

+ +

LACCADIVES There was no late word of any possible changes on the Bangalore Radio Club plans for the VULARC-Laccadives operation and if all went as planned, they should have shown over last weekend.

The frequencies as noted in last week bulletin were confirmed by the Bangalore Club in their news letter except for the questionable 80mtr c.w one, they indicating the intention to use 3505kHz.

QSLs were to go to P.O. Box 5053 Bangalore 560001 DX. They ask for three IRCs for an airmail return. VU2JA, Joe Faithful, will be handling the QSL chores for the Bangalore Radio Club.

The indications were that the group intended to have a variety of antennas, these including German quads and dipoles and monobander beams.

Apparently there is another valid permit for a Laccadives operation but the other possible group is waiting developments before firming up any plans for an operation from the Indian island group. The Bangalore Radio Club were aiming to operate up to fifteen days though this may be subject to come change. They were definitely aiming to clean up the demand for the Laccadives, the last operation from the islands being by VU2KV, VU2RM and VU2DI back in 1971.

SPRATLY The tenative departure date for the Spratly effort has been nailed down, the group aiming to sail from Brunei on March 27th. This should put the planned operation's starting date about March 29th or 30th.

VK2BJL and ZL1ADI are again part of the crew, they having made the recent Mellish Reef trip together. The callsign to be used will be 151B and they plan to operate until they have passed the 30K QSO mark. Other members of the Spratly effort are being recruited and the full roster should be available before long.

The vessel will be the same one that went to Mellish Reef, the 'Banyanda' and some of the gear to be used will be shipped to Brunei later this month. There will be more information coming on this trip and at this point it is solid for late March. Early word on the plans will be released so that the Deserving can make their plans.

WEST AFRICA Early March will find a group of contest-type operators in West Africa to have a two week run on putting one and possibly a couple more countries on the air.

The group will include Ray Benny, N6VR who back in 1967 was signing ZD3G from Gambia. Also in the California group will be Joseph Hypnarowski, WA6VNR who especially likes One-Sixty. Two PY-contesters are also expected to join the group which figures to open about March 8th.

At this time the operations from C5-The Gambia are rather definite. The group also trying to line up operations from Mauritania-5T5, Mali-TZ and Cape Verde Islands, these operations being dependent on licenses, operating permission or the availability of a local station. There will be more information coming on this one.

PAIMYRA This may come this summer when one of the locals here heads out into the Pacific on a four month cruise on his yacht. Joseph Sutter of Sausalito plans to depart the Bay in mid-June for a four month sail on his yacht 'WILDFIRE' with stops at Hilo, Palmyra and Christmas Island. Joe is definitely planning the Palmyra stop and says that if the weather conditions are right, he plans to move over to Kingman for an operation.

An experienced deep-water sailor, Joseph Sutter operates a sail loft at Sausalito. He does advise that he plans to devote his operating time to the novice portion of the bands. Joe recently acquired his amateur license, signing a WD6 call.

Now wait!! It may not be what you are already thinking. Joe has a background in radio from service in the U.S. Navy, had a fairly good code speed already and there is a good possibility of upgrading before the departure this summer. Certainly with all the local experts here in Marin ready to tell everyone at anytime what to do, there will be some extensive briefings on the needs of the Deserving DXers and what to expect. There will be more coming on this planning.

TROMELIN FR7ZL last week advised that he would be on Tromelin in a couple of weeks, figuring to open there about February 4th or 5th for a two-month tour at the weather station. In a QSO with K1UO, Guy said that he should be active from Tromelin until the first week in April. The advice was to watch around 14050kHz for his Tromelin signal.

Guy also indicated that he probably will be on Europa (Juan de Nova) in early June or July. It might also be noted in Red Eye's reports that FR7ZN was reported from Juan de Nova on twenty SSB early in January. There are reports that there is current activity from the island group. SUNSPOT LOUIE W6RQ was excitedly querying the locals on the two meter repeater last week, Al wanting to know if anyone was out in the sunshine because he was in a fog. The problem being that Al had been watching the very interesting developments on the east limb of the sun but his observations were being happered by a storm front moving in, this one stretching all the way from California to Hawaii. Between the layers of clouds, the observations were managed and as has been noted: "Very Interesting". Though the offical word out of Boulder showed something like eighteen active areas with spots and two without spots, any true-blue DXer knew that things were good. Not only good but going E to get better. If you want to figure the sunspot coun on the day of KH6BZFs data, you are going to come up with a count of something like 306....maybe even more. And any time you get a count like that, you can remember that it was the Palos Verdes Sundancers who were doing the Grand Gavotte to bring back sunspots when everyone else was saying we were in another Maunder Mintmum. Or something like that.

