewhere withere is the summer schedule for the Arkansas DX Assn...they are on at 0200Z until October 1st.

YN8KMA will be heard on all bands from this week through the end of August. This is an effort by the 'Alamos DX Amigos", a volunteer group of medics and students, who regularly visit Central and South America each summer to aid in medical care in remote areas.

The first two weeks will have WB5CFI of the Texas DX Society trying to keep the YN8-prefix heard on eighty thru ten....SSB only. QSLs for this go to WA5WCT.

W5UFF operated ZF1BT the last week in May, a broken solder connection taking out the first day of his planned operation. Bruce found conditions not the best and this true on twenty c.w. He found some activity during periods when the bands opened but he also found plenty of opportunity to relax with the bands folded.

JAØCUV has noted that the only 1.8mhz contact he made from VRL was with W5USM. Minera might count for something yet. Kephart Communications in Alexandria, Va., is offering Minerva coins....\$75.00 each. 10 grains of 24k gold on 24 grams of pure silver. The brochure notes that the government of the Republic of Minerva is in exile after it was forcibly invaded by the Kingdom of Tonga. The possibility is mentioned that Minerva may reclaim its territory....yet. \$VØWTT indicates that the SVs can operate 80mtrs...3.5mhz to 3.6...A1/A3/A3J. Jim McCook, W6YA, will have open house for DXers on July 24th down there at Solano Beach. Rosie EP2YL/JY7YL/JY9YL will be there. We will have more on this....

## REPORTS FROM RED EYED LOUIE

Oh, Lonely Night, Last Forever!
You have made me learn to live and love—
And work DX....

CONTEST STUFF Tod Olson, WOIYP, who published the National Contest Journal, has announced that he is ceasing publication for a number of factors, personal times and desire being cited. He has offered to help anyone who might wish to pick up the reins of the NCJ and continue publication.

Out in the Western Reaches WGRTT is attempting to form some organization of contesters and has distributed a questionaire on the matter to many of the contest types. If you did not get one. drop a sase to Pete Grillo, 2018 South 8th Ave., Arcadia, Ca. 91006. A meeting being held on Thurs. 14290/0100Z-7225/0300Z.....

Arcadia, Ca. 91006. A meeting being held on Thurs..14290/0100Z-7225/0300Z.....

### Application of the control of the control

Ready to go again. Departure either June 19th or 26th..... BILL RINDONE

ZL3FM/VR1 being found on several bands. BRITISH PHOENIX

VS5MC reported as again active from last week. BRUNEI

VP8MS on 75meters often from 0100Z..... SOUTH GEORGIA

Last two weeks in June .... Alamos DX Amigos on medical mission. YN8KMA

TA1MB daily from 2000Z at 14210kc-14220kc area.... TURKEY June 24/27th....Long Island City. WOUUE for details. YL SSB MEETING

NORTHWEST DX MEET August 7/8th at Vancouver, British Columbia.

Ramada Inn, Tysons Corner near McLean, Va. Sep 25/26th SEANET CONVENTION Nov 12-14th in Jakarta. Probably at the Hotel Horison ...

From June 18th will meet on its summer schedule. NETS ARKANSAS DX NET: 0200Z at 3815kc Mondays and Fridays

SOUTHERN CALIFORNIA DX CLUB Bulletin of the Air. 0200Z Thursdays 14265kc

NORTHERN CALIFORNIA DX CLUB W6TI DX Bulletins. 14002kc...Sundays at 1800Z or Mondays at 0200Z.

YASME/THE COLVINS Lloyd and Iris should be home this week but from the New Hebrides they sent an up-date on their activities and the action to date.

From their start at VR1Z in the Ellice Islands last December, they have racked up 42,500 QSOs, the count being as follows:

116 countries FKØKG-New Caledonia 7500QSOs 111 Countries

meen CW and SSB. You might note that they

VRSB-Tuvalu, the one place where you would

they would have made it easily.

Lountry, they would like to heading out again after a month or two stay

Should anyone have any ideas about a spot that might be qualified

country, they would like to hear about it. They would like to line up

mer new one, something that they did with their VRSB-Tuvalu operation, but

will settle for some other rare ones if they have to. Whatever does develop, they

do look to more DX travel later this year.

- docket and the new dealine for filing comments is August 4th. You will recall that this FCC proposal would eliminate all mode restrictions within the amateur bands and replace them with maximum bandwidths that may be used regardless of the form of emission used. Reply comments will be due on September 3rd.
- QSL There are a couple for whose address there have been several requests. 9Q5QR goes to: Tony Jeuken, P.O. Box 10061-Airport, Kinshasa 24, ZaireRepublic.

  JY9CS goes to: American Embassy, APO New York 09892. He will be moving on to Qatar in the future months.
- TNX to W1DAL, W1GZI, WA1IJC, WA1NRF, K1TZQ, W2CNQ, W2FPM, K2GBC, WA3DMH, K3ZOL, W1BAA, K1CFB, W1GTS, WA1HHG, W1HU, W1KA, K1QMQ, K1SGL, WB1SIJ, W1TYE, W1UF, W1UMF, W1WRY, K1ZCD, W1ZR, W5AK, WA5AUZ, WA5LES, W5LUJ, W5LZZ, K5OVC, W5UFF, W5USM, WB6BKN, K6EC, W6GC, W6ISQ, WB6IXC, K6KA, W6KYA, K6LAE, W6MI, W6TSQ, K6UFT, K6VY, W6YA, WB6ZUC, K7ABV, W7AYO, WA7OBH, W7YTN, K8CFU, W8OA, W8ZOK, K9KEV, WB9LHI, W9MR, WA9UCE/6, K9UIY, WØSFU, WAØVDX, KØVVO, EP2AW, YJ8KG.
- WEST COAST DX BULLETIN Published every week by the Marin County DX Group. Last week was hardly started before QRPers were streaming up the hill, waving the bulletin. "What this about a "Great Country Fission Breeder?", they demanded. "Where did you dig up that one?" Son of a Gun!! We were in a bind on this one for there are many wondrous things in the world these days, and some defy comprehension or understanding. So we met this one head-on, frank as a politican in the primaries. "It's a headquarters project", we explained. "Apparently something out of IBM. For input they feed DXCC Country Criteria into it. Then, when there is a need or someone wants a favor, they push the DXCC Criteria to a critical mass, fission starts and a new one pops out of the machine. A brand-new country! It's something new in services for the Deserving DXers. It seems they may have bought it with the fees they now charge for DXCC certificates or endorsements. Understand?". If they understood they were not convinced. "What makes it run?", they demanded and we were ready for that question. "Well", we explained, "you know how they are energy conscious back there and they thought of solar power. But they found it ran best on moon power. During the initial run-ups, they found that it will function best around the time of the full moon. Apparently lots of vibrations are available then". You know something? They were still not convinced. They then asked who manufactured the Great DXCC Country Fission Breeder. "Look", we said in some exasperation, "if you do not want to take what we say, why don't you phone headquarters. Ask about the IBM 3742 machine they installed. See what they say!!". And that was it. For there are many unbelievers in the DX world but \$10.00 will bring a full year of the true DX word by second-class mail to the U.S and VE Areas....\$14.50 flips it into the same area by first-class mail. \$17.00 flings it to Mexico and all the DX countries throughout the whole world where there are always believers....that the Sunspots will rise again!! Someday....