As some has noted, maybe we'd better give more attention to the disco and less to the statistics. Op was it more time at the disco and less at the shack? But that can't be right. While we figure out the mental imbroglio we have fallen into, lets hear from N4XX and how suburban life is on the south bank of the Potomac during these cold and snowy days of, the new year. Ted says it is not yet time to be seeking the crocus blooming in the snow but it is time for DXers to live. And Cycle 21 is taking you where many DXers felt they would never go again. And every DXer's shack is a daily disco as the Deserving caper about dodging the onslaught of new DX. And Ted says that you can look for....

Jan	16th	Low Norma	al	Jan	23rd	High/	Low	Normal

hose	caperi	ng about	waiting	for th	e deli	very	on t	he new	

propagation book, THE SHORTWAVE PROPAGATION HAND BOOK by George Jacobs, W3ASK, and Ted Cohen; NLXX, can expect it to be available before the end of the month. Cowan has promised it by then.. Positively!

And with W6RQ hailing the interesting developments on the east limb, K6EC was counting the flux. The provisional figures for the 8/9/10 of January were again over the 200 mark, and you will note that EV pried them up over the 200 mark for the first five days of the year. With everyone working on a bull market in flux, what can you expect but the Great Days of DXing....they are here!! And a careful listening to the sounds out of WWV says that your charts should say:

	Sola	ar Flux	Ap Index	Solar Flux Ap Index
an	1st	203	8	Jan 5th 200 16
	2nd	208	9	6th 196 13
	3rd	220	5	7th 194 4
	4th	205	16	the second s

Who watches these figures? Those who may wonder should note that this week brought a query from ZE-land on them.

J

BOUVET There was a strong c.w. signal last Friday, this one signing 3Y1VC and located initially just below 14030kHz. Operating split, the signal was booming into the Western Reaches.

With all the DX Entrepreneurs showing with a variety of signals on cw and all full of assurances they are the true-blue frozen type Bouveteans, there is and has been some doubts. But this one was using a straight key, had a bit of the arctic flutter on the signal and was working the W6s. As most everyone knows, this has to be good signs.

It is possible that the ICOM gear is on line and they have improved the set-up a bit. The station was working split-frequency, showing about 0030Z and was around for about an hour.

IRAQ YI1BGD in a QSO with JA1BK advised that they do have the FT-101E on line and they do have approval to use the FTDX-500 shipped by the Northern California DX Foundation. JA1BK was particularly interested in the status of the FT-101E, Kan having shipped that item himself some months back.

The improved signal has been noted in Japan and is definitely readable. It is reported that the crew at the Baghdad Radio Club now includes a YL operator, this being Auroba.

CHAGOS VQ9JJ has been heard, this one operating the MARS station on Diego Garcia and he says he will be there for a year.

The station has been showing on twenty SSB, showing a couple of times between 14225-250kHz and after 1300Z. He said to QSL to W5RU, the Delta DX Assn at Box 73, Metairie, Louisiana 70004. Sase or Sae/IRC needed.

SAO THOME DLCBS indicates that he will be in S9-Sao Thome about March 1st. This trip has been planned for almost a year and things have kept Angelo from showing at this spot. Now he says that the time is near.

TANZANIA 5H3BP has been showing on both fifteen and twenty SSB, usually after 1330Z and he advises that a SM5 will be arriving there within a week or so and will be on the air as 5H3GK. This will be a mostly c.w. operator.

N4UM/C6A Send your QSLs to: Bob Patten, N4BP, 2311 West Nsssau Drive, Miramar, Florida 33023. Sase or Sae/IRC needed.

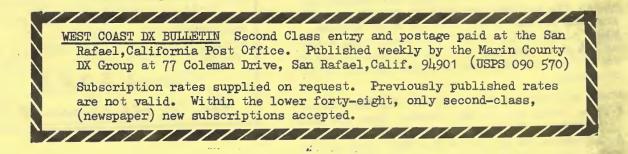

MALDIVES HB9TL, Jakob C Laib, will be in the Maldives for a weekend operation in March. Not quite definite as to the schedule, you can look for the activity on one of the first three weekends in March. This figures out to March 2/4th; March 10/11th or March 17/18th. The exact weekend may be available for March rolls around.

Crystal-controlled, you can look for the activity at:

CW: 14020/21020/28020kHz

SSB 14195 or 14275/21295 or 21275kHz 28595 or 28520kHz

QSLs will go to home QTH..... Jakob C Laib, HB9TL, Einfangstrasse 39, CH-8580 Amriswil, TG Switzerland. Sase or Sae/IRC needed.

West Coast DX Bulletin 16 January 1979

THE FRESNO INTERNATIONAL DX MEETING The meeting will be on the April 7/8th weekend and at the Hilton Hotel in Fresno, that much is definite.

Room rates at the Hilton have slid a bit, in the upward direction. It will be, it is reported, \$27 for singles and \$35 for doubles.

As far as pre-registration, this figure has not been nailed down as yet. Like most everything else, the dinner and breakfast will cost more. On the everlasting cocktail party on Saturday evening, there was a court decision last year in California which held the host responsible for damages if a guest got smashed and then went out and did more smashing to himself. This liability is expected to be ended by the legislature but it has been a complicating factor in making the arrangements.

Pre-registration will be over \$20 and under \$25 .. and the final figure will not be known for some weeks yet. WA6AHF and XYL Ferne will again handle the pre-registrations for the Northern California DX Club which is the host club this year.

There will be more advice when things get a bit solid. The dates and location are solid. Most everything else is negotiable within some narrow limits. 1.5

CLUB NOTES We have some more lists of the valiants who lead their DX groups through the Valley of DX and towards the always elusive DXCC. These are:

NORTHERN ILLINOIS DX Assn

President	K9KM	Howard Huntington
Vice-Prex	K9RA	Brian Miller
Secretary	W9WU	James OfConnell
Treasurer	W9ZA	Kenneth Neuffer

CENTRAL ILLINOIS DX & CONTEST CLUB

President Vice-Prex Secty/Treas Activities

K9CT Craig Thompson WB9MSV Larry Reiser AB9M Gary Huber N9AGC Greg Smith

VIRGINIA CENTURY CLUB

President	AFLH	Pete Cyr
Vice-prex	KLITIA	Glynn Bashford
Secty/Treas	WALOUF	Dick Cook
Directors		Dick Parrott
	ААЦСК	Charles Keil
	WALWYN	Brian Robertson

NEEDED COUNTRY LIST If all goes right, next week you'll get the full call-area 'needed list', this will run to about three pages in the bulletin. And, if all goes well, you'll get the K5DB latest QSL list. All of this in one big bundle which will go out via second-class mail in the states. The figuring is that it will run to about sixteen pages in the bulletin and this would take a lot of 1st class postage. One of the reasons why we are anxious to dump the 1st class label. It is confining.

There will aso be 'needed lists' for East Asia, Europe, South America and Canada. Some are most interesting. Would you figure XF4/KP6KR/CEØX/ Aves/Glorioso being in the Top Ten? They are on some lists. These will come in the future.

MADISON ELECTRONICS SUPPLY, INC. 1508-F McKINNEY • HOUSTON, TEXAS 77002 713/658-0268 BARUCH 4Z4TT will open from FW8 next Wednesday, January 24th, and he plans to be on Wallis Island for at least fourteen days.

This will be SSB only and he says to look for him at 3795/7085/14180/21300 and 28600kHz. He will have a triband beam and dipoles for antennas and a TS820 plua an ATLAS for gear. He will be looking for strong signals and a steady business in QS0s.

Baruch has hoped to operate from the Phoenix Group but plans did not work out for that one. He has previously operated vrom VR1AT, from Tuvalu as VR8N and from Tonga as A35TT. QSLs go to Box 22572, Tel-Aviv, Israel. Because of the problems in the past with IRCs, he asks that \$1.00 be enclosed to cover the postage costs.

There may be other stops in the Pacific if things work out. Returning he plans to make stops in Los Angeles, San Francisco and New York.

St MARTIN K1CO, Chuck O'Rourke, will be in St Maarten across the ARRL Phone Test, he planning to open about February 28th and running to March 12th.

Visitor licenses being somewhat a thing of the past, he plans to sign K1CO/PJ7. QSLs will go to W8AEB. In the ARRL Test it will be a full-throttle, big-bore, flank speed multi-multi operation with seven operators. This may sound big but he says it is only a trial run for the CQ WW Phone Test later in the year. You may even hear of a Caribbean aurora when they get going. Absolutely!!

SHORTLY NOTED Albania? When will you hear a true-blue ZA again? Some have thought maybe never but things may be changing. The first visit by an Italian official delegation to Albania was concluded recently, this being the first since WW II. That's over thirty years! The Chinese mainland government ended their economic and other aid some time back and there has been a switch on the Albanian axis towards the west. Something may come...it usually does if you wait long enough.

Afghanistan, which has not been heard these many years, is rising in the needed lists. OZ1CRH, Masood Kahn, will in Pakistan and then into Afghanistan later this month and he will be making inquiries on the possibility of operating. This may be a tough one but there are always someone in there pitching for the Deserving.

KV4AA finished up 1978 with 48,100 QSOs. You can figure this out yourself and it will come to about 132 QSOs per day. Shows what a little effort can do for you in using up log books.

Anyone with a good address for Ron Maples, W2INB, the QSL route for 5N2RG. Cards sent to the Willow Pond address in Penfield, New York are being bounced back. George Collins who has been signing S8FXT expects to open from H5FXT on January 21st. This one should come with a good signal, George has the tower up and waiting. H5AC, John, who has been showing, expected to be back again this last weekend. Often around 14228kHZ from 2200Z.

HH2Q ran up 5,277,000 points in the recent CQ Test, this should be more than enough for a new North American record in the Multi/Single category. If you worked the station, K4UTE is the QSL route for the Phone Test, W4ORT is handling the cards for the CW Test. Sase needed and they say they have just warmed up. Wait for next year!

HFØPOL secured the operation in the South Shetlands on December 31st and is enroute back to Poland. He probably will not get there until late January and will get to work on the QSLing. These should start going out in late February or early March.

Documents for the Mellish Reef, VK9ZR, operations have been delivered to the ARRL. Some have asked about the QSLs. Harry Mead does have them, this being VK2BJL, and he is working on them. As he is doing most of the work himself, they probably will be awhile in coming....but they are. Willy de Roos was reported tied in behind an island in southerm Chile a week back waiting out a storm. He should be close to Peter Island in a couple of weeks. There is a report that a Chilean ice-breaker may help with the approach to the island and will stick around long enough to see if they can get established ashore.

We have run out of space again. Next week things are going to be different. Positively!

16 January 1979

If all fell into place, VULARC should be on now. Late March planning falling into order Possible June operation Kingman also if weather is right CW activity last week. The station will be heard Lots of H5 activity scheduled....this week and next. W1RED there next week from January 22nd LU3ZY being reported again new crew Transportation problems.....maybe next month HI1RCD on January 25th WØSH and KØXD for a week from February 13th VR6BJ in short operation about April 19th Something might develop P29JS looking for handle Willy getting further south. Still looks like next month D4CBS expecting to operate from S9 starting early March FR7ZL from about February 4/5th for two months VQ9JJ being heard there for a year Getting close! Downtown Gent on February 10th. ON5NT for info.... Downtown Norfolk, Virginia ... February 19th. KLJNM for info January 27/28th K1CO from February 28th across the ARRL DX Test January 27/28th January 27/28th February 24/25th March 3/4th only half of what it once was March 17/18th March 24/25th May 12/13th West Texas hails the return of the mud dobber Downtown Fresno at the Hilton April 7/8th

Put your transmitter to work with a BW Clipper. Installed in the IF strip, it increases average SSB output to a little below key down CW output. No non-reversible modifications. STEP UP TO TRUE RF SPEECH PROCESSING

A QUALITY RF SPEECH PROCESSOR Drake T4X\$195.00 Drake TR4\$200.00

BROCHURE ON REQUEST To order specify model. Add \$2.50 (\$10.00 foreign) for shipping. III. residents add 5%.

BW COMMUNICATIONS Co., inc. PO BOX 220, 2643 WEST 139th ST., POSEN, IL 60469 AREL The AREL Bos of Directors will be meeting in Miami late is month and you might as well brace yourself for one changes. There are definitely some financial problems that will have to be attended to and decision on the level of services to be provided the membership and the charges, if any, which will be levied. There have been increases in membership rates and advertising rates, these to the point that further increases may bring a negative reaction and it does appear that the AREL will be seeking ways to match the expenses with the cash input, in recent quarters the expenses have been getting a bit of an edge.

There has been information that the headquarters staff intend to propose that the DX Awards be reduced to a single award and that alone. The feeling in this matter is said that DXCC does not bring a proper or adequate return.

It might be noted that HR REPORT noted in a recent issue that DXCC applications are up 35% in the last year, this including endorsements and that the post-World War II DXCC now number 26,000. It might also be recalled that DXCC was once a free service but a convoluted motion slapped a charge on DXCC while others, such as traffic average and models, did not get the bits. Be Brownedd

on DXCC while others, such as traffic awards and medals, did not get the bite. Be Prepared! TNX to W1AM, K1CO, W1DA, WA1EOT, W1GL, W1JR, W1MV, W1RED, K1UM, K1UO, W1VV, W2FP, W2HAZ, W2NC, K2OF, WA2RLQ, WA2SON, K2UFM, K2UO, N3ED, K3ND, WA3SXH, WB4FOT, W4HU, KE4I, W4KA, W4LCL, W4ORT, W44OUF, W84EYX, W4UF, W4UG, N4XX, W4ZR, W5AQ, K5AQ, W5CPI, K5DB, K5DUT, K5GL, K5GZ, K5IH, W5IMJ, W5JW, K5NA, W5OSJ, K5OVC, A15Q, K5VT/3, W5YH, K6ARE, WA6BJS, K6DT, K6EC, N6EM, WA6FIT, W6JD, K6KA, W6KPC, N6MM, N6OB, W6PN, W6RQ, K6SSJ, K6SX, W6TSQ, AE6U, K6UFT, N6UW, W6VQD, K7ABV, W7BCT, N7AII, N7UT, N7MW, W8GT, K8DA, K8IP, WD8IXV, W8MAW, WA8MOA, K8RD, W8JVZ, W8UVZ, W8ZOK, W9RN, W9SS, W9TC, K9XJ, W6BW, WAØKDI, NØRF, WØPT, KH6BZF, CEØAE, KZ5JM.

ff

WEST COAST DX BULLETIN Published every week by the Marin County DX Group. It was raining last week and one of the local QRPers was up the hill and in out of the rain. This one came with the indescribable look of fulfillment. "Bet you worked Bouvet," we ventured and the QRPer smiled. We expected more but all we got was that enigmatic smile. Finally we just had to ask questions. "Oh, it was not hard," the QRPer expounded grandly and somewhat in contradiction to what others were saying, "all you really need is a plan. That does the trick." This was telling nothing and we were getting a bit anxious. "But just what did you do?" we demanded, "use that group plan where the bunch would spread out one kilocycle apart from two-ninety to three-ten and call simultaneously until someone caught the Bouvet station, then throw in the list and everyone could coast home easily? Is that what you did?" The QRPer laughed, a bit condescendingly we were thinking and a bit irrating we were sure. But then again, how does one treat a station that has worked Bouvet? And with low power to boot? We had to know more. But there was the QRPer, all nonchalance, carefully flicking a bit of dust off his knee. "Oh, that was not it at all," he said, "not that at all." We had to bring in another supply of patience, finally lapsing into a silence that we knew the QRPer could not endure, he wanting to enjoy the luxury of the moment. Finally he got to the point. "Actually it only took two of us," he explained. Only two. One went up above three hundred, acknowledged the 3Y5DQ, gave a signal report and asked for his in return. With the instant QRM on frequency, he kept saying he could only get part of it and kepting asking for a fill. Naturally, within a matter of seconds everyone just about was on the frequency, calling Thorey and yelling and hollering and things like that, all of it non-stop. The normal set-up that came everytime the Bouvet station came back. You know how it is." Of course we did, any true-blue DXer who has been awake in recent weeks knows how it is. "But how does get you to work Bouvet?" we demanded and again the QRPer was all smiles. "Well," he continued, "while everyone was up above three hundred trying to tail-end or something like that, the other one of us would drop down below ninety-five and call. With our low power no one would pay any attention to us, not while things we being torn apart up the band. Of course they could not hear anything, neither could Bouvet. We figured he'd come looking for something he could read. And we were right. It was easy." There was something that did not seem right in this and we were not to let things go unnoticed. "Do you think it fair to give those signal reports and Bouvet not being on the frequency?" The QRPer shook his head. "Certainly not," he said earnestly, "and we are not going to do it again. That's for sure." We gave up at this point for there are a lot of things about Bouvet that makes one wonder and especially how the island station can hear anything with everyone on the same frequency non-stop. We will have to consider this DX 'bait and switch' routine before giving a measured judgement. Meanwhile, a measured subscription rate comes if you ask no other way. DX is for the strong and loud and belligerent.....isn't it? And as W6PHF often says, "Operating ability and DX techniques are directly porportional to the height of your tower and the excess of your power".
